DETAIL SPECIFICATION SHEET

CAP INSERT, ASSEMBLY, PRESSURE SEAL,
 FLARED TUBE FITTING

This specification is approved for use by all Departments and Agencies
 of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and
 SAE-AS4841.

Cap dimensions and configuration, see figure 1. Cap and nut assembly, see figure 2.

FIGURE 1. Cap dimensions and configuration.

NOTES:

- Dimensions are in inches.
- Metric equivalents are given for information only.
- Fittings shall be free of all burrs and slivers.
- Unless otherwise specified, tolerances for three point decimals ± 0.010 inch (0.25 mm).
- For design features purposes, this standard takes precedence over documents referenced herein.

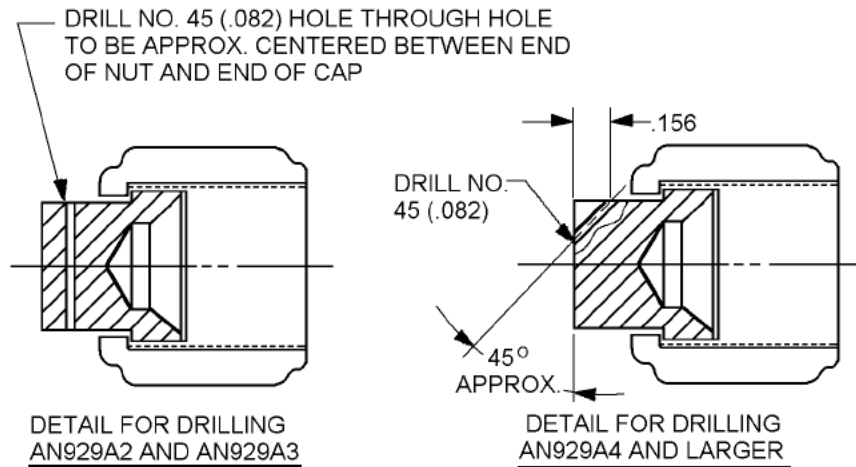

FIGURE 1. Cap dimensions and configuration - Continued.

AN929 Rev 14

NOTE: Cap shall be movable and permanently secured to the nut to prevent assembly from coming apart, such as mechanical staking. The method used to prevent the movable cap from falling out of the nut is the manufacturer's option. Other methods may be used upon approval by the Preparing Activity. A physical and permanent retention method shall be present. See figure 4 for examples of approved methods.

FIGURE 2. Cap and nut assembly.

Inches	mm
.005	0.13
.082	2.08
.156	3.96

FIGURE 3. Cap assembly, safety chain configurations.

AN929 Rev 14

REQUIREMENTS:

Dimensions and configurations: See figures 1, 2, and 3.

The Part or Identifying Number (PIN) represents a 2-piece assembly consisting of an AN818 nut and a permanently attached movable cap insert as specified herein and as shown on figure 2.

Material: See table I herein, procurement specification SAE-AS4841.

TABLE I. Material cap assembly.

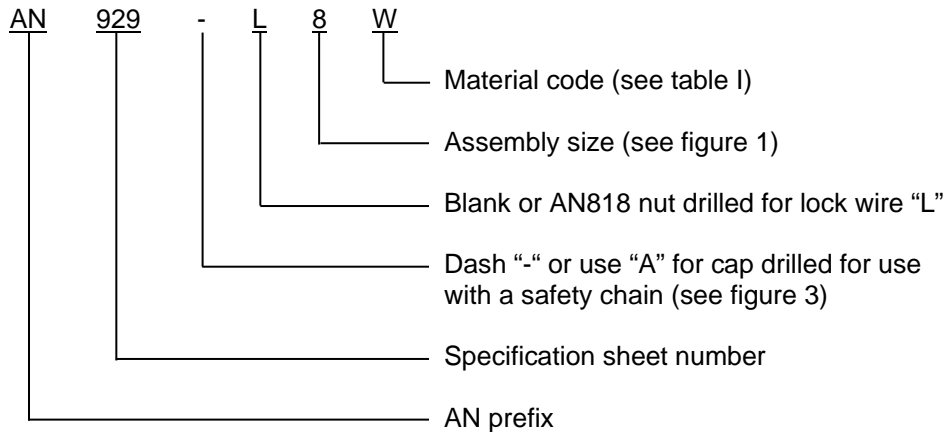

Cap insert assembly AN929			Nut AN818 <u>2/</u>		
Material designator	Material	Alloy	Material designator	Material	Alloy
F	Steel	4130 or 4140	Blank	Steel	4130 or 4140
J	CRES	304	J	CRES	304
K	CRES	316	K	CRES	316
S	CRES	347	J or K	CRES	304 or 316
T <u>1/</u>	Titanium	6Al-4V	T	Titanium	6Al-4V
W	Aluminum	7075-T73	W	Aluminum	7075-T73

1/ Not for use with oxygen systems.

2/ Material designator for manufacturers use only to determine proper AN818 nut to use for the cap insert assembly.

Finish: See SAE-AS4841.

PIN: The PIN consists of the AN prefix, specification sheet number, dash or "A" for cap drilled for safety chain, blank or "L" for nut drilled with lock wire, number for assembly size, and a letter for material designator.

PIN Examples:

AN929-8W identifies a cap assembly .500 inch (tube), 7075-T73 aluminum.

AN929-L8J identifies a cap assembly .500 inch (tube), AN818 nut drilled for lock wire, CRES 304.

AN929A8S identifies a cap assembly .500 inch (tube), cap drilled for attachment of safety chain, CRES 347.

AN929AL8J identifies a cap assembly .500 inch (tube), cap drilled for use with a safety chain, and AN818 nut drilled for lock wire, CRES 304.

AN929 Rev 14

Supersession data: The blank material designator for aluminum alloys 2014 and 2024 in table II have been replaced by a "W" material designator for aluminum alloy 7075-T73 due to stress corrosion cracking aluminum alloys 2014 and 2024.

TABLE II. Supersession data.
