DEPARTMENT OF THE ARMY TECHNICAL BULLETIN

SECURITY OF TACTICAL WHEELED VEHICLES

Approved for public release; distribution is unlimited.

HEADQUARTERS, DEPARTMENT OF THE ARMY 27 AUGUST 1988 Technical Bulletin No. 9-2300-422-20 * **TB 9-2300-422-20** Headquarters Department of the Army Washington D.C., *27 August 1988*

SECURITY OF TACTICAL WHEELED VEHICLES

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this bulletin. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter or DA Form 2028 (Recommended Changes to Publications and Blank Forms), direct to: Commander, U.S. Army Tank Automotive Command, ATTN: AMSTA-MB, Warren, MI 48397-5000. A reply will be furnished to you.

Approved for public release; distribution is unlimited.

*This Technical Bulletin supersedes TB 9-2300-422-20, 15 February 1980.

i

Section I. INTRODUCTION

1-1. Purpose.

This bulletin is published to provide security of tactical wheeled vehicles. These instructions are based on requirements established by directive (AR 190-51 Security of Army Property at Unit and Installation Level).

1-2. Scope.

a. This bulletin establishes minimum requirements needed to achieve the protection required for tactical vehicles of all classes.

b. If vehicles are equipped with devices that attain a degree of security equal to that provided by those described in this TB, vehicles need not be modified solely to make them exactly compatible with the devices illustrated.

1-3. Installation Level.

Organizational Maintenance shall perform the installation of security devices described within the bulletin.

Section II. PROCEDURES

2-1. General

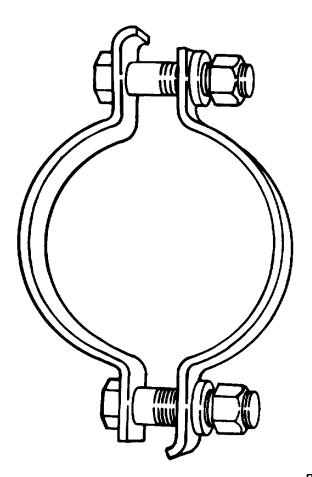

a. All vehicles listed (Table 1) will utilize the appropriate clamp to attach the chain to the steering column. Typical clamp is shown (Fig. 1).

VEHICLE	CLAMP w/Bolts, Nut, Washer	NSN
M151,1/4 Ton Trk	MS53041-1	5340-00-756-2403
M561, 1 1/4 Ton Trk	MS53041-2	5340-00-059-5442
M35, 2 1/2 Ton Trk	MS53041-2	5340-00-059-5442
M39/M809, 5 Ton Trk	MS53041-2	5340-00-059-5442
M656, 5 Ton Trk	MS53041-2	5340-00-059-5442
M123, 10 Ton Trk	MS53041-2	5340-00-059-5442
M746 HET	MS53041-2	5340-00-059-5442
M911, 20 Ton Trk	MS53041-3	5340-00-079-8610

Table 1. Recommended Clamps for Listed Vehicles

b. The following additional hardware requirements apply to all installations.

NOMENCLATURE	PART NUMBER	NSN
CHAIN: Approx 141 Ft (43m), 1/4 in. (6.4mm) Links	RRC-271	4010-00-129-6049
CHAIN: Approx 550 Ft. (167 m), 5/16 in (7.9 mm) Links	RRC-271	4010-00-149-5583
CHAIN: Approx 400 Ft. (122 m), 3/8 in. (9.5 mm) Links	RRC-271	4010-00-184-3476
PADLOCK	MILP17802	5340-00-158-3805

TA 067336

Figure 1. Typical Muffler Clamp.

2-2. Procedures for M151, M561, M35, M39/M809, M656, M123, M746, and M911.

a. A clamp is to be mounted on the steering column (Fig. 2), as clearance will allow. One end of the chain is to be retained by one screw, after which the clamp is to be positioned for maximum operator knee clearance, and tightened securely.

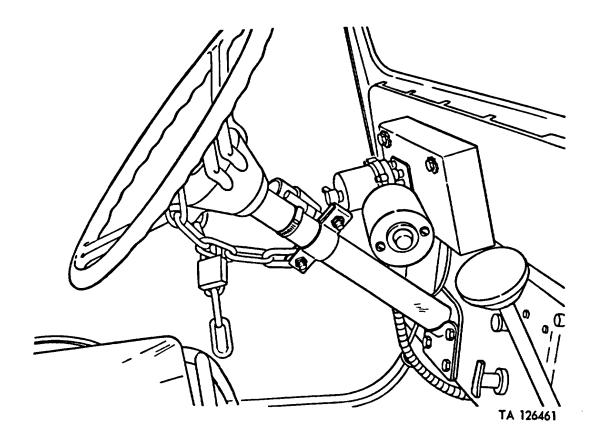

Figure 2. Typical Clamp and Chain, Installed.

CAUTION

Follow all safety precautions when welding. Tack-weld only. Some steering column tubes are only 0.065-inch thick and could be damaged by excessive welding. DO NOT weld adjacent to steering column bushing.

NOTE

Approximately 18 in. (45.7 cm) of chain will be required to reach around steering wheel spokes to secure padlocks.

b. The nuts are to be tack-welded (TM 9-237 Welding Theory and Application) to the screws for a permanent installation. In some cases, the clamp may not have a close fit on the steering column. If this occurs, it is permissible to tack-weld the clamp to the column itself to prevent rotation.

WARNING

Store chain by winding around column and securing with padlock. Failure to do so could cause chain to interfere with driver's feet.

c. When vehicle is in use, chain will be stored by winding the chain around column and securing with padlock. If chain is left unsecured, it could interfere with driver's feet, causing driver to lose control of the vehicle.

d. Steering wheel must be turned all the way to the left or right before securing vehicle with chain or cable.

2-3. Procedure for M880 series, 1 1/4 Ton Truck.

WARNING

During vehicle operations the chain should be stored beneath the driver's seat, looping chain upon itself, and securing it with a padlock to prevent entanglement with driver's feet. Do not allow additional locks to remain on the security chain, as this may impair proper stowage.

CAUTION

Welding is not allowed on these vehicles due to the potential fire hazard of the seats and floor mats.

a. The design of the steering column on the M880 vehicle will not permit the use of a standard clamp as a chain attachment. The following procedure should be utilized.

b. Attach fixed end of chain with a 3/8 in. (9.5 mm) machinescrew, lockwasher, and nut into manufacturer's hole that is located in the rear of seat riserplate on the operator's side of vehicle. Fasten the chain on the inboard side of riser (Fig. 3). The nut is to be located on the outboard side of riser and, after securing, the screw should be staked to prevent removal.

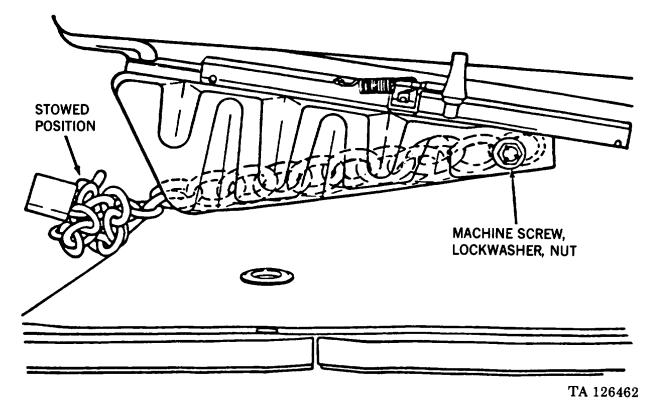

Figure 3. Chain in the Stowed Position.

2-4. Mounting Hardware, M880 Installation only.

NOMENCLATURE	PART NUMBER	<u>NSN</u>
Screw Washer	MS35308-364 MS35338-141	5305-00-801-5747 5310-00-984-7042
Nut	MS51968-8	5310-00-732-0559

2-5. Procedure for M1008 Cargo.

WARNING

During vehicle operations the chain should be stored beneath the driver's seat, looping chain upon itself, and securing it with a padlock to prevent entanglement with driver's feet. Do not allow additional locks to remain on the security chain, as this may impair proper stowage.

a. Drill a 27/64 inch hole in front end of left hand seat riser bracket. Locate hole 9/16 inch from top of bracket and 5/8 inch from outboard edge of bracket. Insert screw threaded area forward into hole, attach end of chain with washer and nut, then tighten. After tightening, the nut should be staked to prevent removal (Fig. 4). Position chain around steering wheel spokes and secure with padlock.

b. Parts required are as follows:

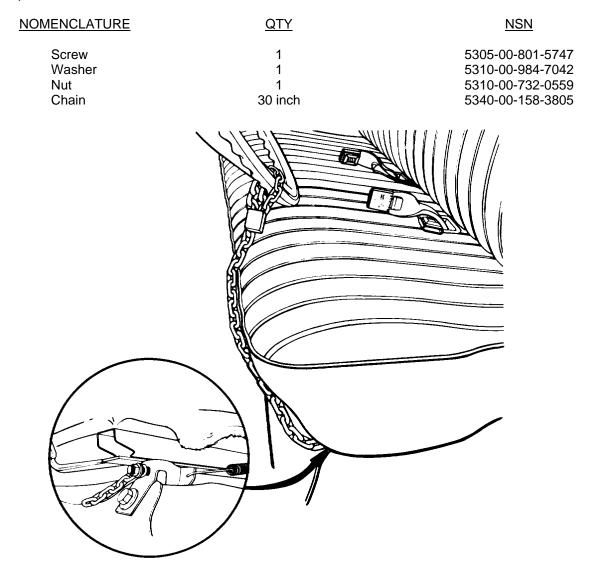

Figure 4. M1008 Cargo Chain Position.

2-6. Procedure for M1009 Utility.

WARNING

During vehicle operations the chain should be stored beneath the driver's seat, looping chain upon itself, and securing it with a padlock to prevent entanglement with driver's feet. Do not allow additional locks to remain on the security chain, as this may impair proper stowage.

a. Drill a 27/64 inch hole in driver's seat forward bracket. Locate hole 1 1/2 inch above cab floor and 1 inch from front edge of bracket. Insert screw in hole with threaded area facing inboard; attach end of chain with washer and nut, then tighten. After tightening, the nut should be staked to prevent removal (Fig. 5). Position chain around steering wheel spokes and secure with padlock.

b. Parts required are as follows

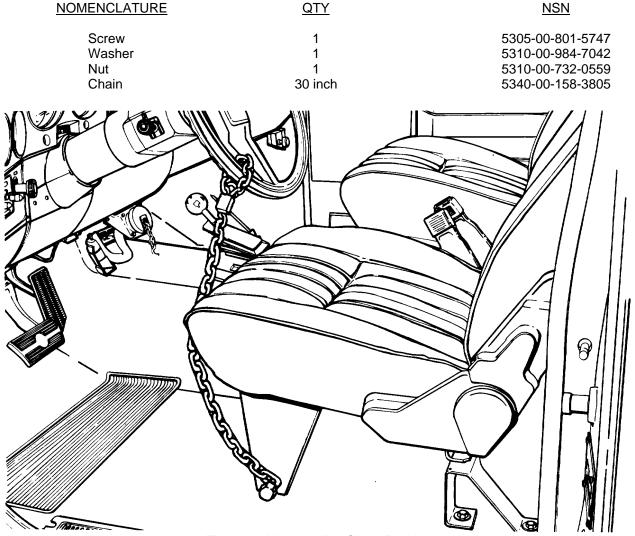

Figure 5. M1009 Utility Chain Position

2-7. Procedure for M1010 Ambulance.

WARNING

During vehicle operations the chain should be stored beneath the driver's seat, looping chain upon itself, and securing it with a padlock to prevent entanglement with driver's feet. Do not allow additional locks to remain on the security chain, as this may impair proper stowage.

a. Drill a 27/64 inch hole in the forward end of driver's "Right-Hand" seat riser bracket. Locate hole 9/16 inch from the top of bracket and 5/8 inch from the edge of bracket. Insert screw in hole with threaded area facing outboard, attach end of chain with washer and nut, then tighten. After tightening, the nut should be staked to prevent removal (Fig. 6).

- b. Position chain around steering wheel spokes and secure with padlock.
- c. Parts required are as follows:

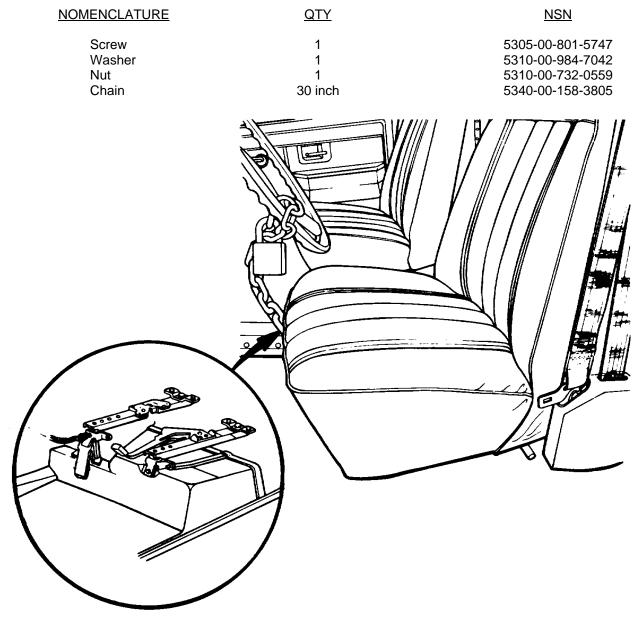

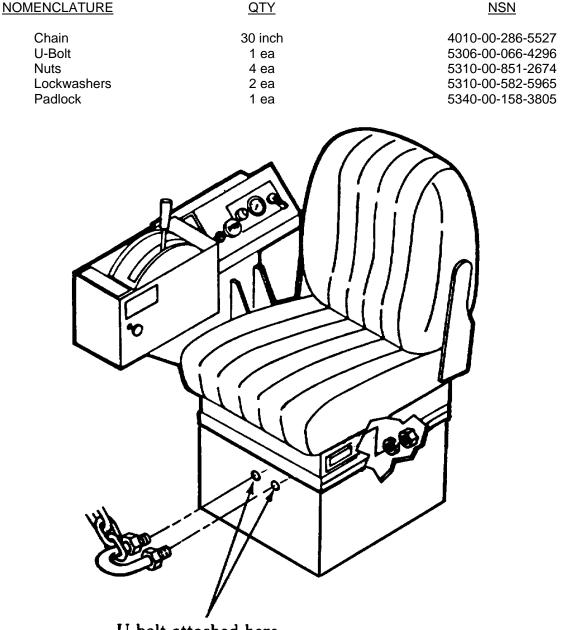

Figure 6. M1010 Ambulance Chain Position.

2-8. Procedures for M915 thru M920, M915A1 22 1/2 Ton Truck, 6x6.

a. Loop one end of chain through a U-bolt. Run hex nuts all the way up the U-bolt to give extra support before installing the U-bolt to the seat assembly. Drill two holes (approximately 1 1/2 inches) from the top of the seat riser (using 1/4 inch drill). Mount U-bolt to seat assembly, tighten nuts and stake threads (on inside side of seat assembly), so U-bolts cannot be removed (Fig. 7).

- b. Place free end of chain up through and around steering wheel and secure with padlock.
- c. Parts required are as follows:

U-bolt attached here

2-9. Procedure for HEMTT, M977 Series.

Security locking system is already incorporated into this vehicle. The locking system consists of a bracket with a hole that is attached to the shaft on the 90- degree gear box (Fig. 8); a padlock can be placed in the hole which will limit the steering wheel to be turned 1/4 turn in either direction.

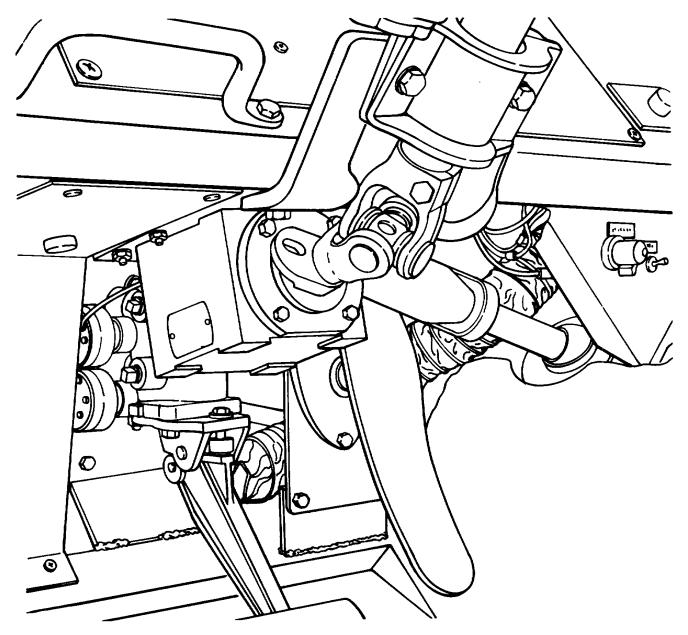

Figure 8. M977 Series Locking System.

2-10. Procedure for HMMWV, M998 Series.

The HMMWV has a steering wheel lock cable (Fig. 9) that permits steering wheel to be locked into position to prevent unauthorized use of vehicle.

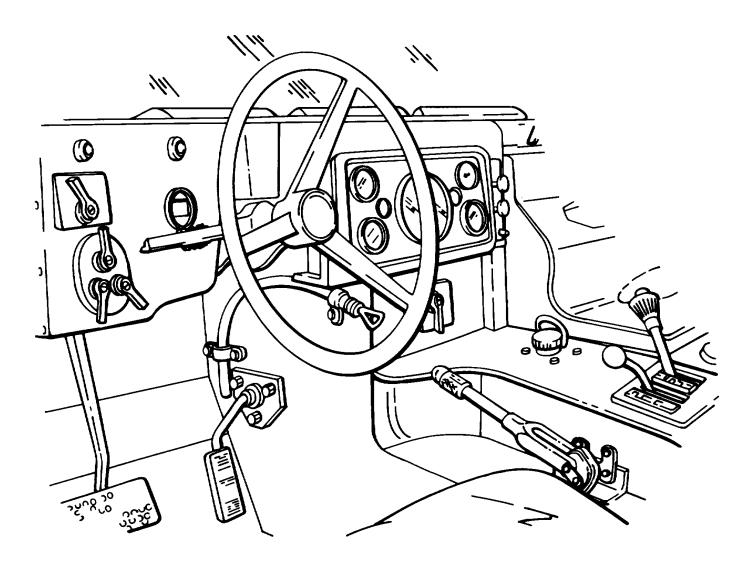

Figure 9. M998 Series Locking System.

By Order of the Secretary of the Army:

CARL E. VUONO General, United States Army Chief of Staff

Official:

WILLIAM J. MEEHAN II Brigadier General United States Army The Adjutant General

Distribution:

To be distributed in accordance with DA Form 12-38, Unit maintenance requirements for Truck, Commercial Utility Vehicle, Cargo, Tactical, 4x4, M1008, M1008A1, M1009, M1010, M1028, M1029A1, M1031.
