

DATA ITEM DESCRIPTION

Title: SOUND TEST FAILURE NOTIFICATION AND RECOMMENDATIONS REPORT

Number: DI-HFAC-80271A

Approval Date: 20150515

AMSC Number: N9545

Limitation: N/A

DTIC Applicable: No

GIDEP Applicable: No

Preparing Activity: SH

Project Number: HFAC-2015-005

Applicable Forms:

Use/relationship: The Sound Test Failure Notification and Recommendations Report aids the Government in deciding whether to accept an equipment item which fails to meet airborne sound criteria or structureborne vibratory acceleration criteria.

- a. This Data Item Description (DID) contains the format, content, and preparation instructions for that data generated as specified in MIL-STD-1474.
- b. This DID supersedes DI-HFAC-80271.

Requirements:

1. Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions shall be as specified in the contract.
2. Format. The Sound Test Failure Notification and Recommendations Report shall be in the Contractor's format.
3. Content. The Sound Test Failure Notification and Recommendations Report shall contain the following sections.
 - 3.1. Introductory information. This section shall contain a statement that the equipment failed to meet the airborne sound criteria, the structureborne vibratory acceleration criteria, and if applicable, both criteria.
 - 3.2. Test and equipment information. This section shall contain the following:
 - a. Equipment to be evaluated, including contract number.
 - b. Ship name(s) and hull number(s), if known, for which the unit is being acquired.
 - c. Evaluation measurements to be performed.
 - d. Evaluating activity and test site.
 - e. Test date.
 - f. Data analysis date.

DI-HFAC-80271A

- g. Driven and driver unit manufacturers and serial numbers. Driver unit horsepower.
- h. Equipment specification acceptance criteria (airborne sound pressure levels, structureborne vibratory acceleration levels, or both).
- i. Tabular or graphic records of the data from the test and from the retests of modified equipment.
- j. Documentation of specific actions taken to correct the equipment sound levels, acceleration levels, or both.
- k. Identification of the cause of the failure(s).
- l. Specific recommendations for design modifications or materiel changes which may permit the equipment to meet the criteria.
- m. Estimated time to implement the design modifications described in 3.2.1 above.

End of DI-HFAC-80271A
