

DATA ITEM DESCRIPTION

Title: PROGRAM-UNIQUE MATERIAL OR PROCESS SPECIFICATIONS

Number: DI-MFFP-82119

AMSC Number: N9792

DTIC Applicable: No

Preparing Activity: AS

Applicable Forms: N/A

Approved Date: 20170407

Limitation: N/A

GIDEP Applicable: No

Project Number: MFFP-2017-003

Use/Relationship: This Data Item Description (DID) specifies the content and format for development of a Program-Unique Process or Material Specification.

- a. This DID identifies the format and content preparation instructions for a Performance or Detail Specification resulting from the work task described in 5.2.1.4.2 through 5.2.1.4.2.2 MIL-STD-1587.
- b. Material specifications are used to identify the specific requirements for a raw material, mixtures, or semi-fabricated materials that are used in the fabrication of a product configuration item (CI). Normally, a material specification applies to production, but may be prepared to control the development of a material. A material specification is limited to those specific materials that are unique to the product in which they are used.
- c. Process specifications are used to identify a specific process that is essential to fabrication or procurement of a product or material used in a configuration item (CI). Normally, a process specification applies to production, but may be prepared to control the development of a process. A process specification is limited to those specific processes that are unique to the product or material to which they apply.

This DID supersedes DI-E-3130/C-143 and DI-E-3131/C-144.

Requirements:

1. Reference Documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.
2. Format. A Program-Unique material and process specification in accordance with MIL-STD-961, "Defense and Program-Unique Specifications Format and Content", shall be prepared.
3. Content. The content of the specifications shall be as specified in 5.2.1.4.2 through 5.2.1.4.2.2 of MIL-STD-1587 and shall include all test results.
