10 PREPARATION INSTRUCTIONS 10.1 <u>General</u> . The Packaging Cost Analysis shall delineate data on the projected production cost of the final packaging configuration and materials for end item(s), repair part(s), and replacement part(s); not the costs of developing the packaging design. 10.2 <u>Format</u> . The Packaging Cost Analysis shall be in the contractor's format and the analysis for each end item, each repair part, and each replacement part shall be formatted as a distinct portion of the analysis. The order of presentation shall be the first end item, applicable repair part(s), applicable replacement part(s); second end item, applicable repair part(s), applicable replacement part(s); etc. 10.3 <u>Content</u> . The Packaging Cost Analysis shall delineate the following data: 10.3.1 <u>Title Page</u> . The title page shall include the contractor's name and address; contract number; project number; security classification; and end item, repair part, and replacement part identification including the title of the applicable specification. 10.3.2 <u>Direct Labor Cost</u> . The direct cost of all labor categories (e.g., engineering, tooling, quality control, manufacturing, etc.) directly chargeable to packaging. Identify the assumed direct labor rates used in developing the direct labor costs for each category of direct labor . <p style="text-align: right;">(Continued Page 2)</p>
