

DATA ITEM DESCRIPTION

Title: SYSTEM BASELINE REPORT

Number: DI-PSSS-82260

AMSC Number: N10011

DTIC Applicable: No

Preparing Activity: SH

Applicable Forms: N/A

Approval Date: 20200812

Limitation: N/A

GIDEP Applicable: No

Project Number: PSSS-2019-007

Use/Relationship: The System Baseline Report provides the Government with a complete listing using a discrete numbering system, including an Expanded Ship Work Breakdown Structure (ESWBS)-based Hierarchical Structure Code (HSC), which contains an arrangement where any part of a system, or equipment can be addressed relative to its next higher assembly. The System Baseline Report is used to identify the initial configuration baseline and to monitor the contractor's hardware configuration requirements and allows for continuous updating while in new construction status. It further assists in identifying new provisioning requirements and changes to the configuration.

This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirements as delineated from the work task described in the solicitation.

Requirements:

1. Reference Documents. N/A
2. Format. The System Baseline Report shall be in the Contractor's format.
3. Content. The System Baseline Report shall contain the following:
 - a. Provisioning Document Control Number (PDCN)
 - b. Repairable Identification Code (RIC)
 - c. RIC Nomenclature
 - d. HSC
