

# Integrated Defense Acquisition, Technology, & Logistics Life Cycle Management Framework

This chart is a classroom aid for Defense Acquisition University students. It provides a notional illustration of the interfaces among the three major decision support systems used to develop, produce, and field a system for national defense. Defense acquisition is a complex process with many more activities than shown here, and many concurrent activities that cannot be properly displayed on a two-dimensional chart. Supporting information is on the back of this chart. For more information see the Acquisition, Technology & Logistics Knowledge Sharing System (<http://akks.dau.mil>).
