**MIL-HDBK-265A(NAVY)****STANDARD GENERAL PURPOSE ELECTRONIC TEST EQUIPMENT SUPPORT ITEMS****1. SCOPE**

This handbook identifies standard and substitute standard General Purpose Electronic Test Equipment Support Items (GSI) which have been determined to be suitable for Navy use, and for which the Space and Naval Warfare Systems Command (SPAWAR) exercises material support responsibility by management of item entry. It should be used for guidance purposes in planning and support documents which specify GSI requirements (e.g. prime equipment technical manuals and Operational Logistics Support Summaries).

**2. REFERENCED DOCUMENTS****2.1 Government documents**

**2.1.1 Specifications and standards.** Unless otherwise specified the following specifications and standards of the issue listed in that issue of the Department of Defense Index of Specifications and Standards (DoDISS) specified in the solicitation form a part of this handbook to the extent specified herein.

3. DEFINITIONS

3.1 General purpose electronic test equipment (GPETE). Electronic test equipment capable of generating, modifying, or measuring a range of electronic functions to test two or more systems or equipments of basically different design.

3.2 GPETE support item (GSI). The complement of equipment, supplemental to GPETE, which is necessary to facilitate a complete test measurement capability. This includes GPETE auxiliary items, GPETE accessories, GPETE plug-ins, and GPETE ancillary equipment.

3.2.1 Standard GSI. Support equipment listed herein as preferred for procurement.

3.2.2 Nonstandard GSI. Items of GSI not listed herein as preferred for procurement.

3.2.3 GPETE auxiliary item (GAI). A general purpose component or device used in support of a test measurement setup employing GPETE. (Examples: ratio transformers, portable directional couplers, DC power supplies, and so forth.)

3.2.4 GPETE accessory (GA). An individual support item used to complete or augment the operational capability of a specific item of GPETE or group of GPETE. (Examples: oscilloscope probes, multimeter test probes, noise sources, and so forth.)

3.2.5 GPETE plug-ins (GP-I). A removable assembly intended to complete or augment the operational capability of a specific item of GPETE. (Examples: oscilloscope preamplifier plug-ins, heterodyne frequency extender plug-ins, digital word generator plug-ins, and so forth.)

3.2.6 GPETE ancillary equipment (GAE). A self-contained unit intended to augment the operational capability of a specific item of GPETE or group of GPETE. (Examples: self-contained transfer oscillators, self-contained modulators, self-contained tracking generators, and so forth.)

3.3 GPETE master group (GMG). A code that identifies instrument measurement requirements within a generic family of equipment.

4. GENERAL REQUIREMENTS

4.1 Limitations. This handbook is limited in application to standard and reference GAI only. The other GSI categories (GA, GP-I, and GAE) are considered unique to specific items of GPETE and are not subject to entry management other than that exercised through MIL-STD-1364 procedures.

## MIL-HDBK-265A(NAVY)

**4.2 Selection of GAI.** Contents of this handbook include items of GAI generally found in Navy inventory and newer GAI planned for procurement. Naval activities and contractors initiating requirements for GAI may select standard GSI using one or more of the following appendixes:

- a. Appendix A. Reference Equipment to Standard Equipment. This appendix lists model numbers of GAI generally found in the Navy inventory referenced to the standard GAI preferred for procurement. National Stock Number (NSN) and status information are also provided.
- b. Appendix B. Reference NIIN to Standard Equipment. This appendix lists NSNs (by NIIN) of GAI generally found in the Navy inventory referenced to the standard equipment preferred for procurement. Model number and status information are also provided.
- c. Appendix C. Standard Equipment to Reference Equipment. This appendix lists model numbers of standard GAI referenced to model numbers of GAI generally found in the Navy inventory.
- d. Appendix D. Standard Equipment to Specifications. This appendix lists technical information on all standard GAI.
- e. Appendix E. Noun Name to Standard Equipment. This appendix lists standard GSI for individual noun name groups and can be used to identify standard equipment on the basis of functional requirements. Individual equipment specifications are included.
- f. Appendix F. NAVSEA SCAT Code to Standard Equipments. Certain documents cite the NAVSEA SCAT Code to identify the family group of a particular GAI. This appendix identifies the standard GAI for each NAVSEA SCAT Code.
- g. Appendix G. Federal Supply Code to Manufacturer's Name. This appendix identifies manufacturers associated with the FSCMs used in this publication.
- h. Appendix H. Manufacturer's Name to Federal Supply Code. This appendix identifies FSCMs for manufacturers of GAI listed in this publication.

## 5. DETAILED REQUIREMENTS

**5.1 Guidance for use.** Appendixes A and B provide status and guidance information for items managed as GSI. Users should interpret and apply the notes contained therein as indicated in 5.1.1 and 5.1.2. Models designated UNDER REVIEW have been discontinued and are being reviewed for replacement. No replacements have been identified at the time of printing. Contact NESEA Code 2261 for guidance.

### 5.1.1 Equipment status:

- a. STD. Item is identified as standard GAI.
- b. REPL. Item is replaced for procurement purposes by the standard model cited.
- c. GA. GPETE accessory. GA items are not identified to standards.
- d. 1387. No direct standard replacement available. Submit requirements via MIL-STD-1387 for guidance.

## MIL-HDBK-265A(NAVY)

### 5.1.2 Equipment notes:

- a. Note 1. Reference equipment is classified obsolete.
- b. Note 2. Reference equipment is classified obsolescent.

### 6. NOTES

6.1 Listing inquiries. The Navy need for GAI is a function of the specific test and measurement capabilities required to maintain and repair weapon systems and ancillary subsystems. Accordingly, the listing of standard electronic test instruments in this document was developed on the basis of extensive evaluation and testing in consideration of current and projected GAI requirements. Manufacturers' inquiries relative to products which can lead to significant operational improvements and economy are welcome. Inquiries should be addressed to: Space and Naval Warfare Systems Command, Test and Monitoring Systems Group (TAMS), Washington, DC 20363-5100. Provide full descriptive information, including test data (MIL-T-28800 applies), technical manual, and support availability. Also indicate reason(s) why the product(s) should be listed, with supporting evidence showing known or projected specific Navy measurement requirements. These should be identified to particular weapon systems and, where possible, user activity.

6.1.1 Discontinued items. Certain GAI items listed as standard in the previous issue have been discontinued with no replacement selected at time of publication. The various appendixes note these items as under review. User inquiries may be directed to the Space and Naval Warfare Systems Command address noted in 6.1.

6.2 Environmental classes. Approximate severity of usage capabilities of standard equipment is indicated on the technical information sheets of Appendixes D and E, based upon requirements in MIL-T-28800 where applicable.

6.3 Navy item control numbers (NICNs). When NSNs were not assigned by time of issue, NICNs are shown.

6.4 CHANGES. REVISIONS TO THIS DOCUMENT WILL BE REGULARLY SCHEDULED. INTERIM GUIDANCE TO ADDITIONS AND DELETIONS OF STANDARD GAI IS PROVIDED IN THE GAI STATUS LIST WITH REFERENCE PRICES, ISSUED QUARTERLY BY THE NAVAL ELECTRONIC SYSTEMS ENGINEERING ACTIVITY, ST. INIGOS, MD 20684-0010. DIRECT INQUIRIES TO CODE 2261.

6.4.1 Symbols. Symbols are not used in this revision to identify changes from the previous issue due to the extensiveness of the changes.

MIL-HDBK-265A(NAVY)

6.5 Manufacturer's name and federal supply code. Appendixes G and H cross reference manufacturer's name and federal supply code and are applicable to products as specified in DoD H4-2 referenced herein.

6.6 Subject term (key word) listing.
