

METRIC

NOTE: MIL-STD-1473B(MI) has been redesignated as a handbook, and is to be used for guidance purposes only. This document is not longer to be cited as a requirement. For administrative expediency, the only physical change from MIL-STD-1473(MI) is this cover page. However, this document is no longer to be cited as a requirement. If cited as a requirement, contractors may disregard the requirements of this document and interpret its contents only as guidance.

## MIL-STD-1473B (MI)

### FOREWORD

1. This Military Standard is approved for use by the U.S. Army Missile Command, Department of the Army, and is available for use by all Departments and Agencies of the Department of Defense.

2. Beneficial comments (recommendations, additions, or deletions) and any pertinent data which may be of use in improving this document should be addressed to: Commander, US Army Missile Command, ATTN: AMSMI-RD-SE-TD-ST, Redstone Arsenal, Alabama 35898-5270, by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

3. This standard consolidates into a single document color and marking requirements for different classes of materiel contained in numerous administrative and standardization documents. Consequently, this standard establishes general requirements and serves as a convenient index to commodity and functional requirements for color and marking of Army materiel.

### STANDARD GENERAL REQUIREMENTS FOR COLOR AND MARKING OF ARMY MATERIEL

#### 1. SCOPE

1.1 Purpose - This standard prescribes general requirements for color and marking of Army materiel.

1.2 Scope - This standard prescribes only general color and marking requirements-not finishes, surface preparations, related treatments for preservation and coating, or special requirements specified by Army design activities. This standard is not intended to apply to exterior colors of Army equipment under tactical conditions in active combat theaters of operation where such equipment may be painted Lusterless White No. 37875 in snow areas, or other colors or patterns deemed necessary for camouflage or for compliance with host country requirements.

## MIL-STD-1473B (MI)

## 2. REFERENCED DOCUMENTS

2.1 Government Documents.

2.1.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those listed in the issue of the Department of Defense Index of Specifications and Standards (DODISS) and supplement thereto, cited in the solicitation (see 6.2).

### 4. GENERAL REQUIREMENTS

#### 4.1 Colors

4.1.1 Numerical Designation - The numerical designations of colors herein refer to FED-STD-595 and the colors so designated shall conform to that standard.

4.1.2 Controls and Displays - Except where specified to the contrary herein, color coding of controls and displays shall be in accordance with MIL-STD-1472.

4.1.3 Off-the-Shelf Equipment - Repainting of off-the-shelf equipment, subject by law to competitive procurement, will not be required in order to meet the criteria herein. However, a criterion for selecting off-the-shelf commercial or Government equipment shall be the degree to which the equipment conforms to this standard. Where off-the-shelf equipment requires modification in order to interface with other equipment, the modification, if it affects painted surfaces, shall comply with the criteria herein.

#### 4.2 Marking

4.2.1 Identification, General - Identification marking of all items of Army materiel shall conform to MIL-STD-130, as applicable.

4.2.2 Shipment and Storage - Army materiel shall be marked for shipment and storage in accordance with MIL-STD-129, as applicable. The labeling of lifting and tiedown points shall conform to MIL-STD-1472.

4.2.3 Controls and Displays - Controls, displays, and other items of equipment that must be located, identified, read or manipulated, shall be labeled to permit rapid and accurate human performance; however, labels are not required on equipment or controls where use is obvious to the user (e.g., functional label on aircraft control stick).

4.2.4 Labeling, Lettering, and Numeral Design - Where not specified to the contrary herein, labeling, lettering, and numeral design shall conform, as applicable, to the requirements of MIL-STD-1472.

4.3 Supplementary Data and Color/Marking for Specific Items - See Appendix.

4.4 Bar Coding - Bar coding of unit packs, outer containers and selected documents shall conform to MIL-STD-1189.

## MIL-STD-1473B (MI)

### 5. DETAIL REQUIREMENTS

#### 5.1 Vehicles, Construction Equipment, and Materials Handling Equipment

5.1.1 Color - Applicable exterior and interior surfaces of vehicles, construction equipment, and materials handling equipment shall be painted Lusterless Forest Green No. 34083, except as indicated in Table I. Colors applicable to personnel stepping areas do not preclude use of grit or similar antislip material. If commercial vehicles are to be used in tactical situations, the interior of the vehicle cab should be a dark color (i.e., brown, black, or dark green) .

#### 5.1.2 Marking.

5.1.2.1 Nontactical Wheeled Vehicles - Nontactical wheeled vehicles shall be marked as specified in MIL-STD-1223. (Also see 4.3)

5.1.2.2 Combat and Tactical Vehicles - Combat and tactical vehicles shall be marked as specified in MIL-STD-642. Tactical bulk fuel transporters and fuel servicing vehicles shall have required safety exterior markings per Department of transportation (DOT) regulations governing the transportation of hazardous materials in tank motor vehicles. (Also see 4.3)

## MIL-STD-1473B (MI)

TABLE I. Standard color for applicable exterior and interior surfaces of vehicles, construction equipment, and materials handling equipment (continued)

VEHICLES, EQUIPMENT, SURFACE	COLOR	FED-STD-595
MOBILE ELECTRONIC/COMMUNICATION EQUIPMENT ENCLOSURES	See Table II	
FACILITIES ENGINEERING VEHICLES NOT ASSIGNED TO TACTICAL UNITS (Including attachments used for highway construction or maintenance)		
Exterior and Interior Surfaces	Gloss Yellow	13538
RESEARCH AND DEVELOPMENT TEST PROJECT VEHICLES		
Exterior and Interior Surfaces	As specified by the procuring activity	
VAN TYPE VEHICLES	See Table II	

5.1.2.3 Construction Equipment and Material Handling Equipment - Also see 4.3.

5.1.2.4 Other - Vehicles such as military design ambulances shall be marked as specified in MIL-STD-642. (Also see 4.3)

5.1.2.5 Pictorial Symbols - Symbols to be shown on military vehicle instruction plates in addition to the text shall conform to MIL-STD-1271. (Also see 4.3)

5.2 Vessels - See Appendix.

5.3 Railroad Equipment

## MIL-STD-1473B (MI)

5.3.1 Color - Railroad equipment shall be painted as follows:

- |    |   |                             |
|----|---|-----------------------------|
| a. | Railway motive power and work equipment                         | Semi-Gloss Black No. 27038  |
| b. | Gondola, hopper and tank cars                                   | Gloss Black No. 17038       |
| c. | Hospital, kitchen car, passenger, freight and caboose exteriors | Gloss Olive Green No. 14064 |

5.3.2 Marking

5.3.2.1 Agency Identification - The agency identification "US ARMY" shall be applied on both sides of all railroad equipment in Gloss White No. 17875; however, in theaters of operation, it will not be applied to freight cars or cabooses.

5.3.2.2 Identification Numbers

5.3.2.2.1 Location - Identification numbers, prescribed by the procuring activity, shall be marked on both sides and on each end of all locomotives, locomotive tender units, work equipment, and rolling stock.

5.3.2.2.2 Prefix - On rolling stock, car numbers shall be prefixed with the letters "USA" immediately to the left of or above the car number. In the continental United States, freight and caboose cars acceptable for interchange or commercial railroads will use the prefix "USAX" in lieu of the above where specifically authorized by the procuring activity. In such cases, the identification number and "USAX" prefix shall also be marked on the ends of the trucks of those cars.

5.3.2.2.3 Color - Identification numbers and prefixes shall be applied in Gloss White No. 17875.

5.3.2.3 Other Marking

5.3.2.3.1 Capacities, Limits, Weights, Insignia, Classifications, Etc.

5.3.2.3.1.1 Railway Motive Power and Work Equipment - Markings shall conform to MIL-P-53044.

5.3.2.3.1.2 Rolling Stock - Markings shall conform to MIL-P-53044, as applicable.

5.3.2.3.1.3 Cars for Passenger Service - Markings shall conform to MIL-P-3807.

## MIL-STD-1473B (MI)

5.3.2.3.2 Safety - Caution marking on railroad equipment shall be applied only for use within the continental United States as follows:

a. A stripe in Gloss Yellow No. 13538 or reflective yellow adhesive backed marker conforming to Federal Specification L-S-300, color j, shall be marked across each side and across each end of all locomotive and locomotive tender units. Location and width shall be as directed by the procuring activity.

b. Access steps to locomotives and locomotive tenders shall be painted Gloss Yellow No. 13538.

5.3.2.4 Army Medical Department

5.3.2.4.1 Color - Army Medical Department Markings shall be applied in Gloss Red No. 11136 and Gloss White No. 17875.

5.3.2.4.2 Identification - The words "ARMY MEDICAL DEPARTMENT" and type of car shall be marked on both sides of Army Medical Department cars near the center of the car. The type of car shall also be marked in white on the end doors of each car in conjunction with the identification number of the car.

5.3.2.4.3 Red Cross Insignia - Red cross insignia shall be applied on both sides and on the roof of all kitchen, baggage, ambulance ward, and personnel cars assigned to the Army Medical Department. Red cross insignia, applied to the sides of the cars, shall be located near each end of the car. The use of decals is authorized for Army Medical Department requirements provided the decals meet the requirements of the color code.

5.3.2.4.4 Insignia - The Army Medical Department insignia, consisting of a red caduceus on a circular white field, shall be applied on both sides of Army Medical Department cars near the center of the car. These insignia shall be placed on each side of or adjacent to the words "ARMY MEDICAL DEPARTMENT" and type of car, marked in accordance with 5.3.2.4.2. The Army Medical Department insignia (caduceus) shall conform to drawing 11644801 which is available through supply channels as FSN 7690-00-790-2407.

5.4 Towed Artillery, Multiple Rocket Launchers, Missiles, Rockets, and Related Ground Support Equipment for Missile Systems.

5.4.1 Towed Artillery and Multiple Rocket Launchers

5.4.1.1 Color - Exterior painted surfaces of towed artillery and multiple rocket launchers shall be Lusterless Forest Green No. 34083. (Also see 4.3.)

## MIL-STD-1473B (M1)

5.4.1.2 Marking - The agency identification "US ARMY" shall be conspicuously marked on both sides of towed artillery and multiple rocket launchers in Lusterless Black No. 37038. This marking shall be applied to the most suitable surfaces, such as side shields, outriggers, trails, drawbars, counter-recoil cylinders, recuperator cylinders, gun tubes, etc., as approved by the procuring activity.

5.4.2 Guided Missiles and Rockets

5.4.2.1 Color - Unless otherwise specified by the procuring activity, exterior painted surfaces of missiles and rockets shall be Lusterless Forest Green No. 34083. Applicable color coding shall conform to MIL-STD-709. (Also see 4.3.)

5.4.2.2 Marking

a. The agency identification "US ARMY" shall be marked on all missiles and rockets except those shipped to foreign countries under the Military Assistance Program and those less than 180 mm (7 inches) in diameter.

b. The agency identification "US ARMY" shall be conspicuously marked on at least two sides of the missile or rocket. Unless otherwise specified by the procuring activity, the identification shall be along the longitudinal axis so that when the missile is in the horizontal position, the letters will be vertical.

c. The above markings shall be applied in Lusterless Black No. 37038 unless otherwise specified by the procuring activity.

d. Other identification and marking of missiles and missile components shall conform to MIL-M-8555 or shall be as specified by the procuring activity. (Also see 4.3.)

5.4.3 Ground Support Equipment

5.4.3.1 Color - Ground support equipment shall be painted as follows:

5.4.3.1.1 Exteriors - Exterior painted surfaces of ground support equipment for missile systems shall be Lusterless Forest Green No. 34083. (Also see Table II.)

5.4.3.1.2 Interiors - The interior colors of missile system vans or van type vehicles, occupied by personnel during operation, maintenance or control, shall conform to Table II.

5.4.3.2 Marking - Marking of ground support equipment shall conform to Table II.

## MIL-STD-1473B (MI)

### 5.4.4 Other Items

5.4.4.1 Liquid Propellant Containers - Portable or transportable containers of liquid propellants, including any box or other package for such containers, shall be color coded in accordance with MIL-STD-172.

## MIL-STD-1473B (MI)

TABLE II. Surface and marking colors for electronic/ communication shelter and van type vehicles occupied by personnel during operation, maintenance or control

AREA	COLORS	FED-STD-595
Walls, ceilings, doors (except below and fittings, except acoustical tile)	Semi-Gloss Green	24410 or 24533*
Ceilings and Walls (where greater brightness is required for work performed)	Semi-Gloss White	27875
Inside of doors which open outward	Exterior match	
<b>FLOORS</b>		
Linoleum covered	As specified by procuring activity	
Not linoleum covered	Lusterless Gray Color including grit when grit is specified for a particular area	36118
Cabinet/Console exteriors	Semi-Gloss Green	24410
Control/Display Panels		26492
Interior and exterior (covered)	Semi-Gloss Gray	
Exterior (no cover)	Exterior match	
Controls	Gloss Black or Semi-Gloss Gray	17038 26231
<b>Panel labeling</b>		
Interior and exterior (covered) panels	Semi-Gloss Black	27038
Exterior (no cover) panels	Lusterless Black Lusterless White	37038* 37875*
Interior surfaces of other containers, cabinets, or shelter, if painting is required	Gloss White	17875

\* As specified by the procuring activity.

## MIL-STD-1473B (MI)

5.4.4.2 Pipe, Hose, and Tube Lines - The function, content direction of flow, and any hazard of pipe, hose, and tube lines used in missile systems and systems-peculiar equipment that is required exclusively for test, maintenance, servicing or operation as an integral part of the functional system, shall be color coded (and marked) in accordance with MIL-STD-1247. All lines external to these systems shall be color coded in accordance with MIL-STD-101.

5.4.4.3 Training Aids - Color coding primarily for graphic and demonstrator-type training aids utilized in operational and maintenance guided missile training shall be in accordance with MIL-STD-709.

5.4.4.4 Other - Items of other categories utilized in missile systems shall be marked in accordance with applicable requirements herein.

5.4.4.5 War Reserve and Training Nuclear Weapons and Containers - Required markings for these items are contained in appropriate Joint Atomic Weapons publications.

## 5.5 Electrical and Electronic Equipment and Items.

### 5.5.1 Communications-Electronic Shelters

5.5.1.1 Color - Communications-electronic shelters shall be painted as follows:

5.5.1.1.1 Exteriors - Exterior painted surfaces shall be Lusterless Forest Green No. 34083 solar heat reflecting paint produced in accordance with MIL-C-46168, MIL-C53039, or MIL-E-52835. (Also see Table II.)

5.5.1.1.2 Interiors - Interior colors of mobile communication-electronic equipment enclosures, occupied by personnel during operation, maintenance, or control, shall conform to Table II.

5.5.1.2 Marking - Marking shall conform to Table II and other applicable requirements of this standard.

### 5.5.2 Cables

5.5.2.1 Electrical Cable and Cord - Color coding and identification marking of electrical cable and cord shall conform to MIL-STD-686.

5.5.2.2 Cable for Transmission of Telephone, Telegraph, and Teletype Signals - Color coding and marking of cables for transmission of telephone, telegraph, and teletype signals (including singles, pairs, multiples and quads used in other applications

**MIL-STD-1473B (MI)**

such as intercommunication, loudspeaker and microphone cables) shall be in accordance with MIL-STD-685.

5.5.2.3 Vehicular Use - Color and marking of high-tension and low-tension cables for vehicular use shall conform to MIL-C-3702 and MIL-C-13486, respectively.

5.5.2.4 Thermocouples - Color and identification coding for all single and duplex thermocouple wires and all thermocouple extension wires shall conform to MIL-STD-687.

5.5.3 Electronic Items - Marking of electronic items, except marking for shipment and as otherwise specified by an applicable Government document covering the item on which the marking appears, shall conform to MIL-M-13231.

5.5.4 Electronic Parts - Electronic parts shall be color coded in accordance with MIL-STD-1285.

5.5.5 Warning Markings

5.5.5.1 Electronic Equipment - Warning labels, signs and markings on electronic equipment shall be in accordance with MIL-STD-454, Req. 1. Size and format shall conform to Figures 1 and 2 herein.

5.5.5.2 Radio Frequency Hazard - The Radio Frequency Radiation Hazard Warning Symbol shall be in accordance with ANSI C95.2.

5.5.5.3 Laser Hazard - Permanently affixed labels shall be in accordance with ANSI Z136.1.

5.5.5.4 Safety - See Paragraph 5.9.

5.5.5.5 Tactical Lasers - Tactical lasers may be exempted from Food and Drug Administration requirements provided the lasers are clearly identified by the label shown below.

**CAUTION**

THIS ELECTRONIC PRODUCT HAS BEEN EXEMPTED FROM FDA RADIATION SAFETY PERFORMANCE STANDARDS PRESCRIBED IN THE CODE OF FEDERAL REGULATIONS, TITLE 21, CHAPTER I, 76EL-01DOD ISSUED ON 26 JULY 1976. THIS PRODUCT SHOULD NOT BE USED WITHOUT ADEQUATE PROTECTIVE DEVICES OR PROCEDURES.

5.5.6 Test Equipment

## MIL-STD-1473B (MI)

5.5.6.1 Bench Use - Test equipment for bench use shall be Semi-Gloss Gray No. 26307.

5.5.6.2 Field Equipment - Test equipment for field testing shall be Lusterless Forest Green No. 34083.

5.5.6.3 Flight Line Equipment - Test equipment for flight line use shall be Gloss Yellow No. 13538.

5.5.7 Hookup Wire - Identification coding of hookup wire shall conform to MIL-STD-681.

5.5.8 Connections - Connections for electric assemblies shall be marked in accordance with MIL-STD-195.

5.5.9 Reference Designation - Electrical and electronic reference designations shall conform to IEEE 200-75.

5.5.10 Communications Equipment - Communications equipment installed at fixed facilities, such as radio station equipment, telephone central office sets, etc., shall be painted Lusterless Forest Green No. 34083 or Lusterless Gray No. 36118. Tactical communications equipment shall be painted Lusterless Forest Green No. 34083.

### 5.6 Aircraft

5.6.1 General - General color and marking of Army aircraft shall be as specified by the procuring activity. Marking of aircraft shall be designed to minimize the hazards to troops, maintenance personnel, and crew from rotating shafts, rotors, hoists, and suspension systems, downwash, electrical shock, and other unsafe conditions. (Also see 4.3.)

#### 5.6.2 Aircrew Stations

5.6.2.1 Displays - Design and configuration of marking for aircrew station displays shall conform to MIL-M-18012, MIL-STD-411, and MIL-STD-783

5.6.2.2 Instrument and Range Markings - Instruments shall be marked in accordance with MIL-M-18012. (Also see 4.3.)

5.6.2.3 Cockpit Area Equipment - All surfaces in the cockpit area, except emergency equipment, shall be Lusterless Black No. 37038.

5.6.2.4 Emergency Equipment - Emergency equipment, when required, shall be Semi-Gloss Yellow No. 23538 or Lusterless Yellow No. 33538 as specified in the

## MIL-STD-1473B (MI)

detail equipment or installation detail specification. Emergency controls shall be marked in accordance with MIL-M-18012.

### 5.6.3 Avionics Equipment

5.6.3.1 Externally Mounted - Externally mounted equipment shall be Lusterless Forest Green No. 34083.

5.6.3.2 Internally Mounted - Internally mounted equipment cases and panels, except those in the cockpit area, shall be Lusterless Forest Green No. 34083 or Semi-Gloss Gray No. 26152 as specified in the detailed equipment or installation specification.

5.6.4 Hose Pine and Tube Lines - Colors and marking for identifying applicable functions, subsidiary functions, pressure, hazards, and direction of flow of pipe, hose, and tube lines used in aircraft and support equipment required for test, maintenance servicing or operation as an integral part of the function system shall conform to MIL-STD-1247.

### 5.7 Ammunition, Chemical and Radiological Items

5.7.1 Ammunition - Conventional and chemical ammunition shall be painted in accordance with MIL-STD-709. Marking shall be as specified by the procuring activity.

5.7.2 Chemical Warfare Equipment - Chemical warfare equipment shall be painted Lusterless Forest Green No. 34083 except that such equipment mounted on vehicles shall be painted the same color as the vehicle.

5.7.3 Contaminated Areas - The design and color of signs for contaminated areas shall be in accordance with MIL-STD-450. This does not apply to marking or shipping of material.

5.7.4 Nuclear Reactor Systems - Valves, fittings, flanges, and unions used in nuclear reactor systems shall be marked in accordance with FED-STD-186.

5.8 Other Items - The standard color for exterior painted surfaces of other items of Army materiel intended for field use and not otherwise specified herein shall be Lusterless Forest Green No. 34083 unless otherwise directed by the procuring activity.

5.8.1 Antenna Radomes - If painting is necessary, antenna radomes shall be Lusterless Forest Green No. 34083 or Lusterless White No. 37875.

## MIL-STD-1473B (MI)

5.8.2 Antenna Towers - Antenna towers for use under non-tactical conditions shall be painted in alternating bands of Gloss Orange No. 12197 and Gloss White No. 17875, with the band at each end colored orange. These bands should be of equal width, each band being approximately one-seventh the height of the tower, provided that each band shall have a width of not more than 12 m (40 feet) nor less than 450 mm (1.5 feet).

5.8.3 Armed Forces Radio and Television Network Equipment - Armed Forces Radio and television network equipment shall be painted Lusterless Forest Green No. 34083 or Lusterless Gray No. 36118.

5.8.4 Automatic Data Processing Equipment - Automatic Data Processing equipment shall be painted Lusterless Forest Green No. 34083 or Lusterless Gray No. 36118.

5.8.5 Bridging Equipment - Applicable exterior surfaces of bridging equipment shall be painted Lusterless Forest Green No. 34083 except as specified by the procuring activity. Stenciling and identification marking shall be Lusterless Black No. 37038. Bridging equipment covered by treaty agreements shall be finished in accordance with such color schemes of those agreements as specified by the procuring activity.

5.8.6 Fire Control Materiel - Colors used for identification of water, fuel and oil caps, filler and drain plugs, and lubricating points of fire control materiel shall be in accordance with MIL-STD-194. Purging ports shall be color coded Gloss Gray No. 16187 and escape ports shall be color coded Gloss Yellow No. 13538 on fire control optical instruments normally charged with nitrogen.

5.8.7 Ground Controlled Approach (GCA) Radar Equipment - GCA radar equipment for use at Army airfields shall be painted as follows:

- a. Tactical use      Lusterless Forest Green No. 34083 (including waveguide and antenna reflectors). Reflectors may be painted a non-conductive Lusterless Forest Green, No. 34083.
- b. CONUS use      Per FAA Technical Standard Order TSO N26.

5.8.8 Machine Tools - Machine tools and associated shop equipment shall be painted Gloss Gray No. 16187, except as follows:

- a. At fixed facilities, such equipment may be painted Semi-Gloss Green No. 24272.
- b. Emergency stopping switches and bars on such equipment shall be painted Gloss Red No. 11105 or 11136.

## MIL-STD-1473B (MI)

5.8.9 Meteorological Equipment - Meteorological equipment shall be painted Lusterless Forest Green No. 34083.

5.8.10 Nylon Webbing - Manufacturers' identification color coding of nylon webbing manufactured under MIL-W-4088 shall conform to MIL-STD-1480.

5.8.11 Petroleum and Related Products - Marking of petroleum and related products shall conform to MIL-STD-290. With the exception of aircraft, vessels, power plants and heating systems, and where camouflage or concealment is not required, color and marking for identification of liquid petroleum products and hydrocarbon missile fuels stored in and dispensed from Government owned or operated bulk facilities shall be in accordance with MIL-STD-161.

5.8.12 Photographic and Audio-Visual Equipment - Photographic and audio-visual equipment shall be painted Lusterless Forest Green No. 34083 or Lusterless Black No. 37038 as appropriate.

5.8.13 Pipelines and Compressed Gas Cylinders - Pipeline and compressed-gas cylinders shall be color coded as specified by MIL-STD-101.

5.8.14 Rubber Products - If color or identification markings are used on rubber products, they shall conform to MIL-STD-190.

5.8.15 Reusable Shipping Transporters - Reusable shipping transporters (CONEX containers,) shall be painted as follows:

- |  |                                   |
|--|-----------------------------------|
| a. Type I and type II containers               | Lusterless Forest Green No. 34083 |
| b. Type II CH (controlled humidity) containers | Gloss Aluminum No. 17178          |

5.8.16 Small Arms - Marking for small arms weapons (including those used in aircraft armament subsystems) shall conform to MIL-W-13855.

5.8.17 Training Devices - Color and marking of training devices shall be in accordance with MIL-T-23991, as applicable.

5.8.18 Amphibious Craft - Color and marking of Army amphibious craft shall be as specified by the procuring activity.

## 5.9 Safety Color Markings and Signs

5.9.1 Safety Color Markings - Safety colors shall conform to Table III and to other requirements specified by the procuring activity. (Also see 4.3.)

## MIL-STD-1473B (MI)

**5.9.2 Safety Sign Color and Marking** - Danger, caution, safety notice, instruction, and directional signs and plates shall be accordance with NEMA Z535.1 and NEMA Z535.2 except as specified below, and shall conform to other requirements specified by the procuring activity. (Also see 4.3.)

**5.9.2.1 Danger Signs** - Danger signs, used only where an immediate hazard capable of producing irreversible damage or injury exists, shall conform to Figure 1.

**5.9.2.2 Caution Signs** - Caution signs, used only to warn against potential hazards or to caution against unsafe practices, shall conform to Figure 2.

**5.9.2.3 Safety Instruction Signs** - Safety instruction signs, used to provide general safety instructions and suggestions, shall conform to Figure 3.

**5.9.2.4 Directional Signs** - Directional signs, where required to indicate the way to locations, shall conform to Figure 4.

TABLE III Safety Colors

FED-STD-595 COLORS FOR IDENTIFICATION OF EXAMPLES

Red 11105, 11136, 21105	Fire protection equipment and apparatus	Fire alarm boxes, firehose locations, fire reporting telephone stations, fire extinguishers (unless painting unnecessary)
	Danger	High voltage; no smoking, matches, open light; keep out
	Stop	Stop buttons for emergency stopping of machinery, emergency stop bars on hazardous machines
Yellow 13538, 13655, 23655	Caution	Handrails, guardrails, top and bottom treads of stairways, containers of hazardous chemicals, waste containers for highly combustible materials
	Physical hazards	Hook blocks on cranes, coverings and guards for guy wires; corner markers for storage piles; exposed and unguarded edges of platforms, pits, walls, and obstructions
Green 14260, 24260	Safety equipment	Location of first aid equipment, stretchers, personnel deluge showers, protective masks, safety starting buttons
Black 17038, 27038, 37038	Housekeeping and traffic markings	Location and width of aiseways, deadends of aisles or passageways, location for refuse cans, white corners for rooms or passageways
White 17875, 27875, 37875		

(Continued)

TABLE III. Safety Colors (Continued)

FED-STD-595 COLORS      FOR IDENTIFICATION OF      EXAMPLES

Blue 15102, 25102	Exterior of switch boxes and electrical controls which are the starting point or source for hazardous machinery or equipment	
Orange 12246, 22246, 32246	Dangerous parts of machines or energized equipment	Items which may cut, crush, shock or injure
Purple (Magenta) 17142, 27142	Radiation hazards (Ionizing)	(ANSI N2.1 and Z535)

## 6. NOTES

(This section contains helpful information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. The purpose of this standard is to establish general requirements for color and marking of Army materiel, to provide such requirements otherwise only contained in selected administrative (Non DODISS) publications, and provide a convenient index to commodity and functional requirements for such requirements. The standard is intended for use during acquisition, and not as a basis for repainting fielded materiel.

6.2 Issue of DODISS. When this standard is used in acquisition, the applicable issue of the DODISS must be cited in the solicitation (see 2.1.1 and 20.1.2).

6.3 Subject term (key word) listing.

Color  
Marking  
Army  
Interiors  
Exteriors

6.4 Changes from previous issue. Marginal notations are not used in this revision to identify changes with respect to the previous issue due to the extensiveness of the changes.
