PERFORMANCE SPECIFICATION SHEET SWITCHES, PUSH, 10 AMPERES OR LOW LEVEL, DUSTTIGHT

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The complete requirements for acquiring the switches described herein shall consist of this specification and the latest issue of MIL-PRF-8805.

NOTES:

1. Dimensions are in inches.
2. Unless otherwise stated, tolerance is ± 0.010 (0.25 mm).
3. Mounting thread .625-24 UNEF-2A applies to type C, F, G, and H. All threads to be within .10 (2.54 mm) of shoulder.
4. All terminal threads are .086-56UNC-28.
5. Hardware for each terminal includes one screw, one terminal lug, and one lockwasher.
6. Types C, F, G, and H shall be furnished with suitable mounting hardware.
7. Overall height of switch with push-pull activator is 1.530 (38.66 mm) maximum in extended position.
8. Metric equivalents are given for general information only.
9. For push-pull configuration, circuit schematic is shown with actuator in extended position.

MIL-PRF-8805/3L

REQUIREMENTS:

Dimensions and configuration: See figure 1.

Enclosure design: 2 (dust-tight).

Temperature characteristic: 1 (-55°C to +85°C).

Shock type: H for monetary type only (no contact opening or closing in excess of 20 milliseconds).
M for other units.

Sinusoidal vibration grade: 2 (10 to 2,000 Hz).

Weight: .050 pound maximum.

Solderability: Applicable to screw tabs and solder lugs.

Operating characteristics:

Total plunger travel: $.085 \pm .015$ inch.

Operating force:

 Momentary: 4 ± 1 pounds.

 Push-pull: 0.5 to 2 pounds.

Releasing force: 1 pound minimum, monetary.

Terminal strength torque test: Not applicable.

Strength of actuator and stop: 75 pounds for 3 terminals circuitry; 40 pounds for all others.

Finish: The switch case shall be corrosion resistant , lusterless black.

Dielectric withstanding voltage:

 Sea level: 1,000 V rms.

 After electrical endurance: 200 V rms.

Intermediate current: 1/

 MS25089-1, MS25089-2, and MS25089-3: 200,000 cycles.

 MS25089-4 and MS25089-5: 50, 000 cycles.

1/ Prior to test, units preconditioned at 85°C for 48 hours.

MIL-PRF-8805/3L

Mechanical endurance (10 to 15 cpm):

MS25089-1, MS25089-2, and MS25089-3:

At room temperature: 200,000 cycles.

At -55°C and +85°C: 100,000 cycles each.

MS25089-4 and MS25089-5: 50,000 cycles.

Electrical endurance: 25,000 cycles at sea level; 5,000 cycles at 50,000 feet.

Electrical ratings:

Central terminal ratings: 3 amperes maximum.

Other than center terminals: See table I.

TABLE I. Electrical ratings, power circuit switches. ^{1/}

Load	Sea level		50,000 feet
	28 V dc	115/V ac, 60/400 Hz	28 V dc
	Amperes	Amperes	Amperes
Resistive-----	10	10	---
Inductive-----	5	5	5
Lamp-----	3	3	---

^{1/} Center terminal rating: 3 amperes maximum.

^{2/} The 400 Hz ratings are shown for information only and do not require electrical endurance testing.

Sand and dust: Applicable.

Electrical logic circuit (5.0 V dc, .010 ampere): Applicable when specified (see table II): 25,000 cycles at an actuation rate of 120 cycles per minute maximum with no "stick", or "misses", allowed when tested in accordance with EIA RS448, method 17 as follows:

Test condition:

Each switch contact shall be tested using a 5.0 ±0.5 V dc, 10 ±1 mA resistive load. During each closure of the contacts, the voltage drop across the switch terminals shall be monitored for a duration of no less than 50 percent of each contact static closure. The switch contacts need not be monitored until 10 milliseconds after the initial contact closure to exclude any contact bounce. During each opening of the contacts, the voltage drop across the switch terminals shall be monitored for a duration of no less than 50 percent of each contact opening.

A voltage of 2.1 volts or greater across the switch terminals shall constitute a contact "miss" (failure to properly close the circuit). A voltage drop of less than 90 percent of the open-circuit voltage shall constitute a contact "stick" (failure to properly open the circuit).

The monitoring device shall either record the number of contact closures at which "sticks" and/or "misses" occur, or discontinue the test when "sticks" and/or "misses" occur.

Operating temperature:

- 25 percent of the test cycle at -55°C specified.
- 25 percent of the test cycle at room ambient conditions.
- 50 percent of the test cycle at +85°C.

MIL-PRF-8805/3L

Qualification:

Group submission: See table III.

Group A inspection: When low level circuit applies, switches shall not be subjected to loads greater than 100 milliamperes at an open circuit voltage of 6 volts maximum dc or peak ac.

Part number: See table II.

1/ Low level circuit and electronic logic circuit does not apply for dash numbers shown. To specify switches with low circuit and electronic logic circuit applicable, add the letter "L" to the dash number.

MIL-PRF-8805/3L

Examples of part numbers:

MS25089-4C = Switch, Push, Dusttight, 3 Terminal (NO), Type C, Momentary, Black Button.

MS25089-4CR-1 = Switch, Push, Dusttight, 3 Terminal (NO), Type C, Push-Pull, Red Button.

MS25089-4CL = As above, except low level circuit and electronic logic circuit applies. Power circuit electrical ratings do not apply.

MS25089-4CR-1L = As above, except low level circuit and electronic logic circuit applies. Power circuit electrical ratings do not apply.

TABLE III. Qualification inspection.

Examination or test	Basic switch	Other switch samples	Extent of approval	
Qualification <u>1/</u> inspection table of MIL-PRF-8805	Required sample units of any 2 circuit configurations <u>2/</u>	Required number of sample units of 3 terminal NO or 3 terminal NC (groups VII and x tests, qualification inspection table, MIL-PRF-8805 plus 2 additional sample units shall be subjected to electronic logic circuit test and operating characteristics) <u>2/</u>	All	In addition, 2 sample units of each of the other configurations shown on this specification sheet shall be submitted. Visual and mechanical examination.

1/ Electrical endurance tests shall be performed at 28 V dc and 115 V ac, 60 Hz only.

2/ One-half of sample units shall be momentary and one-half shall be push-pull.
