

INCH-POUND

MIL-A-29521(EC)  
 AMENDMENT 2  
 18 January 1989  
 SUPERSIDING  
 AMENDMENT 1  
 14 November 1988

MILITARY SPECIFICATION  
 ANTENNA GROUP, AN/BRA-34(V), AN/BRA-34A(V), AN/BRA-34B(V)

This amendment forms a part of Military Specification MIL-A-29521(EC), dated 25 April 1988, and is approved for use within the Space and Naval Warfare Systems Command, Department of the Navy, and is available for use by all Department and Agencies of the Department of Defense.

2.3 Order of precedence. In the event of a conflict between the text of this specification and the references cited herein (except for associated detail specifications, specification sheets, or MS standards), the text of this specification shall take precedence. Nothing in this specification, however, shall supersede applicable laws and regulations unless a specific exemption has been obtained.

### 3. REQUIREMENTS

3.1 General. The antenna group shall conform to the requirements of MIL-E-16400G to the extent specified herein. The AN/BRA-34(V), AN/BRA-34A(V), and AN/BRA-34B(V) are multifunction antenna groups that provide signals to communication and navigation systems and support very low frequency (VLF), low frequency (LF), medium frequency (MF), high frequency (HF), ultra high frequency (UHF) line-of-sight (LOS), Navy navigation satellite (NAVSAT), UHF satellite communications (SATCOM), identification, friend or foe (IFF), and global positioning system (GPS) (AN/BRA-34(V)2, AN/BRA-34A(V)2, and AN/BRA-34B(V)2 configurations only) submarine communications and navigation requirements. The antenna group shall consist of an antenna control unit in the radio room and an interconnecting junction box, a hull-penetration (see 6.4.5) connector for electrical connections, a special purpose electrical cable, and a mast antenna. There are six configurations of the antenna group: AN/BRA-34(V)1, AN/BRA-34A(V)1, AN/BRA-34B(V)1, AN/BRA-34(V)2, AN/BRA-34A(V)2, and AN/BRA-34B(V)2. Incorporation of software, firmware, or microprocessors in the antenna group shall not be permitted.

3.1.1 First article. When specified in the contract or purchase order, a sample shall be subjected to first article inspection (see 4.3 and 6.3).

3.1.2 Antenna group description. The antenna group shall consist of the equipment shown in FIGURE 1. The antenna group relationship of units shown in FIGURE 2 is typical and is provided for reference only. Antenna group drawings, NAVSEA microfilm reel 28617A and reel 28617B, and NUSC drawing (DWG) 03428001 shall be used for general guidance, unless specifically referenced.

3.2 Details of units or parts. Detailed requirements shall be as specified in 3.2.1 through 3.2.8.
