

**INCH-POUND**

MIL-C-24714/1(SH)

27 January 1989

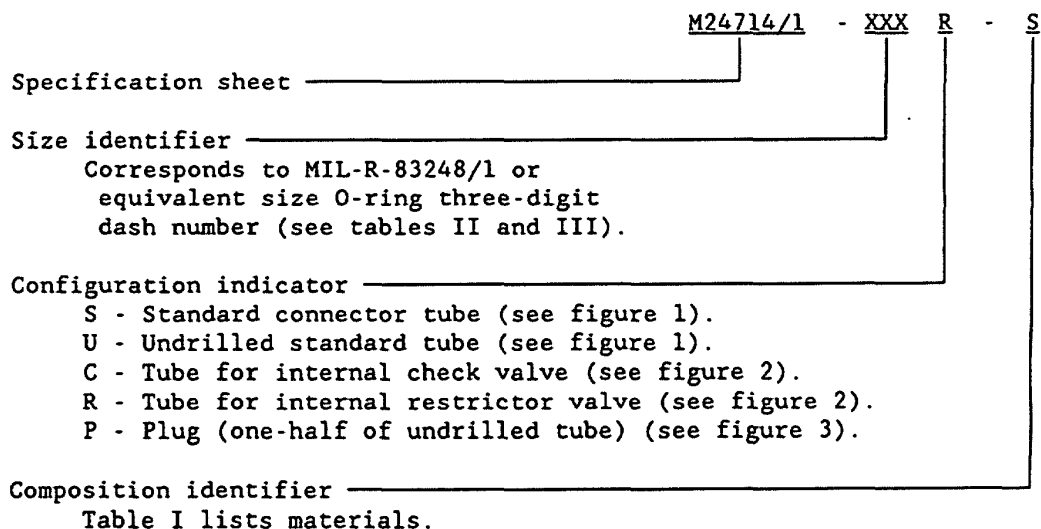

**MILITARY SPECIFICATION SHEET****CONNECTOR TUBES, PREFERRED SIZES,  
VALVES AND SUBPLATES**

This specification is approved for use by the Naval Sea Systems Command, Department of the Navy, and is available for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and the issue of the following specification listed in that issue of the Department of Defense Index of Specifications and Standards (DoDISS) specified in the solicitation: MIL-C-24714.

Military part number:

Part numbers under this specification shall be formulated as follows:

Examples:

M24714/1-013R-A - This connector tube is configured to take a 0.1880-inch diameter restrictor and use size 013 dash number O-rings. This material is aluminum alloy.

M24714/1-124S-T - This is a standard connector tube configured to use size 124 dash number O-rings. The material is titanium alloy.

AMSC N/A

FSC 4810

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

## MIL-C-24714/1(SH)

TABLE I. Composition identifiers.

Code letter	Material <u>1/</u>
S	CRES, class 304 <u>2/</u>
A	Aluminum alloy, 6061
T	Titanium alloy, AB-1

- 1/ Materials shall be in accordance with MIL-C-24714.
- 2/ Other corrosion-resisting steel having at least equivalent strength and corrosion resistance may be used when specifically approved by the contracting activity.

## REQUIREMENTS:

The connector tubes shall be in accordance with figures 1 through 4 and tables II through IV.

Preparing activity:  
Navy - SH  
(Project 4810-N068-01)

## MIL-C-24714/1(SH)

O-ring glands shall be per MIL-G-5514 for one backup ring. Surface roughness height rating of O-ring gland surface to be 63(max) IAW USASI B46.1.

NOTES: See table II for dimensions.  
All dimensions in inches.
