```
SWITCH, ANTENNA, RADIO FREQUENCY, SOLID-STATE,
                        SA-1474A/A
```

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the switch described herein shall consist of this specification sheet and MIL-DTL-83739.

FIGURE 1. Dimensions and configuration.

NOTES:

1. Dimensions are in inches.
2. Metric equivalents (to the nearest 0.01 mm ) are given for general information only and are based upon 1 inch $=25.4 \mathrm{~mm}$.
3. Unless otherwise specified, tolerances are $\pm .03$ inch ( 0.76 mm ) for two place decimals and $\pm .010$ inch ( 0.25 mm ) for three place decimals.
4. The upper and lower surface of this area is not to be painted.
5. The spring shall be strong enough to hold the bolt free when disengaged from mounting plate.

FIGURE 1. Dimensions and configuration - Continued.

## REQUIREMENTS:

Dimensions and configuration: See figure 1.
Weight: 2 pounds maximum.
Finish: Black paint.
Mounting: Mounting provisions and mounting holes shall be provided that will interface with mounting plate MT1948/U covered by AF Drawing 59C12539, NSN 5985-00-788-6960.

Configuration: Single pole double throw (1P2T).
Sequence: Make-before-break.
Remote control: Provision shall be provided to remotely select either RF output on a full time basis by grounding pins on the power connector. Pin D shall be grounded for remote selection of Ant 1. Pin E shall be grounded for remote selection of Ant 2. No damage shall be caused if pins D and E are grounded simultaneously.

Nominal impedance: 50 ohms.
Frequency range: 1.02 GHz to 1.1 GHz .
Housing: Type E.
Switching rate: $38 \mathrm{~Hz} \pm 5$ percent.
Primary input power: 10 watts max, with the input voltage and frequency at $115 \pm 7$ volts and $400 \pm 20 \mathrm{~Hz}$, respectively.

Transition time: Less than 25 microseconds.
Voltage standing wave ratio (VSWR):
Either output to common terminal: 1.2:1.
Transition time: 2.5:1.
Isolation (crosstalk): 30 dB minimum between output.
Insertion loss: 0.5 dB maximum.
RF power handling capability: 1 kilowatt peak pulse power with 1 percent duty cycle into a mismatched load with a VSWR rating of 2:1.

MTBF: Design for 10,000 hours, with a guaranteed minimum of 5,000 hours.
Temperatures:
Operating: $-55^{\circ} \mathrm{C}$ to $+121^{\circ} \mathrm{C}$.
Shock: $-40^{\circ} \mathrm{C}$ to $+121^{\circ} \mathrm{C}$.

Part or Identifying Number (PIN): M83739/1-01.

NOTE: The switch covered by this specification sheet is substitutable for the following commercial types:

| Manufacturer's code | Commercial type | NSN 5985- |
| :---: | :---: | :---: |
| 82152 | 70 D 10100 | 00-932-4257 |
| 74868 | 351-12010 | 00-932-4257 |
| 96412 | DODA1MS66-358 | ----------- |
| 80058 | SA1474/A | 00-932-4257 |
| 22887 | 001-1012858 | 00-932-4257 |
