## MIL-G-28554C

6.7 Fuel systems. When shipping generator sets by military aircraft, the fuel system of gasoline, diesel and gas turbine engines should be drained and purged as specified in AFM 71-4, DSAM 4145.3, TM 38-250, NAVSUP PUB 505, and MCO 4030.19. Additional information for draining and purging fuel tanks is contained in MIL-HDBK-758, T.O. 35-1-4, and T.O. 38-1-5.

6.8 Environmental pollution preventive. Disposal methods of packaging materials, to prevent environmental pollution, are contained in MIL-HDBK-742, the material specification, or may be obtained from the preparing activity of the applicable material specification.

6.9 Subject term (key word) listing.

Electrolyte  
Generator  
Marking  
Packing  
Preservation

6.10 Changes from previous issue. Marginal notations are not used in this revision to identify changes with respect to the previous issue due to the extensiveness of the changes.

# STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

## INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
