MIL-R-81294D
AMENDMENT 2
15 December 1999
SUPERSEDING
AMENDMENT 1
30 September 1999

MILITARY SPECIFICATION

REMOVER, PAINT, EPOXY, POLYSULFIDE, AND POLYURETHANE SYSTEMS

This amendment forms a part of MIL-R-81294D, dated 31 December 1990, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 10

* 4.6.4.1.1, sentences 3 and 4: Delete and substitute: The test panels shall then be scrubbed using bleached cheesecloth (or suitable substitute material) and reagent grade acetone. The panels shall then be immersed several times in a beaker of the acetone at room temperature, then removed from the beaker and shaken to remove excess solvent. The panels shall be rinsed with reagent grade isopropyl alcohol at room temperature, shaken to remove excess solvent and air dried.”

PAGE 15

4.6.6.2: Under Ingredients, delete “sodium chromate” and its percent by weight “1.0.”

4.6.6.2: For the percent by weight of water, delete “6.8” and substitute “7.8.”

4.6.6.2: Delete “Dissolve sodium chromate in the water and add the solution to the mixture.”

4.6.6.2: Delete last sentence and substitute “Add water and stir until homogeneous.”

NOTE: The margins of this amendment are marked with asterisks to indicate where changes from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
