MILITARY SPECIFICATION

TROUSERS, MEN'S, DRESS, WOOL AND POLYESTER/WOOL

This specification is approved for use by the Natick Research, Development and Engineering Center, Department of the Army, and is available for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers wool and polyester/wool trousers.

1.2 Classification. The trousers shall be of one type, in the following classes and sizes as specified (see 6.2).

- Class 1 - Deleted (see 6.8)
- Class 2 - Trousers, wool or polyester/wool (see 3.3.1.1).
Blue 150, 151, 450 or 451
- Class 3 - Deleted (see 6.8)
- Class 4 - Deleted (see 6.8)
- Class 5 - Deleted (see 6.8)
- Class 6 - Trousers, polyester/wool serge (11.3 oz.), Army Green 489

Schedule of sizes (waist)

X-short	Short	Regular	Long	X-long
-	-	23	-	-
-	-	24	24	-
-	-	25	25	-

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be used in improving this document should be addressed to: U.S. Army Natick Research, Development, and Engineering Center, Natick, MA 01760-5019 by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

43	43	43	43	43
44	44	44	44	44
45	45	45	45	45
46	46	46	46	46

1.3 Uniform. When class 6 trousers specified in this specification and coats specified in MIL-C-43368(GL) or MIL-C-44211(GL) are procured as a uniform, the trousers and coats shall be cut from the same roll of material and the shades shall match.

2. APPLICABLE DOCUMENTS

2.1 Government documents.

2.1.1 Specifications, standards and handbooks. The following specifications, standards and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those listed in the issue of the Department of Defense Index of Specifications and Standards (DODISS) and supplement thereto, cited in the solicitation (see 6.2).

SPECIFICATIONS

FEDERAL

- A-A-203 - Paper, Kraft, Untreated
- A-A-50186 - Cloth, Buckram, Woven and Nonwoven

*MIL-T-43957D(GL)

MIL-T-43957D(GL)

(Unless otherwise indicated, copies of federal and military specifications, standards, and handbooks are available from the Standardization Documents Order Desk, Building 4D, 700 Robbins Avenue, Philadelphia, PA 19111-5094.)

2.2 Non-Government publications. The following documents form a part of this document to the extent specified herein. Unless otherwise specified, the issues of the documents which are DoD adopted are those listed in the issue of the DODISS specified in the solicitation. Unless otherwise specified, the issues of documents not listed in the DODISS are the issues of the documents cited in the solicitation (see 6.2).

AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM)

D 3951 - Standard Practice for Commercial Packaging

(Application for copies should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103-1187.)

(Non-Government standards and other publications are normally available from the organizations that prepare or distribute the documents. These documents also may be available in or through libraries or other informational services.)

2.3 Order of precedence. In the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. REQUIREMENTS

3.1 First article. When specified (see 6.2), a sample shall be subjected to first article inspection (see 6.3) in accordance with 4.3.

3.2 Guide sample. Samples, when furnished, are solely for guidance and information to the contractor (see 6.4). Variation from the specification may appear in the sample, in which case this specification shall govern.

3.3 Standard sample. Standard samples will be furnished by the Government. The finished trousers shall be equal to or better than the standard sample for the characteristics for which the standard sample is referenced (see 6.4).

3.4 Materials. It is encouraged that recycled material be used when practical as long as it meets the requirements of this specification.

3.4.1 Basic cloth. The basic cloth for the various classes of trousers shall be as follows:

'MIL-T-43957D(GL)

3.4.1.1 Class 2. The material for the Army Blue uniform and Army Band uniform trousers shall be one of the following fabrics, as specified, in Blue 150 (wool) or Blue 450 (polyester/wool) for general officers, and Blue 151 (wool) or Blue 451 (polyester/wool) for other officers, enlisted men and Army Band (see 6.2).

3.4.1.1.1 Wool, barathea. The material shall be 14-ounce cloth conforming to type I of MIL-C-3727.

3.4.1.1.2 Wool, elastique. The material shall be 16-ounce cloth conforming to type III of MIL-C-3738.

3.4.1.1.3 Wool gabardine. The material shall be 11-ounce or 14.5-ounce cloth conforming to type I, classes 3 or 5 of MIL-C-10176.

3.4.1.1.4 Polyester/wool gabardine. The material shall be 9.5-ounce cloth conforming to type II, class 8 of MIL-C-10176.

3.4.1.1.5 Polyester/wool tropical. The material shall be 10-ounce cloth conforming to type III, class 3 of MIL-C-21115.

3.4.1.1.6 Wool tropical. The material shall be 10.5-ounce or 8.5-ounce cloth conforming to type I, classes 1 or 2 of MIL-C-21115.

3.4.1.2 Class 6. The material for class 6 trousers shall be 11.3-ounce polyester/wool serge cloth, Army Green 489 (approximating the standard sample for Army Green 489 basic cloth), conforming to type III, class 3 of MIL-C-823.

3.4.2 Lining, interlining, and pocketing.

3.4.2.1 Lining and interlining. The material for left fly interlining (see footnote 2/ to table I), right fly lining, waistband lining, crotch pieces, and side pocket stays shall be polyester, polyester and cotton, or polyester and rayon cloth conforming to class 1 of MIL-C-43718. As an alternate, cotton silesia cloth conforming to type I of MIL-C-326 may be used.

3.4.2.1.1 Color. Except for the waistband and right fly linings the colors shall be unbleached, white, natural, or Black 3212. The color of the lining for the crotch pieces, pocket stays, and pocketing shall be the same throughout the trousers. The color for the waistband and right fly linings shall be Black 3212.

3.4.2.2 Pocketing. The material for pocketing shall be polyester, polyester and cotton, or polyester and rayon cloth conforming to class 1 of MIL-C-43718. The color of the pocketing for each class of trousers shall be the same as indicated for linings and interlining (see 3.4.2.1.1).

MIL-T-43957D(GL)

3.4.3 Buckram. The material for the waistband interlining shall be bleached or unbleached buckram conforming to type II of A-A-50186, except shrinkage in the warp and filling directions shall not exceed 2.0 percent maximum. As an option, nonwoven cloth, natural color, conforming to type V of A-A-50186 may be used as an alternative for the waistband interlining.

3.4.4 Waistband stabilizer. The material for the waistband stabilizer shall be interlining cloth conforming to type I of MIL-C-43920.

3.4.4.1 Rubberized waistband lining. The material shall consist of two rows of rubber material woven into a base 100 percent polyester webbing. Each row of rubber shall consist of four ends of bare, square cut, low modulus, heat resistant, neoprene based rubber compound yarns. The two rows of woven rubber yarns shall be 3/8 inch (nominal) distance apart. The finished waistband material shall be white in shade and $7/8 \pm 1/16$ inch wide with selvaged, nonfraying edges (see 6.5). The finished waistband shall show no evidence of flaking, decomposition, cracking, or increased stiffness when tested for resistance to dry heat, steam pressing, and perchloroethylene solvent as specified in 4.4.2.

3.4.5 Trouser ornamentation. When ornamental stripes are required, the material shall be one of the following, as specified (see 6.2).

3.4.5.1 Class 6 trousers. The material shall be mohair, nylon and mohair, or cotton, 1/2 inch wide for general officers and 1-1/2 inches wide for other officers and warrant officers, conforming to type I, class 3, type II, class 1 or type III, class 2 as specified (see 6.2) of MIL-B-593. The color shall be Black 194. The enlisted men's trousers do not require a braid.

3.4.5.2 Class 2 trousers (Army Blue uniform). The material shall be woven gold lace vellum, 1/2 inch wide, for general officers and 1-1/2 inches wide for other officers and warrant officers, conforming to type II, classes 1 or 2, style A, of MIL-L-17507. Alternatively, when specified (see 6.2), the material shall be woven lace vellum, Goldenlite, Cable No. 17425 conforming to type II, class 1, style A for general officers and style B for other officers and warrant officers of MIL-B-13466. The material for the enlisted men's trousers shall be woven lace vellum, Goldenlite, Cable No. 17425, conforming to type II, class 1, style B of MIL-B-13466.

3.4.5.3 Class 2 trousers (Army Band uniform). The material shall be 9/32 inch braid conforming to type I, class 4 of MIL-B-13466.

3.4.6 Labels. All trousers shall have a combination identification and instruction label and a separate size label or shall have a combination size and identification label and a separate instruction label. All labels shall show fastness to dry cleaning as specified in DDD-L-20.

***MIL-T-43957D(GL)**

3.4.6.1 Combination identification and instruction label. The label shall conform to type VI, class 15 of DDD-L-20. The instruction legend shall be as specified in 3.4.6.4.

3.4.6.2 Size label. The label shall conform to type VI, class 2 of DDD-L-20.

3.4.6.3 Combination size and identification label. The label shall conform to type VI, classes 1 and 2 of DDD-L-20.

3.4.6.4 Instruction label. The label shall conform to type VI, class 3 of DDD-L-20. The letters for the caption shall be not less than 3/16 inch in height and all other lettering shall be not less than 1/8 inch in height. The instruction legend shall be as follows:

TROUSERS, MEN'S, DRESS, WOOL AND POLYESTER/WOOL

1. Dry clean only
2. Permanent creased
3. Press on same crease line. Press/Iron temperature with steam shall be $325^{\circ} \pm 6^{\circ}\text{F}$ or wool setting with steam.

3.4.7 Thread. The thread for seaming and stitching shall be cotton- or polyester-covered polyester core conforming to ticket numbers 50-2 ply and 70-2 ply of A-A-50199. As an option, cotton thread conforming to type I of A-A-52094 may be used as an alternate for overedge stitching.

3.4.7.1 Machine thread. The thread for automatic machine pocket construction may be type III, Ticket No. A, 3-ply of A-A-52094.

3.4.7.2 Automatic button sewing. If an automatic machine which sews and shanks (wraps) the buttons in one operation is used, the thread shall be waxed nylon monocord special No. 5, having a minimum breaking strength of 16 pounds and a minimum length per unit weight of 2150 yards, and shall be tested for these requirements. The colorfastness shall be in accordance with the applicable test methods as specified in V-T-295 (see 3.4.7.3.1).

3.4.7.3 Color. The color of the thread for each class of trousers shall conform to the following:

- Class 6 - Black AA, C.A. 66043 and Army Green 489
(shall approximate the standard sample for Army Green 489 thread)
- Class 2 - Black AA, C.A. 66043, or Blue AB, C.A. 66044 for fabric shade 150 or 450; Blue AC, C.A. 66045 for fabric shade 151 or 451 and Goldenlite AJ, C.A. 66051 for ornamentation (see 6.2).

MIL-T-43957D(GL)

Where the thread appears on the unbleached silesia, the thread shall be unbleached or white, except that the bobbin thread matching the basic material may be used where stitching is through the basic material and the silesia. Unbleached white or dyed (matching the basic material) thread may be used for stitching labels.

3.4.7.3.1 Colorfastness. All dyed threads shall show colorfastness to light and wet dry cleaning, equal to or better than the standard sample. When no standard sample is available, the dyed thread shall show "good" fastness to light and wet dry cleaning.

3.4.8 Gimp. The gimp for reinforcing buttonholes shall be cotton, size No. 8, conforming to type I or II of A-A-50198.

3.4.8.1 Color. The color of gimp for each class shall be the same as indicated for thread in 3.4.7.3.

3.4.8.2 Colorfastness. The dyed gimp shall show fastness to wet dry cleaning equal to or better than the standard sample. When no standard sample is available, the dyed gimp shall show "good" fastness to wet dry cleaning.

3.4.9 Buttons. The buttons for the left hip pocket and fly-tab closure shall be type II, class D, style 4, 22 line, glossy finish, conforming to V-B-871. The color of the buttons for each class of trousers shall be as follows:

Class 6 - Army Green BR, Cable 62015.

Class 2 - Black BT, Cable 62001.

3.4.10 Slide fastener. For all classes, the slide fastener shall be type I, style 1, cam lock, size LS, short tab pull, brass chain, conforming to V-F-106, except that the tape of the slide fastener shall be cotton, synthetic, or a combination of cotton and synthetic yarns. The closed bottom stop shall be a staple type and shall be secured over the first two or three scoops and around the beaded edges of both tapes. The tape shall show fastness to wet dry cleaning equal to or better than the standard sample. When no standard sample is available, the tape shall show "good" colorfastness to wet dry cleaning. The tape shall match the basic fabric in the following shades:

Class 6 - Green Shade X, Cable No. 66524.

Class 2 - Dark Blue, Shade Z, Cable No. 66526 or Black, Shade G, Cable No. 66507 for fabric shade 150 or 450 and Bright Blue, Shade AA, Cable No. 66527 or Medium Blue, Shade O, Cable No. 66515 for fabric shade 151 or 451 (see 6.2).

MIL-T-4395D(GL)

3.4.11 Hook and eye. The hook and eye shall be North and Judd (Hook Flex H-49, K-50, H-89 and E-90); Universal Button Co. (Talon #3, #7, and #8 hook with #8 eye or #85 eye); Akim Co. or Patwin, Inc., Junior Series, type JB; Stimpson (P-536, D-4086, D-4457, D-4288; Rau (OA50, OK 1256, 080415), Patwin, Inc., (Slim-Slak with MB eye, and Silk-Slak) or equal (see 6.7). The finish shall be nickel plate.

3.5 Design. The trousers are dress type with a sew-on waistband with hook and eye closure, a french fly with slide fastener, straight side pockets, and double cord hip pockets. The left hip pocket has a buttonhole tab and button. An outlet is provided at seat seam and from crotch to knee at inseam. (See figure 1). The inside of the waistband has a rubberized track. The leg front and back creases are treated with a permanent silicone adhesive bead.

3.5.1 Figure. Figures are furnished for information only. To the extent of any inconsistencies between the written specification and the figures, this specification shall control.

3.6 Patterns. Standard patterns to be used for cutting the contractor's working patterns will be furnished by the Government. Except as allowed by footnotes to table I, the working patterns shall be identical to the standard patterns and shall not be altered in any way. The patterns provide a 1/4 inch seam allowance for bagging pockets and for pocket flaps and a 3/8 inch seam allowance for all other seams except seat seam and inseam of back part; 7/8 inch has been added to the seat seam allowances (total 1-1/4 inches at top) to allow for tapering the seat outlet and 3/4 inch has been added to the inseam of back part (total 1-1/8 inches at top) to allow for tapering the inseam outlet of back part.

3.6.1 List of pattern parts. The component parts of the trousers shall be cut from materials as specified in accordance with the number of parts required as shown in table I.

TABLE I. List of pattern parts

<u>Material</u>	<u>Pattern nomenclature</u>	<u>Cut parts</u>
Basic material (as specified)	Front	2
	Back	2
	Flies (one right and one left)	2
	Right fly with integrated tab (optional)	1
	Side pocket wide facing (or bearer)	2
	Side pocket narrow facing	2
	Hip pocket bearer	2
	Hip pocket cord	2
	Waistband (one right and one left)	2
	Right waistband for use with in- tegrated tab (optional)	1
	Fly tab (optional)	2

MIL-T-43957D(GL)

TABLE I. List of pattern parts (cont'd)

Material	Pattern nomenclature	Cut parts
Twill cloth (see 3.4.2.1)	Right fly lining 1/	1
	Right fly lining with integrated tab (optional) 1/	1
	Crotch lining	2
	Side pocket stay	2
	Left fly interlining 2/	1
Twill cloth (see 3.4.2.2)	Side pocket	2
	Hip pocket	2

NOTE: Patterns are not furnished for belt loops, buttonhole tab, waistband lining and waistband interlining (buckram). See table II, operations 1 and 2 for their requirements.

- 1/ The right front end of the waistband lining may extend to the front opening. When this optional construction is used, the right fly lining shall be shortened at the top. The altered right fly lining must be sufficiently long to extend under the waistband lining and be caught by the waistband-top stitching (see operations 20a, 22c, and 25a).
- 2/ Not applicable to class 2 when the trousers are made of barathra, elastique or wool gabardine (see 3.4.2.1).

3.7 Construction.

3.7.1 Stitches, seams, and stitching. All stitches, seams, stitching types, and stitches per inch specified in table II shall conform to FED-SID-751. Where two or more methods for seam or stitch types are given for the same part of an operation, any one of them may be used. Where stitch type 401 is used, the looper (underthread) shall be on the inside of the trousers. Seam allowances shall be maintained with seams sewn so that no raw edges, runoffs, twists, pleats, puckers, or open seams will result. All seams shall start and finish evenly. Thread tension shall be maintained so that there will be no tight or loose tension. Buttonholes shall be clean cut and the stitching shall be securely caught in the fabrics.

3.7.2 Stitches per inch. The minimum and maximum number of stitches per inch shall be as specified in table II.

3.7.3 Thread breaks and ends of seams. The ends of all seams and stitching, when not caught in other seams and stitching, shall be backtacked not less than 1/4 inch. The ends of a continuous line of stitching (except on labels) shall be overlapped not less than 1/2 inch. The ends of the label stitching shall be overlapped not less than three stitches. Thread breaks

MIL-T-43957D(GL)

(all stitch types) shall be secured by stitching back of the break not less than 1/2 inch. Skipped stitches or thread breaks on 401 seaming may be repaired using 301 stitch type. Bartacks shall be not more than 1/16 inch wide.

3.7.4 Buttonholes. Buttonholes shall be the eyelet end, taper bar, or eyelet end, square bar type, worked over gimp with the end securely tacked. The finished cut length shall be 5/8 inch. The eyelet end, square bar type shall be bartacked in a separate operation. The bar at end of the taper bar type buttonhole shall have a minimum of four tacks not including the first cross-over stitch.

3.8 Manufacturing operations requirements. The trousers shall be made by and with the use of all operations listed in table II. The contractor is not required to follow the exact sequence of operations. Any additional basting or holding stitching used to facilitate manufacture is permissible provided that the thread is removed or does not show on the finished trousers.

3.8.1 Pressing. Pressing specified in table II shall be performed by use of a heated pressing iron or machine.

3.8.2 Permanent creasing. All trousers shall have permanent silicone creases (see 6.6 and 6.6.1). Each of the trousers shall have a single continuous 1/16 inch (nominal) silicone adhesive nonstaining bead applied to the backside of the basic material in the center of each of the four prepressed leg creases to form permanent creases. Each bead shall be applied evenly and equally from the top of the crotch to within 2 inches of the open (unfinished) trouser bottom. The permanent creases in the trousers shall show no evidence of flaking, decomposition, failure to retain crease, cracking, staining or strike back onto face of material, or increased stiffness when tested for resistance to dry heat, steam pressing, and perchloroethylene solvent as specified in 4.4.2.

3.9 Marking. The component parts shall be marked to insure a uniform shade and size throughout the trousers (or uniform). Any method of shade marking may be used except:

- a. Corrosive metal fastening devices.
- b. Sew-on shade tickets.
- c. Adhesive type tickets which leave traces of paper or adhesive on the material upon removal of the tickets.

3.10 Use of automated apparel equipment. Automated apparel equipment may be used to perform any of the operations specified in table II, providing that the seam and stitch type are as specified and the finished component conforms to the required configuration. When a government furnished shaper pattern is forwarded, the component shall conform to that pattern.

MIL-T-43957D(GL)

NO.	TABLE II. MANUFACTURING OPERATIONS REQUIREMENTS	STITCH TYPE	SEAM AND STITCHING TYPE	STITCHES PER INCH	THREAD		
					NEEDLE	BOBBIN/ LOOPER	COVER
1.	<p><u>Cut trousers</u></p> <p>a. Spread the material without tension in a suitable number of plies for the applicable fabric. The cut parts from the top and bottom ply shall match and correspond to the pattern.</p> <p>b. Cut trousers in accordance with patterns furnished which show directional lines, size, placement of pockets and notches for the proper assembly of all parts. Directional lines shall be placed in the warp direction.</p> <p>c. The directional lines on the fronts and backs may vary from the warp direction by not more than 1 inch. Measurements shall be taken at the top and bottom edges of the pattern from the directional line to the selvage edge of the fabric (even side of lay) and the difference between the two measurements shall not exceed 1 inch.</p> <p>d. Cut all parts of the trousers out of the same piece of material except narrow facings for side pockets, hip pocket bearers, belt loops, fly tab pieces, and fly pieces (right and left) which may be cut from ends. The parts cut from ends shall approximate the shade of the trousers.</p> <p>e. When the trousers are cut as a part of the uniform, the trousers and the coat shall be cut from the same piece of material, except those parts which may be cut from ends.</p>

1/ With slide fastener closed and the waistband hooked measure along top edge of waistband from folded edge to folded edge.

2/ With slide fastener closed measure across trousers, one inch above fly bartack, from folded edge to folded edge.

MIL-T-43957D(GL)

- 3/ Measure along inseam from crotch seam to unhemmed bottom edge. (An allowance of 3 inches from hems is included in the inseam lengths.)
- 4/ Measure along outseam from bottom edge of waistband to unhemmed bottom edge of leg. (An allowance of 3 inches for hems is included in the outseam lengths.)
- 5/ The location of knee measurements shall be within 17-7/8 to 18-3/8 inches from bottom of trousers for X-Shorts; 18-7/8 to 19-3/8 inches for Shorts; 19-7/8 to 20-3/8 inches for Regulars; 20-7/8 to 21-3/8 inches for Longs; and 21-7/8 to 22-3/8 inches for X-Longs. Measure from folded edge to folded edge.
- 6/ Measure along unhemmed bottom edge of leg from folded edge to folded edge.

3.12 Workmanship. The finished trousers shall conform to the quality of product established by this specification.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements (examinations and tests) as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in this specification where such inspections are deemed necessary to ensure supplies and services conform to prescribed requirements.

4.1.1 Responsibility for compliance. All items shall meet all requirements of sections 3 and 5. The inspection set forth in this specification shall become part of the contractor's overall inspection system or quality program. The absence of any inspection requirements in the specification shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling inspection, as part of manufacturing operations, is an acceptable practice to ascertain conformance to requirements, however, this does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to acceptance of defective material.

4.1.2 Responsibility for dimensional requirements. Unless otherwise specified in the contract or purchase order, the contractor is responsible for ensuring that all specified dimensions have been met. When dimensions cannot be examined on the end item, inspection shall be made at any point, or at all points in the manufacturing process necessary to ensure compliance with all dimensional requirements.

MIL-T-43957D(GL)

4.1.3 Certificate of compliance. Where certificates of compliance are submitted, the Government reserves the right to check test such items to determine the validity of the certification.

4.2 Classification of inspections. The inspection requirements specified herein are classified as follows:

- a. First article inspection (see 4.3).
- b. Quality conformance inspection (see 4.4).

4.3 First article inspection. When a first article is required (see 3.1 and 6.2), it shall be examined for visual and dimensional defects specified in MIL-STD-1488.

4.4 Quality conformance inspection. Unless otherwise specified, sampling for inspection shall be performed in accordance with MIL-STD-105.

4.4.1 Component and material inspection. In accordance with 4.1, components and materials shall be inspected in accordance with all the requirements of referenced documents unless otherwise excluded, amended, modified, or qualified in this specification or applicable purchase document.

4.4.1.1 Component and material certification. A certificate of compliance may be acceptable as evidence that the hook and eye conforms to the requirements specified in 3.4.11.

4.4.2 Permanent crease and waistband testing. Prior to end item point count inspection, three samples of trousers shall be randomly selected from each end item lot, regardless of lot size, and tested as specified in table IV. Any evidence of nonconformance with the specified requirement shall be considered a test failure. Any test failure shall be cause for rejection of the lot.

1/ From FED-STD-191.

2/ A maximum of 400°F.

3/ Wet waistband lining with water and steam press at a temperature of 240° to 250°F for 1 minute. Allow the lining to reach room temperature and without rewetting, steam press again for 1 minute. Repeat two more times and visually check for degradation after each exposure.

4/ The waistband only shall be steam pressed with no vacuum for a minimum of 20 seconds after each dry cleaning.

5/ Steam press only in the folded state.

4.4.3 Point count inspection. Sampling and inspection provisions for end item examination of dress (D), trousers, dimensional examination, and packaging inspection shall be performed in accordance with MIL-STD-1488.

4.4.4 Palletization examination. The fully packaged and palletized end items shall be examined for the defects listed below. The lot size shall be expressed in units of palletized unit loads. The sample unit shall be one palletized unit load, fully packaged. The inspection level shall be S-1 and the AQL, expressed in terms of defects per hundred units, shall be 6.5.

<u>Examine</u>	<u>Defect</u>
Finished dimensions	Length, width, or height exceeds specified maximum requirements
Palletization	Pallet pattern not as specified Load not bonded as specified
Weight	Exceeds Maximum load limits
Marking	Omitted; incorrect; illegible; of improper size, location, sequence, or method of application

MIL-T-43957D(GL)

5. PACKAGING

5.1 Preservation. Preservation shall be level A or Commercial, as specified (see 6.2).

5.1.1 Level A preservation. Each pair of trousers shall be folded so that the length dimension is approximately 23 inches.

5.1.2 Commercial preservation. Trousers of one class and size only, shall be preserved in accordance with ASTM D 3951.

5.2 Packing. Packing shall be level A, B, or Commercial as specified (see 6.2).

5.2.1 Level A packing. Trousers of one class and size only, preserved as specified in 5.1, shall be packed in quantities specified in table V in a snug fitting fiberboard shipping container conforming to style RSC-L, grade V2s of PPP-B-636. The inside of each shipping container shall be fitted with a box liner conforming to type CF, class weather-resistant, variety DW, grade V15c of PPP-B-636. Level A folded trousers shall be packed flat, alternated end for end, within a shipping container. Inside dimensions of each shipping container shall approximate 23-1/2 inches in length, 15 inches in width, and 15 inches in depth. Approximate dimensions are furnished as a guide only. Each container shall have the contents completely covered on the top and bottom with a sheet of 30-pound minimum basis weight kraft paper conforming to A-A-203. Each shipping container shall be closed in accordance with method III, waterproofed in accordance with method V, and reinforced as specified in the appendix of PPP-B-636, except that the inspection shall be in accordance with 4.4.3. Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078 for the type and class of load specified (see 6.2). Strapping shall be limited to nonmetallic strapping, except for type II, class F loads.

TABLE V. Quantity of trousers of one class only per shipping container

<u>Class of trousers</u>	<u>Quantity per shipping container (pair)</u>
2	30 1/
6	30

1/ When the trousers are made of 16-ounce wool elastique, the trousers shall be packed 25 pair per shipping container.

5.2.2 Level B packing. Trousers of one class and size only, preserved as specified in 5.1, shall be packed in quantities specified in table V in a snug fitting fiberboard shipping container conforming to style RSC-L, type CF, class domestic, variety DW, grade 275 of PPP-B-636. The inside of each

MIL-T-43957D(GL)

shipping container shall be fitted with a box liner conforming to type CF, class domestic, variety DW, grade 275 of PPP-B-636. Level A folded trousers shall be packed flat, alternated end for end, within a shipping container. Inside dimensions of each shipping container shall approximate 23-1/2 inches in length, 15 inches in width, and 15 inches in depth. Approximate dimensions are furnished as a guide only. Each container shall have the contents completely covered on the top and bottom with a sheet of 30-pound minimum basis weight kraft paper conforming to A-A-203. Each shipping container shall be closed in accordance with method II as specified in the appendix of PPP-B-636, except that the inspection shall be in accordance with 4.4.3.

5.2.2.1 Weather-resistant fiberboard container. When specified (see 6.2), the shipping container shall be grade V3c, V3s, or V4s fiberboard box fabricated in accordance with PPP-B-636, and closed in accordance with method II as specified in the appendix of PPP-B-636, except that the inspection shall be in accordance with 4.4.3.

5.2.3 Commercial packing. Trousers of one type, class and size only, preserved as specified in 5.1, shall be packed in accordance with ASTM D 3951.

5.3 Palletization. When specified (see 6.2), trousers, packed as specified in 5.2.2 or 5.2.3, shall be palletized on a 4-way entry pallet in accordance with lead type Ia of MIL-STD-147. Pallet types shall be type I (4-way entry), type IV, or type V in accordance with MIL-STD-147. Pallets shall be fabricated from wood groups I, II, III, or IV of MIL-STD-731. Each prepared load shall be bonded with primary and secondary straps in accordance with bonding means C and D or film bonding means F or G. Pallet pattern shall be number 3 in accordance with appendix of MIL-STD-147.

5.4 Marking. In addition to any special marking required by the contract or purchase order, shipping containers and palletized unit loads shall be marked in accordance with MIL-STD-129 or ASTM D 3951, as applicable.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. The trousers are intended for wear by male personnel of the Army as part of the dress Army Green, Army Blue, and Army Band Uniforms.

6.2 Acquisition requirements. Acquisition documents must specify the following:

- a. Title, number, and date of this specification.
- b. Class and sizes required (see 1.2).
- c. Whether coat and trousers are procured as a uniform (see 1.3).

MIL-T-43957D(GL)

- d. Issue of DODISS to be cited in the solicitation, and if required, the specific issue of individual documents referenced (see 2.1.1 and 2.2).
- e. When a first article is required (see 3.1, 4.3, and 6.3).
- f. Basic material and color required for class 2 trousers (see 3.4.1.1).
- g. When ornamental stripes are required and the material required (see 3.4.5).
- h. Whether type I or II braid is required for stripes (see 3.4.5.1).
- i. When woven lace vallum (MIL-B-13466) may be used for general officers or other officers and warrant officer (see 3.4.5.2).
- j. Color of components for class 2 trousers (see 3.4.7.3, 3.4.8.1, and 3.4.10).
- k. Levels of preservation and packing (see 5.1 and 5.2).
- l. Type and class of unit load required (see 5.2.1).
- m. When weather-resistant grade fiberboard shipping containers are required for level B packing (see 5.2.2.1).
- n. When palletization is required (see 5.3).

6.3 First article. When a first article sample is required, it shall be inspected and approved under the appropriate provisions of FAR 52.209-4. The first article should be a preproduction sample. The contracting officer should specify the appropriate type of first article and the number of units to be furnished. The contracting officer should include specific instructions in acquisition documents regarding arrangements for selection, inspection, and approval of the first article.

6.4 Samples. For access to samples, address the contracting activity issuing the invitation for bids and request for proposal.

6.5 Rubberized waistband. A suggested source for the commercial type rubberized waistband lining is "Snugtex" or equal (see 6.7). Snugtex is available from Southern Waistband Inc., telephone number (404) 867-3156.

6.6 Permanent creasing. A guide for the permanent creasing procedure is as follows: After pressing the trouser crease apply the silicone resin in a fine bead to the inside of all four creases of the trouser. The bead should be applied from crotch height to within 2 inches of the open bottom trouser. The bead of resin after application should be 1/16 (nominal) inch in width and should follow the crease line exactly. Where resin misses the crease for any reason, it should be re-applied into the crease. No special drying or baking procedures are needed when using the silicone crease. The resin will quickly air-cure and no repressing after application is needed. Material and machines required for the process can be obtained from:

Clantexport, Inc.
 (Linctrac Processing)
 Thomson, Georgia 30824
 Telephone (404) 595-9272
 Telephone (800) 367-1153

Creaset Inc.
 1460 Broadway
 Suite 1501
 New York, New York 10036
 Telephone (212) 840-6868

MIL-T-43957D(GL)

6.6.1 Storage. Storage and stability (shelf life) of silicone resin used in permanent creasing.

a. A six-month storage life can be expected if stored in the original unopened cartridges. All cartridges are "use by" dated.

b. All unopened cartridges can be returned to the manufacturer for exchange before the expiration of the "use by" date.

c. Do not use resin that has an expired "use by" date.

6.7 Equal item. Prior to the use of an "or equal" item, the contractor shall submit the item with supporting data to the contracting officer for subsequent approval or disapproval by the responsible military agency.

6.8 Supersession data. The classes 1, 3, 4 and 5 trousers have been deleted as they are no longer required.
