DEPARTMENT OF DEFENSE INTEROPERABILITY STANDARD

Anti Jam (AJ) Communications in the High Frequency (2-30 MHz) Band (U)

MIL-STD-188-148B contains technical standards and design objectives for use by all Military Departments and Agencies in their system design and implementation of new High Frequency (HF) equipment and for current DoD HF equipment undergoing modification for anti jam requirements. The purpose of this document is to provide a standard for DoD interoperable anti jam communications in the HF Band.

The distribution of this military standard is restricted to U. S. Government agencies and their contractors. Because of this controlled distribution and the classification of the document all releases of this standard require the approval of the Preparing Activity (PA). Written request for the standard shall be submitted to:

Director
Defense Information Systems Agency
ATTN: MIL-STD-188-148 PA
Fort Monmouth, NJ 07703-5613
