5. DETAILED REQUIREMENTS

5.1 Gauge tests. Applicable gauge tests shall be as specified in the associated connector specification sheet.

5.2 Marking. Not applicable.

5.3 Drawing notes. Unless otherwise specified, the following information is applicable to all figures of this military standard.

- a. Dimensions are in inches.
- b. Metric equivalents are given for general information only.
- c. All undimensioned, pictorial configurations are for reference purposes only.
- d. Applicable to section 400 only. The construction, material, and finish of the standard socket connector shall result in satisfactory electrical and mechanical performance and provide the following minimum life cycles when mated with the same series pin standard test connector.

<u>Series</u>	<u>Life cycles</u>
C, N, SC, TNC	10,000
BNC	5,000
SMA, SMB, SMC	2,000

- e. Applicable to section 400 only. Dimensions shown are for the standard test connector only.

5.4 Change effectivity. Unless otherwise specified in the interface figure, all changes from the preceding issue of MIL-STD-348 will become effective 12 months from the date of this standard notice.

5.5 Disposition of stock. Unless otherwise specified in the interface figure, qualified manufacturers and their selling agents or distributors may ship from stock connectors which were manufactured in accordance with the preceding issue of MIL-STD-348 for a period of 30 months from this date of this standard notice.

6. NOTES

(This section contains information of a general or explanatory nature which may be helpful, but is not mandatory.)

6.1 Intended use. This standard is intended for use by all manufacturers of connectors and components utilizing connector interfaces. The interfaces detailed within this document have been coordinated and accepted by all military services and are deemed United States standards for radio frequency connector interfaces.

6.2 Patent notice. The Government has a royalty-free license under the following listed patents for the benefit of manufacturers of the item either for the Government or for use in equipment to be delivered to the Government. U.S. patent number 4,426,127 applies to series BMA interfaces. U.S. patent number 4,358,174 applies to series BMB interfaces.

NOTICE 1

## NOTES:

1. Previously qualified parts utilizing a .030 inch maximum contact recession shall be acceptable for Government procurement up to 18 months from the date of this specification for existing designs only. Caution should be exercised to determine whether a thick wall (.030 inch recession) design is being used during maintenance and part replacement.
2. This interface shall meet the gauge requirements as specified in MIL-C-39012/83.
3. Clearance for mating connector coupling nut.
