Control knobs; Selection of

MIL-STD-

1. This Military Standard is mandatory for use by all Departments and Agencies of the Department of Defense.
2. Recommended corrections, additions, or deletions should be addressed to:

Commander, Naval Electronic Systems Command,  
ATTN: Code 0517  
Department of the Navy  
Washington, D. C. 20360

MIL-STD- 1348  
30 July 1969

## FOREWORD

This standard provides selected standard control knobs for use in the design of military equipment. Additional sections of this standard will be developed as the standard control knobs of a given specification family are selected and coordinated with the three Military Departments.

MIL-STD-1348  
30 July 1969

## 1. SCOPE

1.1 Scope. This standard establishes the requirements for the selection of control knobs used in the design and manufacture of military equipment. Complete detailed requirements for control knobs listed in this standard are covered under MIL-K-3926. The MS part number and the ancillary document number shall be referenced in procurement documents for the control knobs.

### 1.2 Purpose.

- (a) To provide equipment designers and manufacturers with lists of control knobs considered to be standard for military applications.
- (b) To control and minimize the variety of control knobs used in new design by military activities in order to facilitate effective logistic support of equipment in the field; to maximize economic support of, and to concentrate improvement on, production of the control knobs listed in this standard.
- (c) To provide the equipment designer or manufacturer with principal control knob characteristics taken from the Military Standard in effect at the time of issue of this standard.
- (d) To provide a combined listing indicating control knob type and Federal Stock Number (FSN).

## 2. REFERENCED DOCUMENTS

2.1 The issues of the following documents in effect on the date of invitation for bids form a part of this standard to the extent specified herein:

### SPECIFICATIONS

#### MILITARY

MIL-K-3926 - Knobs, Control (For Use with Electronic, Communications, and Allied Equipment).

### STANDARDS

#### MILITARY

MS91522 - Knob, Control, Crank, Metal.  
MS91524 - Knob, Control, Symmetrical Bar, Metal.  
MS91525 - Knob, Control, Bar, Metal.  
MS91528 - Knobs-Control, Plastic (Round, Concentric, Pointer, Spinner, Spinner Slip Clutch, Bar, Tactile, Knob Lock Pointer, and Knob Locks).

(Copies of specifications, standards, drawings, and publications required by suppliers in connection with specific procurement functions should be obtained from the procuring agency or as directed by the contracting officer.

MIL-STP-1348  
30 July 1969

### 3. DEFINITIONS

3.1 Definitions. The terms used in this standard are defined in MIL-K-3926.

### 4. GENERAL REQUIREMENTS

4.1 Choice of control knobs. The variety of control knobs used in any particular equipment shall be the minimum necessary to obtain satisfactory performance. Where more than one type of control knob may be used in a given application, consideration should be given to cost and availability.

4.2 Item identification. A type designation for any control knob referenced herein may be constructed as indicated in the example given in the applicable Military standard. The part number assignments, where applicable, shall be as specified in the individual control knob specification.

4.3 Conflict of requirements. In the event of conflict between technical requirements of control knobs described in this standard and the applicable specification, the specification shall govern.

4.4 Criteria for inclusion in this standard. The criteria for the inclusion of control knob types in this standard are as follows:

- (a) The control knob shall be the best type available for general use in military equipment.
- (b) Approved military specifications shall be available (see 2.1).
- (c) The control knob shall have been in production and continued availability shall be reasonably certain.

### 5. DETAILED REQUIREMENTS

5.1 The detailed requirements for standard control knobs are contained in the applicable specification.

MIL-STD-1348  
30 July 1969

# STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

*(See Instructions - Reverse Side)*

1. DOCUMENT NUMBER	2. DOCUMENT TITLE	
3a. NAME OF SUBMITTING ORGANIZATION		4. TYPE OF ORGANIZATION (Mark one)
		<input type="checkbox"/> VENDOR
		<input type="checkbox"/> USER
		<input type="checkbox"/> MANUFACTURER
		<input type="checkbox"/> OTHER (Specify): _____
5. PROBLEM AREAS		
a. Paragraph Number and Wording:		
b. Recommended Wording:		
c. Reason/Rationale for Recommendation:		
6. REMARKS		
7a. NAME OF SUBMITTER (Last, First, MI) - Optional		7b. WORK TELEPHONE NUMBER (Include Area Code) - Optional
MAILING ADDRESS (Street, City, State, ZIP Code) - Optional		8. DATE OF SUBMISSION (YYMMDD)

**INSTRUCTIONS:** In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge (*DO NOT STAPLE*), and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

**NOTE:** This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
