INCH-POUND

MIL-STD-1835B
NOTICE 2
15 December 1997

## DEPARTMENT OF DEFENSE <br> INTERFACE STANDARD FOR MICROCIRCUIT CASE OUTLINES

TO ALL HOLDERS OF MIL-STD-1835B:

1. THE FOLLOWING PAGES OF MIL-STD-1835B HAVE BEEN REVISED AND SUPERSEDE THE PAGES LISTED:

| NEW PAGE | DATE | DUPERSEDED PAGE | DATE |
| :---: | :--- | :---: | :--- |
| 59 | 3 September 1996 | 59 | REPRINTED WITHOUT CHANGE |
| 60 | 15 December 1997 | 60 | 3 September 1996 |
| 131 | 3 September 1996 | 131 | REPRINTED WITHOUT CHANGE |
| 132 | 15 December 1997 | 132 | 3 September 1996 |
| 135 | 3 September 1996 | 135 | REPRINTED WITHOUT CHANGE |
| 136 | 15 December 1997 | 136 | 3 September 1996 |
| 141 | 15 December 1997 | 141 | 3 September 1996 |
| 142 | 3 September 1996 | 142 | REPRINTED WITHOUT CHANGE |

## 2. RETAIN THIS NOTICE AND INSERT BEFORE TABLE OF CONTENTS.

3. Holders of MIL-STD-1835B will verify that page changes and additions indicated above have been entered. This notice will be retained as a check sheet. This issuance, together with appended pages, is a separate publication. Each notice is to be retained by stocking points until the standard is completely revised or canceled.

SUPERSEDES PAGE 60 OF MIL－STD－1835B

## MIL-STD-1835B <br> NOTICE 2

NOTES:

1. Controlling dimension: inch.
2. Metallized castellations shall be connected to Plane 1 terminals.
3. Index area: An identification mark shall be located adjacent to pin one within the shaded area shown. Plane 1 terminal identification may be an extension of the length of the metallized terminal which shall not be wider than the b dimension.
4. The cover shall not extend beyond the edges of the body.
5. The corner shape (square, notch, radius, etc.) may vary at the manufacturer's option.
6. N indicates total number of terminal positions.
7. Unless otherwise specified, a minimum clearance of .015 inch shall be maintained between all metallized features (e.g., lid, castellation, terminals, thermal pads, etc.).
8. Solder finish is optional with a maximum allowable thickness of .007 inch. Measurement of dimensions A, b1, and L2 may be made prior to solder application.
9. For terminal identification purposes only, terminals between N1 and N2 and between N3 and N4 are omitted if values for $\mathrm{N} 1, \mathrm{~N} 2, \mathrm{~N} 3$ and N 4 are listed on the table.

## MIL-STD-1835B <br> NOTICE 2

NOTE:
The user's attention is called to the possibility that compliance with this figure may require use of an invention covered by patent rights; specifically, National Semiconductor, Inc. has stated that U. S. Patent No. 4,796,080 may relate to a certain implementation of this product outline. By publication of this figure, no position is taken with respect to the validity of this claim of any patent rights in connection therewith.

* FIGURE 24. Ceramic, quad leaded chip carrier style with non-conductive tie bar - Continued.

## MIL-STD-1835B <br> NOTICE 2

## NOTES:

1. A terminal 1 identification mark shall be located at the index corner in the shaded area shown. Terminal 1 is located immediately adjacent to and counterclockwise from the index corner. Terminal numbers increase in a counterclockwise direction when viewed as shown.
2. Generic lead attach dogleg depiction. May be flat lead configuration.
3. Includes lead attach dogleg height and lid height, whichever is greater. Dimension $A$ and $A 1$ do not include heat sinks or other attached features.
4. Corner chamfers and or notches are optional. Pin \#1 may have optional feature (larger or smaller chamfer or notch) for mechanical orientation purposes.
5. Dimension N: Number of terminals.
6. Dimension ND/NE: Number of terminals per package edge.
7. Controlling dimension: inch.
8. Dimensions b1 and c1 apply to base metal only, dimension M applies to the plating thickness.
9. Optional hole configuration applicable to all four corners.
10. Circular corner hole only. Slotted hole locations are shown on Detail D (optional).

* 11. Lead repair is optional. This view shows the drawn portion of the lead that must reside within these dimensions. The shape of the repaired lead (as shown) is for reference only.
* 12. Coplanarity requirements do not apply in this area of a repaired lead.
