4 NOVEMBER 1991

SUPERSEDING

MIL-STD-1837A

3 NOVEMBER 1989

MILITARY STANDARD

MISCELLANEOUS ELECTRICAL AND ELECTRONIC COMPONENTS, SELECTION GUIDE

AMSC N/A

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

FSC 5999

MIL-STD-1837B

FOREWORD

1. This military standard is approved for use by all Departments and Agencies of the Department of Defense.

2. Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Electronic Support Division (AFLC) 2750 LOG/ES, Gentile Air Force Station, Dayton, OH 45444-5400, by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

3. This standard provides a listing of miscellaneous electrical and electronic components available for use in the design of military equipment. The application information and performance characteristics presented are offered for guidance only and are not to be considered as binding. Additions to this standard will be made periodically as the referenced documents are updated.

MIL-STD-1837B

1. SCOPE

1.1 Scope. This standard covers the following military electronic parts in Federal Stock Class (FSC) 5999.

- a. Mounting pads.
- b. EMI/RFI gaskets.
- c. Delay lines, active
- d. Delay lines, passive.
- e. Heat sinks.

1.2 Purpose. The purpose of this standard is to:

- a. Provide designers of new equipment with basic descriptions of standard military parts for selection purposes.
- b. Control and minimize the number of items used in military equipment in order to facilitate logistic support.

MIL-STD-1837B

2. APPLICABLE DOCUMENTS

2.1 Government documents

2.1.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those listed in the issue of the Department of Defense Index of Specifications and Standards (DODISS) and supplement thereto, cited in the solicitation.

SPECIFICATIONS

MILITARY

- MIL-F-3922 - Flange, Waveguide, General Purpose.
- MIL-M-38527 - Mounting Pads, Electrical-Electronic Component, General Specification for.
- MIL-G-83528 - Gaskets, Shielding, Elastomer, Electrical, EMI/RFI, General Specification for.
- MIL-D-83531 - Delay Lines, Passive, General Specification for.
- MIL-D-83532 - Delay Lines, Active, General Specification for.
- MIL-H-87111 - Heat Sinks, Semiconductor Devices, General Specification for

HANDBOOKS

FEDERAL

- | | | |
|------|---|----------------------------|
| H-6 | - | Alphabetic Index of Names. |
| H2-2 | - | Cataloging Handbook. |

(Unless otherwise indicated, copies of federal and military specifications, standards, and handbooks are available from the Standardization Documents Order Desk, Building 40, 700 Robbins Avenue, Philadelphia, PA 19111-5094.)

2.1.2 Other Government documents, drawings, and publications The following other Government documents, drawings, and publications form a part of this document to the extent specified herein. Unless otherwise specified, the issues are those cited in the solicitation

DESC Drawings

- 84035 - Delay Lines, 10-Tap, Dual-In-Line, 16-PIN.
- * 84087 - Delay Lines, 1 to 5 Taps, 14 PIN DIP Compatible, TTL Interfaced²
- 85008 - Delay Lines, 5 Taps, 14 PIN DIP, TTL Interfaced
- 85009 - Delay Lines, Two Delay Lines, 14 PIN DIP, TTL Interfaced.
- 85012 - Delay Lines, 20-Tap, Dual-in-Line, 24 PIN.
- 85013 - Delay Lines, 5 Taps, 14 PIN DIP Compatible, TTL Interfaced
- 85014 - Delay Lines, 10 Taps, 14 PIN DIP, TTL Interfaced
- 85019 - Delay Lines, Programmable 16 PIN Compatible, 3 BIT, TTL Compatible
- 85078 - Delay Lines, Programmable 3 Bit, 16 PIN DIP Compatible, Emitter-Coupled Logic
- 85136 - Heat Sinks, Electrical-Electronic Component, Fin Stock.

MIL-STD-1837B

- * 85141 - Delay Lines, Three Delay Lines, 14-PIN DIP Compatible, TTL Compatible.
- 85151 - Delay Line, Three Delay Lines, 14 PIN DIP Compatible, TTL Compatible
- 86128 - Shielding Gasket, Electronic, RFI, D-Type Connector.
- 86129 - Gaskets, Shielding, EMI/RFI, Wire Mesh, Resilient, Strips With Round Cross Section.
- 87035 - Delay Line, Three Delay Lines, 14 PIN DIP, Low Power Schottky
- 88013 - Delay Lines, Passive, 3 PIN, SIP
- 88023 - Delay Lines, Programmable 24 PIN Compatible, 4 Bit, ECL Interfaced

* Asterisk indicates inactive for new design.

(Copies of DESC drawings are available from the Defense Electronics Supply Center, (ATTN: EA), 1507 Wilmington Pike, Dayton, OH 45444-5000.)

2.2 Order of precedence In the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

MIL-STD-1837B

3. DEFINITIONS

3.1 Definition of item names (H-6). Definitions of item names are contained in the Federal Item Name Directory for Supply Cataloging H-6, section A.

3.2 Definition of item names (H2-2). A complete list of item names in FSC 5999 can be found in Cataloging Handbook H2-2

3.3 Definitions. The meanings of terms used in this standard are in accordance with military specifications and DESC drawings

3.3.1 DESC drawing. A standardization document developed by and available from the Defense Electronics Supply Center.

3.3.2 Part or Identifying Number (PIN). Formerly part number (P/N).

3.3.3 Qualified Products List (QPL). A document maintained by DESC-EQP which lists vendors whose products are officially approved by DESC

MIL-STD-1837B

4. GENERAL REQUIREMENTS

4.1 Item identification. Military Part or Identifying Number (PIN) is used to identify the items listed in this standard. Abbreviated PIN is used in some cases for convenience. See the appropriate specification or drawing for complete PIN.

4.2 Conflict of requirements. In the event of conflict between the technical requirements of items described in this standard and the applicable specification or DESC drawing, the specification or DESC drawing shall govern.

4.3 Criteria for inclusion in this standard. All parts referenced in this standard are:

- a. Classified in FSC 5999.
- b. The best type available for general use in military equipment.
- c. Covered by military specifications or DESC drawings.
- d. Available from at least one source.
- e. To be used for design purposes in new equipment.

4.4 Order of preference. The order of preference, for parts selection, shall be as follows:

- a. Military specification parts
- b. DESC drawing parts

4.5 Qualified Products List (QPL). Most EMI gaskets and some delay lines described herein are listed on QPL's. Parts covered by QPL's shall be used whenever available.

4.6 Drawing notes

- a. Dimensions are in inches.
- b. Metric equivalents are given for general information only.
- c. Metric equivalents are in parentheses.

MIL-STD-1837B

5. DETAILED REQUIREMENTS

5.1 Detailed requirements. The detailed requirements for the parts covered herein are contained in the referenced specifications or drawings.

MIL-STD-1837B

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Recycled, virgin, and reclaimed materials. The use of reclaimed materials shall be encouraged to the maximum extent possible.

6.2 Dimensions and tolerances. Unless otherwise indicated, all dimensions are given in inches. Tolerances may be found in the referenced specifications and drawings if not called out herein.

6.3 Part or Identifying Number (PIN). PIN's beginning with the letter "M" are military specification part numbers. All other PIN's are DESC drawing part numbers

6.4 Subject term (key word) listing.

Delay lines

EMI gaskets

Heat sinks

Mounting pads

6.5 Changes from previous issue Marginal notations are not used in this revision to identify changes with respect to the previous issue due to the extensiveness of the changes

Material types for MIL-G-83528 gaskets (indicated by an "X" in the PIN's on the following pages).

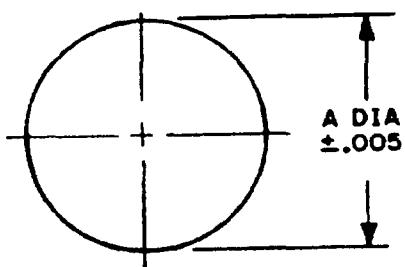

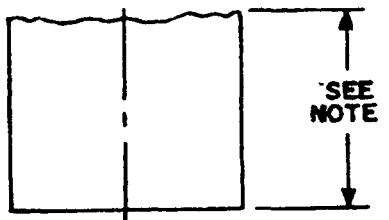

- A. Silver-plated copper-filled silicone capable of 110 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -55°C to +125°C.
- B. Silver-plated aluminum-filled silicone capable of 100 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -65°C to +160°C.
- C. Silver-plated copper-filled fluorosilicone capable of 110 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -55°C to +125°C and resistant to solvents and jet fuels.

MIL-STD-1837B

- D. Silver-plated, aluminum-filled fluorosilicone capable of 90 dB of plane wave shielding effectiveness at 10 GHz, and resistant to solvents and jet fuels with a continuous use temperature range of -55°C to +160°C.
- E. Medium durometer, pure silver-filled silicone capable of 110 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -55°C to +160°C.
- F. Pure silver-filled fluorosilicone capable of 110 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -65°C to +160°C and resistant to solvents and jet fuels.
- G. Silver-plated, copper-filled silicone, expanded copper foil reinforced capable of 110 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -45°C to +125°C.
- H. High durometer, pure silver-filled silicone capable of 110 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -55°C to +160°C.
- J. Low durometer, pure silver-filled silicone, capable of 80 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -55°C to +160°C.
- K. High durometer, silver-plated copper-filled silicone, capable of 110 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -45°C to +125°C.
- L. Silver-plated, nickel-filled silicone rubber capable of 100 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -55°C to +125°C.
- M. Silver-plated, glass-filled silicone rubber capable of 100 dB of plane wave shielding effectiveness at 10 GHz with a continuous use temperature range of -55°C to +160°C.

NOTE Salt spray environments. All EMI gasket materials (metal and elastomer) to varying degrees are incompatible with certain flange surfaces. Design of the joint, therefore, plays a central role in determining the electrical stability and corrosion resistance of the joint. Design variables include: Flange material and finish, gasket filler and form (i.e., sheet, O-ring in a groove, etc.), use of parallel nonconductive environmental gaskets, mechanical design, and use of insulating coatings. Choice of the design options should depend on: Environment of the application, levels of shielding effectiveness required versus frequency, and expected life of the equipment. When designing for salt spray environments, all of the preceding factors must be considered.

NOTES:

1. Length shall be as specified in the acquisition document.
2. Abbreviated PIN shown. See DESC drawing 90046 for complete PIN format.
3. Available wire types: monel, phosphor bronze, aluminum alloy
4. Available elastomer types: solid silicone rubber, solid fluorosilicone rubber, closed cell, silicone sponge rubber
5. All parts available with adhesive on one side.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge (*DO NOT STAPLE*), and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
