1/ The dash number added to MS military standard number constitutes the MS PIN; for example MS14046-1.

2/ The decrease in maximum operating temperature from 125°C to 105°C does not downgrade these coils but assures satisfactory operation at 105°C for a minimum of 2,000 hours of life rather than a shorter period of operation at 125°C.

1/ Test fixture allowance of  $+0.01 \mu\text{H}$  shall be added to all change in inductance limits  $\pm(\_ \text{ percent } +.01 \mu\text{H})$ .

2/ The polarizing voltage during the moisture resistance tests is applied with the positive lead connected to the coil terminals tied together, and the negative lead connected to the metal strap.
