<sup>1</sup>Threads shall be cut or rolled. The diameter of the rolled thread shank shall be as indicated by (D<sub>1</sub>). All rolled thread lag bolts shall be provided with a shoulder (S).

APPROVED 8 MAY 1957 REVISED (A) FOR CHANGES SEE SHEETS 1 THROUGH 3

CUSTODIANS	OTHER INT.	<b>MILITARY STANDARD</b>		<b>MS16201</b> (SHIPS)
Ships	A - N - AF -	BOLTS, LAG, CONE POINT, COUNTERSUNK FLATHEAD, SLOTTED, COPPER-SILICON		
Procurement Specification A FF-B-561		ALLOY, NONMAGNETIC		SHEET 2 OF 3

This standard has been approved by the Naval Ship Engineering Center, Department of the Navy, and is mandatory for use by that activity. All other military activities are required to employ this standard where suitable.

FED. SUP. CLASS  
**5306**

**(A) Material:** Material shall be copper silicon alloy in accordance with copper alloy No. 651 of QQ-C-591.

Breaking strength: When tested in tension as specified in FF-B-561, the minimum breaking strength shall be as follows:

<u>Size</u>	<u>Pounds</u>
1/2	8,600
5/8	12,200
3/4	15,800

Length of thread: The minimum thread length shall be 1/2 the length (L) of the lag bolts plus 1/2 inch. Bolts too short for minimum thread length shall be threaded as close to the head as practicable.

Dimensions: All dimensions are inches unless otherwise specified.

Packaging and packing: Packaging and packing shall be in accordance with standard commercial practice.

**Notes:**

1. In case of conflict with any documents referenced herein this standard shall govern.
2. Referenced documents shall be the issue in effect on date of invitation for bids.
