DETAIL SPECIFICATION SHEET

EYE END, TURNBUCKLE, CLIP LOCKING

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet, MIL-DTL-8878, and QPL-8878.

FIGURE 1. Eye end, turnbuckle, clip locking.

2/ Includes last full thread engagement.

REQUIREMENTS:

1. Material: Material shall be in accordance with MIL-DTL-8878.
2. Protective treatment: Protective treatment shall be in accordance with MIL-DTL-8878.
3. Heat treatment: Heat treatment shall be in accordance with MIL-DTL-8878.
4. Finish: Finish shall be in accordance with MIL-DTL-8878.
5. Threads: Threads shall be in accordance with FED-STD-H28/20.
6. Tolerances: Unless otherwise specified, tolerances: decimals ± 0.010 , angles $\pm 0.5^\circ$.
7. Outside diameter (O.D.): O.D. of the "F" dimension may be a flat area.

MS21254V
w/AMENDMENT 3

NOTES:

1. Part or identifying number (PIN): The part or identifying number (PIN) consists of the letters MS, the specification sheet number, and a dash number taken from table I. A "C" in lieu of dash indicates 17-4PH; a dash indicates carbon or alloy steel. The first letter following the dash number or letter C indicates direction of thread (left or right hand) and the second letter indicates length (short or long).

MS21254C3LS Indicates - Eye, turnbuckle, 17-4PH, 0.1900 (#10)-32 left hand thread, short.

MS21254-3RL Indicates - Eye, turnbuckle, steel, 0.1900 (#10)-32 right hand thread, long.

2. Remove burrs and sharp edges. (See MIL-DTL-8878.)
3. Dimensions are in inches.
4. Interpret drawing in accordance with ASME Y14.5.
5. MS21254 items can replace AN165 items of like thread size and material.
6. For 0.125 (1/8) inch diameter wire rope use -5 parts, minimum breaking strength 2,200 pounds (lbs.) (reference).
7. In the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence.
8. Unless otherwise specified, issues of referenced documents are those in effect at the time of solicitation.
9. For clip locking of turnbuckles, see MS33736 and MIL-DTL-8878.
10. Cutter radius mark, which is used as a clip slot alignment indicator, must be present on this surface.
11. During fabrication of the clip slot groove, operation of the cutter shall be maintained for the length of the terminal shank until engagement of the curved surface occurs (see Note 10).

MS21254V
w/AMENDMENT 3

Depending upon the part tolerance conditions, the cutter radius marks may or may not appear on the shank surface and shall not be cause for rejection.

12. The parts covered by dash numbers shown on AN165 are canceled after 10 December 1971. Steel, carbon and alloy MS21254 parts are inactive for new design. Use only 17-4 PH stainless steel parts for new design and replacement for comparable alloy and carbon steel MS21254 parts and AN165 parts. The canceled AN165 parts and alloy and carbon steel MS21254 parts cannot replace comparable 17-4 PH stainless parts and should be used until existing stock is depleted. Substitution shall be in accordance with table II.

TABLE II. Substitution table.
