

FED. SUP CLASS
5975

NOTICE—When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government hereby incurs no responsibility, nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

NOTES:

1. Reference: MIL-E-19600A(WEP).
2. Provisions for top cover plate and module hold downs must be made consistent with modules to be inserted.
3. Partitions will normally replace module covers and must be of a material satisfactory thereto. Minimum weight consistent with strength of design shall be a determining factor.
4. Height shall be 8.500 + 0.000 - 0.064 inches.
5. Width shall be either 4.875, 7.500, or 10.125 inches. The 4.875 and 7.500 inch widths are preferred. With specific approval of the procuring activity, widths of 2.250, 3.563, and 15.375 inches may be used. Tolerances to be +0.000 - 0.064 inches.

Ⓐ CANCELLED AFTER 7 AUGUST 1978 NO SUPERSEDING STANDARD.

Additional notes on Sheet 2 of 2

This standard has been approved by the BUREAU OF NAVAL WEAPONS Department of the Navy and is mandatory for use by their activity. All other military activities are required to employ this standard when suitable.
