NOTES:
1/ Dimensions are in inches.
2/ Metric equivalents are given for general information only.
3/ Unless otherwise specified, tolerance is ±.010 (0.25 mm).
4/ Terminal numbers need not appear on relay headers provided there is affixed to the relay a suitable legible circuit diagram that permanently and positively identifies each terminal location specified hereon.
5/ The use of diodes on ac relays is optional. Actual application must be shown on label.
6/ Relay is magnetically latched in both positions. Caution note to observe polarity must appear on relays with dc coils.
7/ Shock, vibration, and acceleration requirements application with coils de-energized.
8/ In the event of conflict between the text of this standard and the references cited herein, the text of this standard shall take precedence.
9/ Referenced Government documents of the issue listed in that issue of the Department of Defense Index of Specifications and Standards (DoDISS) specified in the solicitation form a part of this standard to the extent specified herein.
10/ Pins to be perpendicular to header surface within 1 degree.
11/ Relay is magnetically latched in both positions. Caution note to observe polarity must appear on relays with dc coils.
12/ Shock, vibration, and acceleration requirements application with coils de-energized.
