PREFACE

The Anthropometric Source Book is designed to provide NASA, NASA contractors, the aerospace industry, Government agencies, and a wide variety of industrial users in the civilian sector with a comprehensive, up-to-date tabulation of anthropometric data. Specifically, it is tailored to meet the needs of engineers engaged in the design of equipment, habitability areas, workspace layouts, life-support hardware, and clothing for the NASA Space Shuttle/Spacelab program. The intent is to provide the designer not only with dimensional data but with underlying anthropometric concepts and their application to design.

All available anthropometric data collected in the weightless environment are documented in this three-volume book, which also includes an extensive tabulation of anthropometric data defining the physical size, mass distribution properties, and dynamic capabilities of U.S. and selected foreign populations. The material covers adult males and females of various age groups, socio-educational backgrounds, races, and ethnic backgrounds. Also included are size-range projections for a 1985 population eligible for manned space flight.

Volume I is a nine-chapter treatment covering all basic areas of anthropometry and its applications to the design of clothing, equipment, and workspaces.

Chapter 1, "Anthropometric Changes in Weightlessness," addresses the effects on the human body that occur as a result of weightlessness. Such topics as weight loss, height increases, neutral body posture, strength and body composition, changes in trunk and limb girth, and loss of muscle mass are discussed in detail. In addition to bringing together in a single source the most comprehensive collection of data on anthropometric change in weightlessness that exists in this country, this chapter calls attention to the potential impact of weightlessness on man/machine design and suggests areas of future study essential to the proper design of man's space environment.

Chapter 2, "Variability in Human Body Size," describes and graphically documents the range of human-body variability found among homogeneous groups. Those trends that show significantly marked differences between sexes and among a number of racial/ethnic groups are also presented. This chapter alerts design engineers to the nature and extent of human-body variability and serves as a guide for modifying and designing man/machine systems.

Chapter 3, "Anthropometry," presents tabulated dimensional anthropometric data on 59 variables for 12 selected populations. The variables chosen were judged most relevant to current manned space programs. Appendix A to this chapter is a glossary of anatomical and anthropometric terms. Appendix B covers selected body dimensions of males and females from the potential astronaut population projected to the 1980-1990 time frame. Appendix C contains a 5th-, 50th-, and 95th-percentile drawing-board manikin based on the anticipated 1980-1990 body-size distribution of USAF fliers.

Chapter 4, "The Inertial Properties of the Body and Its Segments," is a user-oriented summary of the current state of knowledge on the mass distribution properties of the adult human body. The data presented lend themselves to mathematical modeling.

Chapter 5, "Arm-Leg Reach and Workspace Layout," is an informative chapter on functional reach measurements relevant to the design and layout of workspaces. Basic reach data are given, along with recommendations for applying corrective factors to adjust for differences in (1) workspace, task, and body position; (2) environmental conditions - primarily gravity forces; and (3) anthropometric characteristics of various populations.

Chapter 6, "Range of Joint Motion," discusses (1) selected reviews of the range-of-joint-motion literature; (2) techniques for measuring range of joint motion; (3) range-of-joint-motion terminology; (4) recommended range-of-joint-motion data for the design engineer; (5) differences in the range of joint motion due to the effects of age, sex, and protective clothing; and (6) the range of joint motion of selected two-joint muscles. Together, chapters 5 and 6 constitute a comprehensive data base and guide to workstation layout.

Chapter 7, "Human Muscular Strength," deals with (1) a general review of human muscular strength, (2) specificity of muscular strength, (3) relationships between static and dynamic muscular strength, (4) strength within the arm reach envelope of the seated subject, and (5) comparative muscular strength of men and women. This chapter should aid design engineers in relating strength data to workspace design.

Chapter 8, "Anthropometry in Sizing and Design," discusses the application of human body-size diversity and quantification to engineering design. Procedures are outlined for using anthropometric data in the development of effective sizing programs.

Chapter 9, "Statistical Considerations in Man/Machine Design," reviews statistical concepts that appear repeatedly in the NASA Anthropometric Source Book and touches on some statistical problems that will typically confront individuals using the data.

Volume I was compiled and edited by the following members of the Anthropology Research Project of Webb Associates, Yellow Springs, Ohio: Edmund Churchill, Lloyd L. Laubach, John T. McConville, and Ilse Tebbetts.

Volume II summarizes the results from anthropometric surveys of 61 military and civilian populations of both sexes from the United States, Europe, and Asia. Some 295 measured variables are defined and illustrated. The variable names are listed in alphabetical order. For each variable, there is a computer order number by which it is identified, a list of surveys in which it was measured, a group of summary statistics, and a series of values for the 1st, 5th, 10th, 25th, 50th, 75th, 90th, 95th, and 99th percentile of the given population.

Preceding the presentation of the actual data are three indexes designed to assist the reader in the use of the material. The first of these indexes, entitled "Anthropometric Surveys: A Reference List," lists and describes the sources from which all the summary data in this volume were extracted. This enables the user to obtain additional information on any survey population if that is desired. The next index, entitled "Definition of Measurements," includes both written descriptions of all the variables cited and simplified line drawings, where feasible, to illustrate a particular measurement. The third index is provided to further guide the user in identifying and finding measurements relevant to his or her particular needs. It is entitled "Index of Dimensions." The variables are listed by name and are categorized by anatomical region and by anthropometric technique.

Volume II contains a minimum of text-type material and is primarily a handbook of tabulated dimensional anthropometric data. It is probably the most comprehensive source of summarized body-size data currently in existence.

Volume II was compiled and edited by the following members of the Anthropology Research Project of Webb Associates, Yellow Springs, Ohio: Edmund Churchill, Thomas Churchill, Kay Downing, Peggy Erskine, Lloyd L. Laubach, and John T. McConville.

Volume III lists 236 annotated references related to the field of anthropometry. Included are references to every anthropometric survey outlined in volume II, as well as a variety of other works on static and working anthropometry of U.S. and foreign populations, anthropometry of parts of the body related to the design of specific items such as gloves or helmets, joint range and arm reach, mass distribution properties of the body, strength data of various kinds, sizing systems, material on zero gravity, and some general reference works. The references listed were selected by the editors and contributors to volume I. Their objective was to reference those studies, reports, textbooks, and surveys that they deemed most related to their specific subject area and that would be most helpful to the user.

Volume III was compiled and edited by the following members of the Anthropology Research Project of Webb Associates, Yellow Springs, Ohio: Lloyd L. Laubach, John T. McConville, and Ilse Tebbetts.

DEFINITION OF MEASUREMENTS.	26
INDEX OF DIMENSIONS	72
THE DATA: METRIC AND ENGLISH UNITS	93

INTRODUCTION

This volume contains summary statistics from anthropometric surveys of 61 military and civilian populations, and constitutes what is probably the most comprehensive source of summarized body-size data currently in existence. Material which appears here has been obtained from many original sources, both published and unpublished. Much of the data comes from the Anthropometric Data Bank, a major collection of body-size data compiled by the Aerospace Medical Research Laboratories at Wright Patterson Air Force Base, Ohio, and the Anthropometric Research Project at Webb Associates. We have expanded on the Data Bank compilation by adding additional military surveys and as many surveys of civilian populations as we were able to find. Altogether the data in this volume describe subjects from every populated continent in the world.

All the data are reported in both metric and in English units. Material is listed in alphabetical order by variable name, beginning with "Abdominal Depth, Sitting" and ending with "Wrist Height." For each variable there are: a computer number by which it is also identified in the section on "Definition of Measurements"; a list of surveys in which that dimension was measured; a group of summary statistics including the MEAN, STD. DEV. (standard deviation), COEF. OF V (coefficient of variation) and N (number of subjects); and a series of values for the 1st, 5th, 10th, 25th, 50th, 75th, 90th, 95th and 99th percentiles of the given population. Four asterisks in the "N" column indicates a sample of over 10,000.

If the number of subjects in a given survey exceeded 200 and the first and 99th percentiles were reported, the remaining percentiles were calculated according to the statistical procedures reported in Clauser et al., Anthropometry of Air Force Women (1972). When a percentile value appears in parentheses for a certain anthropometric dimension, it means that that value has been computed from the mean and standard deviation rather than directly from the original data. These derived values were computed for the 5th, 25th, 75th and 95th percentiles only when the original study did not report percentile values and were arrived at by using the following formulas:

$$\begin{aligned}
 5\%ile &= \text{Mean} - 1.645 \text{ (STD DEV)} \\
 25\%ile &= \text{Mean} - 0.67 \text{ (STD DEV)} \\
 75\%ile &= \text{Mean} + 0.67 \text{ (STD DEV)} \\
 95\%ile &= \text{Mean} + 1.645 \text{ (STD DEV)}
 \end{aligned}$$

The remaining percentile values have been calculated in a number of different ways, and the reader who wants more information about the techniques used is referred to the original sources.

All survey names are preceded by numbers which can be used to identify their complete original sources in the list of survey references. In some

cases the original survey populations have been divided into selected subsamples. For example, Air Force Women (survey number 7), is a total which includes nurses and other officers, enlisted white WAF's, and enlisted black WAF's (survey numbers 8, 9 and 10 respectively). The single report from which all the data for these subjects originate can be found in the list of survey references which appears below.

Dates following survey names in the main body of this volume refer to the years when the surveys were conducted and usually differ from the later dates found on the published reports by which surveys are referenced.

Preceding the presentation of the actual data are three indexes designed to assist the reader in the use of the material. Immediately following is a list entitled "Anthropometric Surveys: A Reference List," which lists and describes the sources from which all the summary data in this volume were extracted. This will enable a user to obtain additional information on any survey population if that is desired.

The section entitled "Definition of Measurements", includes both written descriptions of all the variables cited in the following text and simplified line drawings, where feasible, to illustrate a particular measurement.

To further guide the user in identifying and finding measurements relevant to his particular needs, an index of dimensions is provided. Variables are listed by name (e.g., axilla height, upper thigh circumference), and categorized by anatomical region (e.g., head and face, back of the torso) and by anthropometric technique (e.g., arcs, heights).

Although all the data have been carefully culled for errors and inconsistencies, it is beyond the scope of this volume to ascertain whether or not the anthropometric data from different populations are directly comparable, since measuring techniques may vary from survey to survey. Users who require precise descriptions of actual measurement techniques, or for whom small differences in technique may be significant, are referred to the original sources or to A Collation of Anthropometry, by Garrett and Kennedy (1971), a two-volume publication designed to help researchers and design engineers establish comparability of anthropometric data from a large number of sources.

ANTHROPOMETRIC SURVEYS: A REFERENCE LIST

1. AIRLINE STEWARDESSES - 1971

Snow, Clyde C., Herbert M. Reynolds and Mackie A. Allgood. Anthropometry of Airline Stewardesses. Department of Transportation Report No. FAA-AM-75-2, FAA Office of Aviation Medicine, Civil Aeromedical Institute, Oklahoma City, Okla. 73125, 1975.

Seventy-two anthropometric measurements, plus age (range 19-28), were taken between February and June 1971 on 423 trainees enrolled at the American Airline Stewardesses Training Academy in Fort Worth, Texas. The sample is 90% White, 8% Black, and 2% Oriental. Report includes mean, standard deviation, 25 percentiles, and detailed measurement technique for each measurement. Unilateral measurements were made on the left side. Waist level was defined as the level of minimum waist circumference. Values presented here were copied from the report.

2. U.S. WOMEN DEPT. OF AGRICULTURE - 1940

O'Brien, Ruth and William C. Shelton. Women's Measurements for Garment and Pattern Construction. U.S. Department of Agriculture Miscellaneous Publication No. 454, U.S. Government Printing Office, Washington, D.C., 1941.

Fifty-nine anthropometric measurements were taken between July 1939 and June 1940 on 10,042 white women over the age of 18 recruited from "Colleges, Work Projects Administration sewing rooms, social welfare centers, and other women's organizations" (mostly in urban areas in 7 states and the District of Columbia). The report includes mean, standard deviation, frequency distribution, and full measurement description for each measurement. Unilateral measurements appear to be generally made on the right side, although some are averages of right side and left side measurements. Waist level was defined as follows, "the waist level used lies at the lower edge of the lowest rib and was found by palpating the sides of the body in the midaxillary line. This waist level corresponds very closely to the natural waist which can be seen when the side profiles of the body are slightly concave." Values presented here are based on means and standard deviations copied from the report.

3. WOMEN ARMY SERVICE (WAS) PILOTS - 1942

4. ARMY AIR FORCE (AAF) NURSES - 1942

Randall, Francis E., Albert Damon, Robert Benton and Donald Patt. Human Body Size in Military Aircraft and Personal Equipment. Technical Report 5501, Army Air Force, Air Materiel Command, Wright Field, Dayton, Ohio, 1946.

Thirty-one anthropometric measurements were taken on 447 women pilots (AAFTD) and 152 Flying Nurses (AAFSAE). The report includes frequency distri-

butions, means and brief descriptions of measurement procedures. No age or social data are given. Some unilateral measurements are measured on the right side, at least one on the left, and for several the side is not mentioned. Waist level was "the natural waist line." Survey 15, A.A.F. CADETS '42 and Survey 16, A.A.F. GUNNERS, appear to be more-or-less companion surveys. Values presented here were computed from the frequency distributions.

5. WOMEN OF THE ARMY CORPS SEPARATEES - 1946

Randall, Francis E. and Ella H. Munro. Reference Anthropometry of Army Women. Report No. 149, Environmental Protection Section, Climatic Research Laboratory, Lawrence, Mass., 1949.

Randall, Francis E. Applications of Anthropometry to the Determination of Size in Clothing. Environmental Protection Series Report #133, Quartermaster Climatic Research Laboratory, Lawrence, Mass., 1948.

A survey of 65 anthropometric measurements was made at separation centers at the end of World War-II of 3,614 nurses, 4,445 enlisted WAC's and 484 WAC commissioned officers. Mean ages of nurses and enlisted women was slightly over 26 years and of the commissioned WAC's 31 years. Thirty seven percent of the subjects had a high school education, 39% had special training, 20% were reported to have a college education. Unilateral measurements were made on the left side; waist is defined thus: "the tape is placed horizontally around the body at the minimal circumference between the iliac crests and the 12th rib." Waist points are then marked at the level of the tape. Survey 14 is a companion to this survey. Statistics reported here were computed for this report from a thoroughly edited set of raw data and differs somewhat from the values in the 1949 reference. Technical problems with the original punched cards have caused the loss of data for a few foot measurements.

6. WOMEN OF THE AIR FORCE BASIC TRAINEES - 1952

Daniels, Gilbert S., H. C. Meyers, Jr. and Sheryl H. Worrall. Anthropometry of WAF Basic Trainees. WADC TR 53-12, Wright Air Development Center, Wright Patterson Air Force Base, Ohio, 1953.

Sixty-three anthropometric measurements plus age (range 18-34, with 65% of the subjects under the age of 20) were made on 852 women undergoing basic training at Lachland Air Force Base, Texas. The sample is 86% White, 13% Black, and 1% Indian. Fifteen percent were reported as having grade school educations, 76% high school, 7% some college, and 2% special training. Region of birth, marital status, and religion are included in the reference. The report includes mean, standard deviation, range, 25 percentiles, and schematic drawing with detailed description of measurement technique for each variable. Unilateral measurements were made on the right. Waist level was "the natural waistline (minimum circumference)." Survey

17, USAF Basic Trainees-1952, was a companion survey. Statistics presented here were copied from the report.

7. AIR FORCE WOMEN - 1968
8. WAF NURSE OFFICERS
9. ENLISTED WOMEN - WHITE
10. ENLISTED WOMEN - BLACK

Clauser, Charles E. et al. Anthropometry of Air Force Women. Technical Report 70-5, Aerospace Medical Research Laboratories, Wright Patterson Air Force Base, Ohio, 1972.

One hundred thirty-seven anthropometric measurements plus age (range 18-57, with 3/5 of the subjects between 18-21) were made in 1968 on 1905 women in the USAF; 548 subjects were officers, 1216 enlisted White, 131 enlisted Blacks. Included in the officer series were 15 Blacks and 7 "others;" not included in either enlisted series were 10 "others." The officers (in addition to 86 officer trainees) were mainly 1st lieutenants and captains; about 20% had higher and 20% lower ranks. Five out of six of the enlisted series were basic trainees (25%), Airman Basic (31%), or Airman First Class (30%). Considerable background material is included in the survey report plus full summary statistics. Unilateral measurements were made on the right side. Waist level is defined in terms of marks made as follows: "Subject stands. The level of the waist is established using a quarter-inch elastic belt. The subject is asked to place the belt at her 'normal' waist level and fasten it with minimum constriction. The belt is then adjusted, if necessary, to lie in a horizontal plane. Short lines are down along the top of the belt." Statistics given here were computed from the raw data.

11. NATIONAL HEALTH EXAMINATION SURVEY 1962, TOTAL FEMALE POPULATION
12. NATIONAL HEALTH EXAMINATION SURVEY 1962, AGED 25-40

Gordon, Tavia and Henry Miller. Cycle I of the Health Examination Survey: Sample and Response, United States, 1960-1962. Public Health Service Publication No. 1000-Series 11, No. 1, U.S. Government Printing Office, Washington, D.C., 1964.

Stoudt, Howard W., Albert Damon, Ross McFarland, and Jean Roberts. Weight, Height, and Selected Body Dimensions of Adults, United States, 1960-1962. Public Health Service Publication No. 1,000, Series 11, No. 8, U.S. Government Printing Office, Washington, D.C., 1965.

Stoudt, Howard W., Albert Damon, Ross McFarland, and Jean Roberts. Skinfolds, Body Girths, Biacromial Diameter and Selected Anthropometric Indices of Adults, United States, 1960-1962. U.S. Dept. of Health, Education and Welfare Publication No. (HRA) 74-1281. National Center for Health Statistics, Rockville, Maryland, 1970.

Twenty anthropometric measurements were taken between 1959 and 1962 on 3581 women aged 18-79, 1165 of whom were between 25-40 years of age. The sample was scientifically selected from non-institutional civilian adults. Waist circumference was taken at natural waist indentation and unilateral measurements were made on the right side. Surveys #37 and 38 are companion surveys. Values presented here were calculated from the raw data.

13. AIR TRAFFIC CONTROLLERS

Snow, Clyde C. and Richard G. Snyder. Anthropometry of Air Traffic Control Trainees. Report No. AM 65-26, Federal Aviation Agency, Office of Aviation Medicine, Civil Aeromedical Research Institute, Oklahoma City, Okla. 73125, 1965.

Sixty-five anthropometric measurements plus age (range 21-46) were taken in 1960 and 1961 on students enrolled in training programs conducted at the Federal Aviation Aeronautics Center in Oklahoma City. Of the 684 men sampled, 97.5% were Whites and 2.5% were Blacks. The side upon which unilateral measurements were taken is not specified. Waist circumferences were taken at minimum diameter above iliac crest. The report includes mean, standard deviation, eleven percentiles plus picture and description for each dimension. The values presented here were copied from the report or obtained by interpolation between published percentile values.

14. ARMY SEPARATEES - 1946

Randall, Francis E. and Melvyn J. Baer. Survey of Body Size of Army Personnel, Male and Female: Methodology. Report No. 122 (Revised), Environmental Protection Branch, Climatic Research Laboratory, Lawrence, Mass., 1951.

Randall, Francis E. Applications of Anthropometry to the Determination of Size in Clothing. Environmental Protection Series Report #133. Quartermaster Climatic Research Laboratory, Lawrence, Mass., 1948.

Newman, Russell W. and Robert M. White. Reference Anthropometry of Army Men. Report No. 180, Environmental Protection Section, Climatic Research Laboratory, Lawrence, Mass., 1951.

A survey of 65 dimensions on 85,000 male separatees was conducted by the Army at the end of World War II. Data for 43 of the measurements on a subseries of 25,000 whites are reported in the third of the cited references. This subseries consisted of 37% privates and privates first class, 58% non-commissioned officers, and 4% officers; 15% of the subjects were part of the Army Air Force, 50% the Army Ground Force, and 34% the Army Service Force. Ages range from 15 (sic) to "over 40", with about 40% of the subjects being 18 or 19 years old, only 16% were 30 or older and 3% were 35 or older. The report includes means, standard deviations, photographs with a description of measurement techniques, and a small group of bivariate frequency tables. Photographs show unilateral measurements on

the right side. Waist circumference was taken in a place midway between the lowest margin of the ribs laterally and the superior margin of the most lateral part of the iliac crest. Survey #5, WAC Separates-1946, is a companion survey. Values reported here are the published means and standard deviations.

15. ARMY AIR FORCE CADETS - 1942
16. ARMY AIR FORCE GUNNERS - 1942

Randall, Francis E., Albert Damon, Robert Benton, and Donald Patt. Human Body Size in Military Aircraft and Personal Equipment. Technical Report 5501, Army Air Force, Air Materiel Command, Wright Field, Dayton, Ohio, 1946.

Twenty-eight anthropometric measurements were taken on 2961 Cadets and 584 Gunners. Median, range and percentiles and a brief description of each measurement procedure were published. Some unilateral measurements were measured on the right side, some on the left and for several the side was not stated. WAS Pilots 1942, #3, and AAF Nurses, 1942, #4, appear to be more-or-less companion surveys. Values presented here were copied from the report or obtained by interpolation between published percentile values.

17. U.S. AIR FORCE BASIC TRAINEES - 1952

Daniels, Gilbert S., H. C. Meyers, Jr. and Edmund Churchill. Anthropometry of Male Basic Trainees. Technical Report 53-49, Wright Air Development Center, Wright Patterson Air Force Base, Ohio, 1953.

Sixty anthropometric measurements plus age (range 17-36) were taken on 3,331 male basic trainees in July, August, and September 1952 at Lackland, Parks, and Sampson Air Force Bases. Approximately 85% of the sample are White and 14% Black. The report includes mean, standard deviation, range, 25 percentiles and pictures with detailed description of measurement techniques for each variable. Unilateral measurements were taken on the right side. Waist level is at "natural waist line with abdomen relaxed (minimum circumference)." Values presented here were copied from the report.

18. U.S. AIR FORCE FLYING PERSONNEL - 1950

Hertzberg, H. T. E., G. S. Daniels, and Edmund Churchill. Anthropometry of Flying Personnel-1950. Technical Report 52-321, Wright Air Development Center, Wright Patterson Air Force Base, Ohio, 1954.

One hundred thirty-two anthropometric measurements plus age (range 18-45), some sociological data and 4 somatotype photographs were taken on 4063 subjects. The survey was conducted at 14 Air Force Bases which would yield both the desired survey size, aero rating distribution, and geographi-

cal representation of men in the different parts of the U.S. The sample was 99% White and 1% Negro. The report includes mean, standard deviation, range, 25 percentiles and pictures with detailed descriptions of measuring techniques. Unilateral measurement was taken on the right side. Waist level is defined as "natural waist line," the level of greatest lateral indentation in the region of the abdomen. Subsequent to the publication of the survey report, millimeter figures, recorded during the survey but not generally used in the original analyses, were added to the data, the data thoroughly edited, and a few records with incomplete data deleted. Statistics reported here were computed from this modernized set of data.

19. U.S. AIR FORCE SURVEY 1965 - TOTAL SERIES
20. U.S. AIR FORCE SURVEY 1965 - OFFICERS
21. U.S. AIR FORCE SURVEY 1965 - ENLISTED
23. U.S. AIR FORCE SURVEY 1965 - BASIC TRAINEES

Unpublished U.S.A.F. Systems Command Anthropometric Data furnished to Webb Associates, Inc., Yellow Springs, Ohio, by the Aerospace Medical Research Laboratories, Wright Patterson Air Force Base, Ohio, 1965. (Measurement technique and summary statistics are included in Intercorrelations of Anthropometric Measurements by Churchill, Kikta and Churchill, TR 77-1, Aerospace Medical Research Laboratory, Wright Patterson Air Force Base, Ohio (in press)).

This survey was conducted during the spring and summer of 1965; 157 body size dimensions and grip strength were measured. Somewhat over 500 officers and about 800 enlisted men were measured in the early stages of the survey, followed by 2527 trainees at Lackland Air Force Base. Unilateral measurements were made on the right side, and the waist level was defined as umbilicus level. Statistics reported here were calculated from the raw data.

24. NAVY FLIERS

Gifford, Edmund C., Joseph R. Provost and John Lazo. Anthropometry of Naval Aviators-1964. NAEC-ACEL 533, U.S. Naval Air Engineering Center, Philadelphia, PA, 1965.

Ninety-six anthropometric measurements were taken during 1964 at 10 naval and marine corp air stations on 1,549 men, 1,529 of whom had essentially complete sets of data. The report includes mean, standard deviation, range, 25 percentiles, and schematic drawings illustrating measurement techniques. Unilateral measurements were taken on the right side and waist level is shown at omphalion. Values presented here were calculated from the raw data.

25. U.S. AIR FORCE FLYING PERSONNEL 1967 - TOTAL SERIES
26. U.S. AIR FORCE FLYING PERSONNEL 1967 - STUDENT PILOTS
27. U.S. AIR FORCE FLYING PERSONNEL 1967 - RATED PILOTS
28. U.S. AIR FORCE FLYING PERSONNEL 1967 - STUDENT NAVIGATORS
29. U.S. AIR FORCE FLYING PERSONNEL 1967 - RATED NAVIGATORS

Unpublished U.S.A.F. Systems Command Anthropometric data of flying personnel furnished to Webb Associates, Inc., Yellow Springs, Ohio, by the Aerospace Medical Research Laboratories, Wright Patterson Air Force Base, Ohio, 1967. (Measurement definitions are included in Intercorrelations of Anthropometric Measurements by Churchill, Kikta and Churchill. TR 77-1 Aerospace Medical Research Laboratory, Wright Patterson Air Force Base, Ohio (in press)).

This survey, the Air Force's second major anthropometric survey of its flying personnel, was conducted at almost 20 bases throughout the country during the first quarter of 1967. One hundred eighty-six dimensions plus grip strength were measured on a sample of 2420 men, all of whom were officers on active flying status. Rated pilots constituted about half the sample, student pilots and rated navigators both constituted about one-fifth of the sample, and student navigators made up 8% of it; in addition, there were a few flight surgeons. Ninety-eight percent of the total sample were Whites, 1% Blacks, and 1% "other." Twenty eight percent of the total series were second lieutenants, 15% first lieutenants, 35% captains, 15% majors, and 7% lieutenant colonels or colonels. Five percent were born in New England, 18% in the Mid-Atlantic states, 11% in the South-Atlantic region, 17% in the North-Central states, 6% in the East-South Central states, 15% in the West-North Central states, 12% in the West-South Central states, 5% in the mountain states, 8% in the Pacific states, and 2% were foreign born. Age data for the total and subseries are included among the statistical summaries. Unilateral measurements were made on the right side; waist level was taken at omphalion. Statistics reported here were calculated from the raw data.

30. ARMY SOLDIERS - 1966

White, Robert M. and Edmund Churchill. The Body Size of Soldiers: U.S. Army Anthropometry-1966. Technical Report 72-51-CE, U.S. Army Natick Laboratories, Natick, Mass. 01760, 1971.

Seventy anthropometric measurements plus age (range 17-55) were taken on 6682 men stationed at 12 U.S. Army bases between Nov. 1965 and April 1966. The sample included 2639 basic trainees, 3429 infantry, 489 armored personnel and 125 Army Aviation personnel. Most subjects, 6110, were enlisted men, 456 were non-commissioned officers, 30 warrant officers and 85 commissioned officers. The report includes mean, standard deviation, 25 percentiles, frequency distributions, schematic drawings, and detailed descriptions of measurement technique for each variable. Also included is some comparisons of the sub-samples. Unilateral measurements were taken on the right side and waist circumference was taken at omphalion. Survey #31 Navy Enlisted

1966 and #33 Marine Enlisted 1966, taken simultaneously, under the same direction and using the same measurement techniques are companion surveys. Values presented here were calculated from the raw data.

31. NAVY ENLISTED - 1966

Unpublished U.S. Navy anthropometric data on enlisted men furnished to Webb Associates, Inc., Yellow Springs, Ohio, by Robert M. White, U.S. Army Natick Laboratories, Natick, Mass. 01760, 1965. See The Body Size of Soldiers: U.S. Army Anthropometry-1966. (Survey #30) for measurement technique.

Seventy anthropometric measurements plus age (range 17-31) were taken in 1966 on 4095 Navy Enlisted men. Unilateral measurements were taken on the right side and waist circumference was taken at omphalion. The survey was conducted simultaneously, under the same direction, and using the same measurement techniques as survey #30 Army Solders 1966 and survey #33 Marine Enlisted 1966. Statistics presented here were calculated from the raw data.

32. NAVY DIVERS

Beatty, H. T., and T. E. Berghage. Diver Anthropometrics. Report #10-72, Navy Experimental Diving Unit, Washington Navy Yard, Washington, D.C. 20390, 1972.

Fifty-four anthropometric measurements were taken on 100 divers at the Naval School, Diving and Salvage and the Experimental Diving Unit. The report includes mean, standard deviation, 25 percentiles, frequency distributions, regression equations, photographs and detailed descriptions of measurement technique. There is no statement concerning unilateral measurements; the photographs show some on the right side and some on the left. Waist circumference is at umbilicus. Values presented here were copied from the report.

33. MARINE ENLISTED - 1966

Unpublished U.S. Marine anthropometric data on enlisted men furnished to Webb Associates, Inc., Yellow Springs, Ohio, by Robert M. White, U.S. Army Natick Laboratories, Natick, Mass. 01760, 1965. See The Body Size of Soldiers: U.S. Army Anthropometry-1966 for measurement technique.

Seventy anthropometric measurements plus age (range 17-43) were taken in 1966 on 2008 U.S. Marines. 1989 were enlisted and 19 non-commissioned officers. Unilateral measurements were taken on the right side and waist circumference was taken at omphalion. The survey was conducted simultaneously, under the same direction and using the same measurement techniques as

survey #30 Army Soldiers 1966 and survey #31 Navy Enlisted 1966. Statistics presented here were calculated from the raw data.

34. ARMY AVIATORS - 1959

White, Robert M. Anthropometry of Army Aviators. Technical Report EP-150, Environmental Protection Research Division, Quartermaster Research and Engineering Center, Natick, Mass., 1961.

Forty anthropometric measurements plus age (range 20-46) were taken on 500 pilots at three army posts. The report includes means, standard deviations, 9 percentiles, bivariate tables and descriptions of measurement technique. Unilateral measurements were taken on the right side. No description of waist level is given. Values presented here were copied from the report.

35. ARMY HELICOPTER STUDENTS

Schane, W. P., D. E. Littell and C. G. Moultrie. Selected Anthropometric Measurements of 1,640 U.S. Army Warrant Officer Candidate Flight Trainees. USAARL Report No. 69-2, U.S. Army Aeromedical Research Laboratory, Fort Rucker, Ala., 1969.

Nine anthropometric measurements plus age (range 17-38) were taken on 1640 Army Warrant Officer Candidates, at Fort Rucker, Alabama, between January 1967 and August 1968. The report includes means, standard deviations, 25 percentiles, range, bivariate tables, frequency distributions and correlation coefficients. The side upon which unilateral measurements were made is not stated. Values presented here were copied from the report.

36. ARMY AVIATORS - 1970

Churchill, Edmund, John T. McConville, Lloyd L. Laubach and Robert M. White. Anthropometry of U.S. Army Aviators. Technical Report 72-52-CE, Clothing and Personal Life Support Equipment Laboratory, U.S. Army Natick Laboratories, Natick, Mass., 1971.

Data for 85 anthropometric measurements plus age (range 17-59) and several sociomilitary variables were gathered on 1482 flying personnel during the first three months of 1970 at Fort Rucker, Alabama. The sample is composed of 388 enlisted men, 259 warrant trainees, 410 rated pilots (warrant), 186 commissioned trainees, and 234 rated pilots (commissioned). The report includes means, standard deviations, 25 percentiles, range, frequency distributions, photographs and drawings with detailed descriptions of measurement technique, a correlation matrix and subgroup comparisons. Unilateral measurements were taken on the right side and waist circumference at omphalion. Values presented here were calculated from the raw data.

37. NATIONAL HEALTH EXAMINATION SURVEY 1962 - TOTAL MALE POPULATION
38. NATIONAL HEALTH EXAMINATION SURVEY 1962 - MEN AGED 25-40

Gordon, Tavia and Henry Miller. Cycle I of the Health Examination Survey: Sample and Response, United States, 1960-1962. Public Health Service Publication No. 1000, Series 11, No. 1, U.S. Government Printing Office, Washington, D.C., 1964.

Stoudt, Howard W., Albert Damon, Ross McFarland, and Jean Roberts. Weight, Height, and Selected Body Dimensions of Adults, United States, 1960-1962. Public Health Service Publication No. 1,000, Series 11, No. 8, U.S. Government Printing Office, Washington, D.C., 1965.

Stoudt, Howard W., Albert Damon, Ross McFarland, and Jean Roberts. Skinfolds, Body Girths, Biacromial Diameter, and Selected Anthropometric Indices of Adults, United States, 1960-1962. U.S. Dept. of Health Education and Welfare Publication No. (HRA) 74-1281. National Center for Health Statistics, Rockville, Maryland, 1970.

Twenty anthropometric measurements were taken between 1959 and 1962 on 3091 men, aged 18-79, 1012 of whom were between 25-40 years of age. The sample was scientifically selected from non-institutional civilian adult. Waist circumference was taken at natural waist indentation and unilateral measurements were made on the right side. Surveys #11 and #12 are companion surveys. Values presented here were calculated from the raw data.

39. LAW ENFORCEMENT OFFICERS

Martin, James et al. Anthropometry of Law Enforcement Officers. NELC/TD, 442, Naval Electronics Laboratory Center, San Diego, Ca. 92152, 1975.

Data for 23 anthropometric measurements plus age (range 18-65) were gathered in 1973 and 1974 on 2993 law enforcement officers from different regions of the U.S. The survey population included 2060 men from Police Departments, 521 from Sheriffs Departments, 176 from Highway Patrol and 236 Prison Guards. The report includes means, standard deviations, 25 percentiles, frequency distributions, photographs, detailed descriptions of measurement techniques and multiple sub-sample analysis. Unilateral measurements were taken on the right side and waist circumference was taken at omphalion. Values presented here were calculated from the raw data.

40. SLOVAKIAN CIVILIAN WOMEN

Prokopec, M. "Dimensional Characteristics of Men and Women in Czechoslovakia for the Purposes of Industry." In "Ergonomics in Machine Design," Volume I, International Labour Office, Geneva, Switzerland, 1969, pp. 575-593.

Twelve head measurements were made on Slovakian civilian women over the age of 18; for 5 measurements the sample size was roughly 1500, for the remaining 7 it was approximately 360. The report includes mean and standard deviation for each variable, a schematic of the measured dimension and a companion study (see survey #74) of male heads. Values presented here were copied from the report or estimated from the published means and standard deviations.

41. DUTCH CIVILIAN WOMEN

Sittig, J., H. Freudenthal, De Juiste Maat (in Dutch with English summary). N.V. Magazijn "Die Beijenkorf," Uitgegeven Big L. Stafleu, Uitgever Te Leiden, The Netherlands, 1951.

Fifteen anthropometric measurements plus age (range 18-82) were taken on 5001 women customers of a group of Dutch department stores. Included in this report are frequency tables and photographs showing measurement technique. The measurements were taken over clothing. The photographs indicate unilateral measurement being taken on the right side and waist level at natural belt level. Values presented here were calculated from the published frequency distributions.

42. GERMAN OFFICE WORKERS

Peters, Von T. "Anthropometrische und Physiologische Grundlagen zur Gestaltung von Büroarbeitssitzen" (in German). Ergonomics, 12(2): 162-170, 1969.

Ten anthropometric standing and sitting dimensions were measured from the right and left side (where relevant) and with subject erect and relaxed on 1166 female office workers. The report includes means, standard deviations and illustrations showing the dimensions measured. We have reported the measurements taken in the upright position and on the right side. Values presented here are copied from the report or estimated from the published means and standard deviations.

43. ENGLISH CIVILIAN WOMEN

Kemsley, W. F. F. Women's Measurements and Sizes. Cheltenham Press Ltd., Cheltenham, England, 1957.

Thirty seven anthropometric measurements plus age (range 18-70) were taken on 4995 English employees of business firms and members of women's organizations between February and June 1951. The report includes frequency distributions, means and standard deviations for specific age groups and the total sample, a correlation matrix, photographs, drawings, and detailed descriptions of measurement techniques. The measurements (where relevant) were taken over foundation garments. Unilateral measurements were made

on the right side. Waist level is defined as "the upper border of an elastic cord placed around the subject's waist." The values presented here were calculated from the published frequency tables.

44. SWEDISH CIVILIAN WOMEN

Ingelmark, B. E. and T. Lewin. "Anthropometrical Studies on Swedish Women." Acta Morphologica, Neerlando-Scandinavica, III(2):145-166, 1968.

Fifty-four anthropometric measurements plus age (range 20-49) were taken on 216 Swedish women. The population consisted of 104 women, 20-24 years of age who were mostly student nurses and medical students and 112 women, 25-49 years of age, who were hospital nurses, physiotherapist and occupational therapists. The report includes means, standard deviations, and schematic drawings showing landmarks for some of the dimensions measured. Values presented here were copied from the report or estimated from the published means and standard deviations.

45. AUSTRALIAN PILOTS/FEMALE

Bullock, Margaret I., and Margaret A. Steinberg. Arm Reach Boundaries for Cockpit Control Operation. Aviation Medicine Memorandum No. 31, Aviation Medicine Branch, Dept. of Civil Aviation, Melbourne, Vic 3001, Australia, 1973.

Seventeen anthropometric measurements plus age (range 17-46) were taken on 75 Australian females who had a commercial or private pilot license. The anthropometry was part of a study of Arm Reach Boundaries for cockpit control operation. The report includes mean, standard deviation, 9 percentiles and detailed description of measurement techniques for each variable. Survey #76 is a companion survey of 75 male pilots. Several dimensions were measured on both the right and left sides. For these dimensions, we have reported the data for the right side. The statistics presented here were copied from the report or obtained by interpolation between published percentile values.

46. JAPANESE CIVILIAN WOMEN

Yanagisawa, Sumiko. About Japanese Physique and Body Girth (in Japanese). Department of Home Economics, Ochanomizu Institute, Women's University, Bunkyo-Ku, Tokyo, Japan, 1974.

Forty-one anthropometric measurements were taken on approximately 9000 men and women age 25-65. The women were predominantly housewives and the men light laborers. The report include mean and standard deviation for each dimension grouped into 8 age subgroups. Values presented here are for the 25-39 year old women only and are based on the published means and standard deviations. See survey #79 for the male population.

47. SWEDISH INDUSTRIAL WORKERS/FEMALE

Lewin, T. "Anthropometric Studies on Swedish Industrial Workers When Standing and Sitting," Ergonomics, 12(6):883-902, 1969.

Thirty-seven anthropometric measurements were taken on 77 women, aged 25-49, who were employed at the Swedish Ball-Bearing Co. The report includes mean, standard deviation and range for each variable plus schematic drawings showing the seated measurements taken. Waist height was taken at umbilicus. The side upon which unilateral measurements were taken is not stated. Survey #88 is a companion survey conducted on 87 males. Values presented here were copied from the report or estimated from the published means and standard deviations.

- 48. NATO SURVEY - 1960/61
- 49. TURKISH MILITARY - 1960
- 50. GREEK MILITARY - 1961
- 51. ITALIAN MILITARY - 1961

Hertzberg, H. T. E., Edmund Churchill, C. Wesley Dupertuis, Robert M. White and Albert Damon. Anthropometric Survey of Turkey, Greece, and Italy. AGARDograph No. 73, The Macmillan Co., New York, N.Y., 1963.

One hundred fifty anthropometric measurements plus age (range 17-59) were taken in 1960 and 1961 on 3356 NATO military personnel (915 Turks, 1084 Greeks and 1357 Italians). The report includes means, standard deviations, 25 percentiles, photographs, schematic drawings, and detailed descriptions of measurement techniques. Unilateral measurements were taken on the right side. Waist level is defined at omphalion. Additional editing of the data has been done since the publication of the survey report and the statistics presented here are based on these newly edited data and on slightly fewer data records.

52. BANTU MINERS

Morrison, J. F., C. H. Wyndham, N. B. Strydom, J. J. Bettencourt and J. H. Viljoen. "An Anthropometrical Survey of Bantu Mine Laborers." J. of the South African Inst. of Mining and Metallurgy, 68:275-279, 1968.

Seventy-two anthropometric measurements were taken on a sample of 485 Bantu mine laborers from various geographical regions. The results are given in a table which includes mean, standard deviation, and 5th, 50th, and 95th percentiles for each variable. The measuring technique is described as the method used by Hertzberg et al., Anthropometry of Flying Personnel (see survey #18). Values presented here were copied from the publication.

53. FRENCH ARMY
54. FRENCH PILOTS
55. FRENCH STUDENT PILOTS
56. FRENCH NAVY I
57. FRENCH NAVY II

Anonymous. Etude Anthropometrique des Personnels Militaires des Armees (in French). Anthropologie Appliquee, 45 rue des Saints-Peres, Paris, 6e, France, 1973.

One hundred thirty-eight anthropometric measurements plus age, and sociological data were taken on 1272 French military subject from the Army, Air Force and Navy. The subgroups included are: Army N=794, age range=17-48; AF Pilots N=65, age range=27-32; AF Student Pilots N=101, age range=16-21; Navy I, N=212, age range=17-43; Navy II, N=100, age range=17-43. Many measurements were duplicated on unclothed and fully equipped subjects. Results presented are means, standard deviations, 9 percentiles, schematic drawings and descriptions of measurement techniques. Waist level is at omphalion. The drawings indicated unilateral measurements were taken on the right side. Values presented here are the unclothed values and were copied from the report.

58. GERMAN TANKERS

Goltz, Eckard and Bernhard Platz. Anthropometric Study. Report No. T-418, translated from the German by General Motors Corporation, Military Vehicles Organizations, 1965.

Thirteen anthropometric measurements plus age (range 19-32) were made during July 1965 on 300 subjects from German tank crews: 100 tank commanders, 100 drivers, and 100 gunners. The measurements were taken at various locations and on various units in order to obtain a representative sample. For each variable the report includes a frequency table, schematic drawing and description of measurement technique. Unilateral measurements were taken on the right side. Values presented here were calculated from the published frequency tables.

59. GERMAN AVIATORS

Grunhofer, H. J. and G. Kroh. A Review of Anthropometric Data of German Air Force and United States Air Force Flying Personnel 1967-1968. AGARD-AG-205, Advisory Group for Aerospace Research and Development, 7 Rue Ancelle, 92200 Neuilly sur Seine, France, 1975.

One hundred fifty-three anthropometric measurements were taken on 1465 German Air Force flying personnel during 1967 and 1968. The published results included means, standard deviations, 25 percentiles, frequency distributions, schematic drawings, description of measurement techniques and a correlation matrix. Waist level is defined at omphalion. Unilateral measurements were made on the right side. Statistics presented here are based

on the subjects measured during 1967, the first of the two years in which the survey was conducted. They were calculated from the raw data.

60. GERMAN 20 YEAR OLDS

Jurgens, H. W., D. Habicht-Benthin and W. Lengsfeld. Korpermasse 20-jahriger Manner als Grundlage fur die Gestaltung von Arbeitsgerat, Austrustung und Arbeitsplatz (in German). BMVg-FBWM 71-2, Ministry of Defense, Documentation Center, Military Affairs Dept., 53 Bonn, Friedrich Ebert Allee 32, Germany, 1970.

Forty-three anthropometric measurements were taken in 1968 and 1969 on 7144 20 year old men who were liable to military service in Germany. The report includes mean, standard deviation, 13 percentiles, schematic drawing, description, and measurement technique for each variable. Waist is described as the smallest circumference of the abdomen. Drawings indicate unilateral measurements were made on the right side. Values reported here were copied from the report with some interpolations among the percentiles.

61. GERMAN 25-40 YEAR OLDS

Jurgens, H. W., K. Helbig and W. Lengsfeld. Body Measurements of 25-40 Year-Old Men upon Examination of the Anthropometric-Ergonomic Significance of Aging on Changes in Body Shape (in German). Research Contract BMVg InSan Nr. 3571-V-072, Ministry of Defense, Documentation Center, Military Affairs Dept., 53 Bonn, Freidrich Ebert Alee 32, Germany, 1972.

Fifty-four anthropometric measurements were taken in 1970 and 1971 on 2643 personnel of all German military services between 25 and 40 years of age. The report includes mean, standard deviation, 13 percentiles, and a schematic drawing with description of measurement technique for each variable. The German 20 year olds (survey #60) is used for comparsion purposes. Waist is described as the smallest circumference of the abdomen. Drawings indicate unilateral measurements were made on the right side. Values presented here were copied from the report with some interpolations among the percentiles.

62. CANADIAN MILITARY - 1974

McCann, C., I. Noy, B. Rodden and O. Logan. 1974 Anthropometric Survey of Canadian Forces Personnel. DCIEM Report No. 75-R-1114, Defense and Civil Institute of Environmental Medicine, Downsview, Ontario, 1975.

Thirty-two anthropometric measurements plus age (92% of the population ranged between 20 and 50) were taken in 1974 on 565 personnel representing all major trades in the Canadian Forces. The results are presented in the form of mean, standard deviation, 25 percentiles, frequency distribution

graph and a photograph with detailed description of measurement technique for each variable. A correlation matrix and selected bivariates are also included. Unilateral measurements were taken on the right side. Waist circumference was taken twice, at omphalion and at natural waistline. We have reported the values for waist circumference at omphalion. Waist height was taken at natural waistline. Values presented here were copied from the report.

- 63. CANADIAN STUDENT - PILOTS
- 64. CANADIAN STUDENT - OBSERVERS

Smiley, J. R. AGARD Body Measurements of 1578 RCAF Aircrew Trainees. IAM Report #58/1, Institute of Aviation Medicine, 1107 Avenue Road, Toronto, Ontario, Canada, 1958.

Seven anthropometric measurements were taken in 1955 on 998 pilot trainees and 580 observer trainees. The results are presented in the form of mean, standard deviation, nine percentiles and range for each variable. A correlation matrix is also included. The side upon which unilateral measurements were taken is not stated. Values presented here were copied from the report.

- 65. ROYAL ARMOURED CORPS

Ince, N. E., S. Redrup and J. Piper. Anthropometry of 500 Royal Armoured Corps Servicemen 1972. Report No. 36/73, Royal Aircraft Establishment, Farnborough, Hants, England, 1973.

Ninety-six anthropometric measurements plus age (range 17-39) were taken in 1972 on 500 randomly selected Royal Armoured Corps soldiers. The report includes mean, standard deviation, 25 percentiles, range, and a schematic drawing with detailed description of measurement technique for each variable. Some unilateral measurements were taken on the right side and some on the left. Waist is described as natural waist indent. Values presented here were copied from the report.

- 66. ROYAL AIR FORCE

Bolton, C. B., M. Kenward, R. E. Simpson and G. M. Turner. An Anthropometric Survey of 2,000 Royal Air Force Aircrew 1970,71. TR 73083, Royal Aircraft Establishment, Farnborough, Hants, England, 1973.

Sixty-five anthropometric measurements plus age (range 18-45) were taken in 1970 and 1971 on 2000 Royal Air Force aircrew including all ranks below group captain. The sample consisted of 1028 pilots, 613 navigators and 359 other flight deck aircrew. The results are reported in terms of mean, standard deviation, 25 percentiles, range, a photograph, and a schematic drawing with detailed description of measurement technique for each

variable. Waist height and waist circumference were measured at trouser waist band level for most subjects; the statistics reported here refer to measurements made at that level. Unilateral measurements were made on the left side. Values reported here were calculated from the raw data.

67. ROYAL AIR FORCE AND ROYAL NAVY AIRCREW

Simpson, R. E. and C. B. Bolton. An Anthropometric Survey of 200 R.A.F. and R.N. Aircrew and the Application of the Data to Garment Size Rolls. TR 67125, Royal Aircraft Establishment, Farnborough, Hants, England, 1968.

Forty-four anthropometric measurements plus age (range 19-45) were taken on 200 Royal Air Force and Royal Navy aircrew during the Phantom Aircrew Equipment fitting trials held at the RAF Institute of Aviation Medicine in October and November 1966. The results are presented in the form of mean, standard deviation, 25 percentiles, range, photograph, and detailed description of measurement technique for each variable. Waist is described as natural waistline. Some unilateral measurements are shown on the right and some on the left. Values presented here were copied from the report.

68. ROYAL CANADIAN AIR FORCE PILOTS
69. ROYAL CANADIAN AIR FORCE NAVIGATORS

Anonymous. RCAF Anthropometrical Survey. Defense Documentation Center, Defense Supply Agency, Cameron Station, Alexandria, Va., 196162.

Sixty-eight anthropometric measurements were taken on Royal Canadian Air Force personnel; 314 pilots and 290 navigators. The report includes mean, standard deviation, and 35 percentiles for each variable. Values presented here are copied from the report.

70. ROYAL NEW ZEALAND AIR FORCE

Toulson, P. K. Report on the Anthropometric Survey of RNZAF Aircrew. Report No. AMU 3/74, Aviation Medicine Unit, Royal New Zealand Air Force, Auckland, New Zealand, 1974.

Sixty-two anthropometric measurements plus age (range 18-49) were taken between October 1972 and July 1973 on 238 members of the Royal New Zealand Air Force. The resulting sample consisted of 127 pilots, 38 navigators, and 73 other aircrew. The report includes mean, standard deviation, 20 percentiles, range, frequency graph, and a photograph with detailed description of measurement technique for each variable. Unilateral measurements were taken on the left side. Waist level was measured at the level located by the subject for subjects 1-39 and at the natural waist indent for subjects 40-238. Values presented here were copied from the report or estimated from the published means and standard deviations.

71. ROYAL AUSTRALIAN AIR FORCE CADETS
72. ROYAL AUSTRALIAN AIR FORCE RATED (TRAINED)

Anonymous. RAAF Anthropometry Survey. Report No. TS 1614, Royal Australian Air Force, Aircraft Research and Development Unit, Laverton, Australia, 1973.

Eighteen anthropometric measurements were made between November 1971 and September 1972 on 482 Australian aircrew: 97 cadets, and 385 rated personnel. Summary statistics included in the report are the mean, standard deviation, two percentiles, and a histogram showing the frequency distribution for each variable. A detailed description of measurement technique is also given for each variable. Unilateral measurements were taken on the right side. Waist level is defined as level of umbilicus. Values presented here were copied from the report or estimated from the published mean and standard deviation.

73. CZECHOSLOVAKIAN LUMBERMEN

Prokopec, M. "Dimensional Characteristics of Men and Women in Czechoslovakia for the Purposes of Industry." In: Ergonomics in Machine Design, Vol. I, International Labour Office, Geneva, Switzerland, 1969, pp. 575-593.

Twenty-seven anthropometric measurements were taken on 1110 Czechoslovakian lumbermen between 25 and 45 years of age. The report includes mean and standard deviation for each variable and a schematic drawing illustrating the measurements taken. Values presented here were copied from the report or estimated from the published means and standard deviations.

74. SLOVAKIAN CIVILIAN MALES

Prokopec, M. "Dimensional Characteristics of Men and Women in Czechoslovakia for the Purposes of Industry." In: Ergonomics in Machine Design. Vol. I, International Labour Office, Geneva, Switzerland, 1969, pp. 575-593.

Twelve head measurements were made on Slovakian civilian males over the age of 45. For 5 measurements the sample size was about 390, for the other 7 measurements it was approximately 90. The report includes mean and standard deviation for each variable, plus a schematic drawing of the measured dimensions, and a companion study of female heads (survey #40). Values presented here were copied from the article or estimated from the published means and standard deviations.

75. LATIN AMERICAN ARMED FORCES

Dobbins, D. A. and C. M. Kindick. Anthropometry of the Latin American Armed Forces. Report No. 7209002, U.S. Army Tropic Test Center, Fort Clayton, Canal Zone, 1972.

Seventy-five measurements were made on airmen, 1852, or army personnel, 133, from various Latin American countries while students at the USAF Inter-American Air Forces Academy, Fort Clayton, Canal Zone during the period 1965-1970. Eighteen countries are included in the list of countries of longest residence: 10 South American, 6 Central American (including Panama), and one Caribbean country. The largest group was from Chile: 411, a few more than 200 subjects were from both Columbia and Ecuador; and between 100 and 200 from four countries: Bolivia, Panama, Peru, and Venezuela. Almost all subjects spoke Spanish and virtually all spoke Spanish or Portuguese or both. Two-thirds were listed as enlisted men, 30% as NCO's, and 6% as cadets or civilians. The report includes 11 percentiles, range and description of measurements taken. Unilateral measurements were taken on the right side. Waist point is described as "just above the level of the navel." Values presented here were copied from the report or estimated from the published percentiles.

76. AUSTRALIAN PILOTS/MALE

Bullock, Margaret I., and Margaret A. Steinberg. Arm Reach Boundaries For Cockpit Control Operation. Aviation Medicine Memorandum No. 31, Aviation Medicine Branch, Dept. of Civil Aviation, Melbourne, Vic 3001, Australia, 1973.

Seventeen anthropometric measurements plus age (range 18-62) were taken on 75 Australian males who had a commercial or a private pilot's license. The anthropometry was part of a study of arm reach boundaries for cockpit control operation. The report includes mean, standard deviation, nine percentiles, and detailed description of measurement technique for each variable. Survey #45 is a companion survey of 35 female pilots. Several dimensions were measured on both the right and left sides. We have presented the data for the right side. The statistics given here were copied from the report with some interpolations among the percentiles.

77. FRENCH YOUNG MEN

Coblentz, A. and G. Ignazi. Etude Cephalometrique de Jeunes Français (in French). Anthropologie Applique, 45 Rue des Saints-Peres, Paris-6, France, 2 volumes, 1968.

Sixty-seven head and face measurements plus age (range 17-22 plus) were taken on 2000 young Frenchmen in 1967. Included in the report are mean, standard deviation, range, and a schematic drawing with detailed

description of measurement technique for each variable. Values presented here were copied from the report or estimated from the published means and standard deviations.

78. SOUTH AFRICANS

Strydom, N. B., J. F. Morrison, C. H. van Graan, J. H. Viljoen and A. J. A. Heyns. "Functional Anthropometry of White South African Males." South African Medical Journal, 42:1332-1335, 1968.

Fifty-seven anthropometric measurements plus age (range 17-61) were taken on a military population of 1449 South African Caucasian males. The sample includes 226 army technicians and instructors, 210 air force pilots and technicians, 220 naval personnel, 228 administrative staff, and 559 trainees. The report includes mean, standard deviation and three percentiles for the total group and for various age groups. Values presented here are those for the total survey population and were copied from the report.

79. JAPANESE CIVILIAN MEN

Yanagisawa, Sumiko. About Japanese Physique and Body Girth. Department of Home Economics, Ochanomizu Institute, Women's University, Bunkyo-Ku, Tokyo, Japan, 1974.

Forty-one anthropometric measurements were taken on approximately 9,000 men and women age 25-65. The women were predominantly housewives and the men light laborers. The report included mean and standard deviation for each dimension grouped into eight age subgroups. Values presented here are for the 25-39 year old men only and were estimated from the published means and standard deviations. See survey #46 for the female population.

80. JAPANESE AIR FORCE - TOTAL SERIES

81. JAPANESE AIR FORCE - PILOTS

82. JAPANESE AIR FORCE - NAVIGATORS

Yokohori, E. Anthropometry of JASDF Personnel and Its Application for Human Engineering (in Japanese). Aeromedical Laboratory, Japanese Air Self Defense Force, Tachikawa Air Base, Tokyo, Japan, 1972.

One hundred and eight anthropometric measurements were taken on 1176 members of the Japanese Air Force. The total group apparently consists of the pilots, 210, and navigators, 538, plus somewhat fewer than 200 students and about 250 "other." Mean ages are 29.8 for the pilots, 25.5 for the navigators, 20.3 for the students, 26.6 for the "others," and 25.7 years for the total series. Measurement names and a few statistical symbols are given in Latin characters, making the statistical tables accessible to the Western reader. The report included mean, standard deviation, 21 percentiles, and a schematic drawing and photograph for each variable. Photographs

and drawings indicate that unilateral measurements are made on the right side; the photograph of waist circumference shows it being taken at omphalion. Values presented here were copied from the report.

83. JAPANESE PILOTS

Oshima, M. et al. Anthropometry of Japanese Pilots. TR 65-74, Aerospace Medical Research Laboratories, Wright Patterson Air Force Base, Ohio, 1965.

Sixty-two anthropometric measurements plus age (range 20-29) were taken on 239 pilots of the Japanese Air Self-Defense Force in 1961 at five different bases in Japan. Data reported include the mean, standard deviation, 25 percentiles and schematic drawing showing measurement technique. Some unilateral measurements are shown on right side and some on left. Waist circumference is shown at umbilicus. Values presented here were copied from the report.

84. THAI MILITARY

White, Robert M. Anthropometric Survey of the Royal Thai Armed Forces. U.S. Army Natick Laboratories, Natick, Mass., 1964.

Fifty-one anthropometric measurements plus age (range 17-52) were taken between October 1962 and March 1963 on 2950 Thai military consisting of 2010 army, 610 marine, 2330 air force personnel. The report includes mean, standard deviation, nine percentiles, a schematic drawing and description of measurement technique for each variable. Waist circumference was taken at umbilicus but waist height was measured to the top of the hip bone. Unilateral measurements were made on the right side. Survey #85 is a companion survey taken on the Armed Forces of Vietnam. Values presented here were copied from the report.

85. VIETNAM MILITARY

White, Robert M. Anthropometric Survey of the Armed Forces of the Republic of Vietnam. U.S. Army Natick Laboratories, Natick, Mass., 1964.

Fifty-one anthropometric measurements plus age (range 18-53) were taken during June 1963 on 2129 Vietnam military consisting of 1225 army, 299 navy, 301 marine and 304 air force. The report includes mean, standard deviation, nine percentiles, a schematic drawing and description of measurement technique for each variable. Waist circumference was taken at umbilicus but waist height was measured to the top of the hip bone. Unilateral measurements were made on the right side. A companion survey was taken on the Thai military (see survey #84). Values presented here were calculated from the raw data.

86. REPUBLIC OF KOREA AIR FORCE (ROKAF) PILOTS

Kay, W. C. "Anthropometry of Republic of Korea Air Force Pilots." Journal of Aviation Medicine, R.O.K. Air Force, 9(1):61-113, 1961.

One hundred thirty-two anthropometric measurements were made on 264 South Korean Air Force pilots aged 23-36. This survey was designed to parallel the USAF 1950 survey of flying personnel. The survey report was published in 1961 but the actual data of the survey is not included in the English summary; it is doubtful that the survey was conducted much before 1961. The report includes mean, standard deviation, 25 percentiles and range for each variable plus schematic drawings showing the dimensions measured. The unilateral measurements were presumably made on the right side and the "natural waist level" was used for waist measurements. Values presented here were copied from the report.

87. KOREAN FORCES-1965

Hart, G. L., G. E. Rowland and Robert Malina. Anthropometric Survey of the Armed Forces of the Republic of Korea. TR EPT-7, Pioneering Research Laboratory, U.S. Army, Natick Laboratories, Natick, Mass., 1967.

Fifty-nine anthropometric measurements plus age (range 17-41) were taken between May and November 1965 on 3,747 Korean military, consisting of 3,249 army, 190 air force, 141 navy, and 167 marine. The report includes mean, standard deviation, and 11 percentiles for each variable plus schematic drawings showing dimensions measured and detailed descriptions of measurement technique. Waist circumference is at umbilicus. Unilateral measurements were taken on the right side. Values presented here were copied from the report.

88. SWEDISH INDUSTRIAL WORKERS/MALE

Lewin, T. "Anthropometric Studies on Swedish Industrial Workers When Standing and Sitting." Ergonomics, 12(6):883-902, 1969.

Thirty-seven anthropometric measurements were taken on 87 men, aged 25-49, who were employed at the Swedish Ball-Bearing Co. The report includes mean, standard deviation, and range for each variable plus schematic drawings showing the seated measurement taken. Waist height was taken at umbilicus. Survey #47 is a companion survey was conducted on 77 women. Values presented here were copied from the report or estimated from the published means and standard deviation.

89. SWEDISH AVIATORS

Andrae, B., J. Ekmark and H. Laestadius. Anthropometry of Flying Personnel in the Royal Swedish Air Force. Library Translation No. 1502, Royal Aircraft Establishment, Farnborough, Hants, England, 1971.

Thirteen anthropometric measurements were taken during 1967 and 1968 on 240 Swedish flying personnel born in 1925-1927, 1939-1940, and 1944. The report includes mean, standard deviation, range and description of measurement technique for each variable for each age group. We have combined the data for the three age groups into one group with age range of 23-40 years. Values presented here were estimated from the published means and standard deviations.

90. IRANIAN MILITARY

Noorani, S. E. and C. N. Dillars, Jr. Anthropometric Survey of the Imperial Iranian Armed Forces, Data Collection and Analysis, Volumes I and II. Technical Report of the Combat Research and Evaluation Center, Imperial Iranian Ground Forces, Teheran, Iran, 1970. (Published in both English and Farsi editions.)

Ninety-seven anthropometric measurements plus age (range 18-60) were taken between November 1968 and March 1969 on 9,414 men in the Iranian Armed Forces, consisting of 7,884 army, 790 air force and 740 navy. The report includes mean, standard deviation, 25 percentiles, range, frequency distribution and a schematic drawing with detailed description of measurement technique for each variable. Also included are 198 bivariate tables. Waist circumference was taken at umbilicus. Unilateral measurements were taken on the right side. Values presented here were copied from the report.

91. AUSTRALIAN ARMY - 1969

Anonymous. Australian Army Anthropometric Survey: Body Dimensions 1970. Headquarters, Army Inspection Service, Melbourne, Australia, 1970.

Twenty-six anthropometric measurements plus age (range 16-47) were taken in 1969 on 3,695 Australian military personnel. The report includes 9 percentiles, a distribution graph, a frequency table, and detailed descriptions of measurement technique for each variable. Waist circumference was taken in a plane midway between the lowest margin of the ribs and the highest point of the iliac crest. Values presented here were copied from the report.

DEFINITION OF MEASUREMENTS

All the variables listed in this volume are defined in this section, though the reader is cautioned not to construe these definitions as precise descriptions of measuring techniques which often vary from survey to survey. To keep the length of this index within reasonable limits, we have used several conventions in preparing the definitions. These are as follows:

Position of the Subject

Most of the measurements were made with the subject in one of three positions: standing erect, sitting erect, or standing under a headboard. Only when the subject's position was important and he was measured in a position other than one of these three is the position described in this index. The three basic positions are as follows:

- (1) Standing, erect. The usual position if no position is specified and the word sitting does not appear either in the measurement name or in the definition is this: the subject stands erect, looking straight ahead (head in the Frankfort plane), heels together, weight distributed equally on both feet, and with his arms hanging naturally at his sides.
- (2) Sitting, erect. The usual position if the word sitting appears either in the measurement name or in the definition is this: the subject sits erect, looking straight ahead (head in the Frankfort plane), upper arms hanging relaxed, forearms and hands extended forward horizontally, thighs parallel, and the feet resting on a surface adjusted so that the knees are flexed 90°.
- (3) Headboard measurements. The numerous head and face measurements labelled as "to Wall" or "to Top of Head" were usually (except in 18. USAF Flying Personnel 1950) made with the headboard: the subject stands erect under the headboard, looking straight ahead. The headboard is adjusted so that its vertical and horizontal planes are in firm contact with the back and the top of the head.

The Side of the Body

All one-sided measurements were made on the right side of the body, unless the left side is especially specified, except for the 1946 WAC survey in which they were made on the left side. Measurements made on the opposite side usually include "II" as part of their names as, for example, Biceps Circumference, Flexed, II.

Heights, Breadths, Depths, Circumferences, and Arcs

Heights, breadths, and depths are straight line measurements made with an anthropometer, calipers, or a similar instrument. Lengths are measured similarly unless the word tape is specified. Circumferences and arcs are tape measurements.

- (1) A standing height is the vertical distance from a specified point on the body to the floor.
- (2) A sitting height is the vertical distance from a specified body point to either the sitting surface or the footrest surface as stated in the definition.
- (3) A torso breadth is the horizontal distance measured from a specified point on the right side of the body to the same point on the left side.
- (4) Limb breadths are measured across the limb from its medial to its lateral edge.
- (5) A torso depth is a horizontal measurement measured in a sagittal plane from the front to the rear of the body.
- (6) Torso circumferences are normally measured in a horizontal plane.
- (7) Limb circumferences are normally measured in a plane perpendicular to the long axis of the relevant limb segment.

DEFINITIONS OF MEASUREMENTS

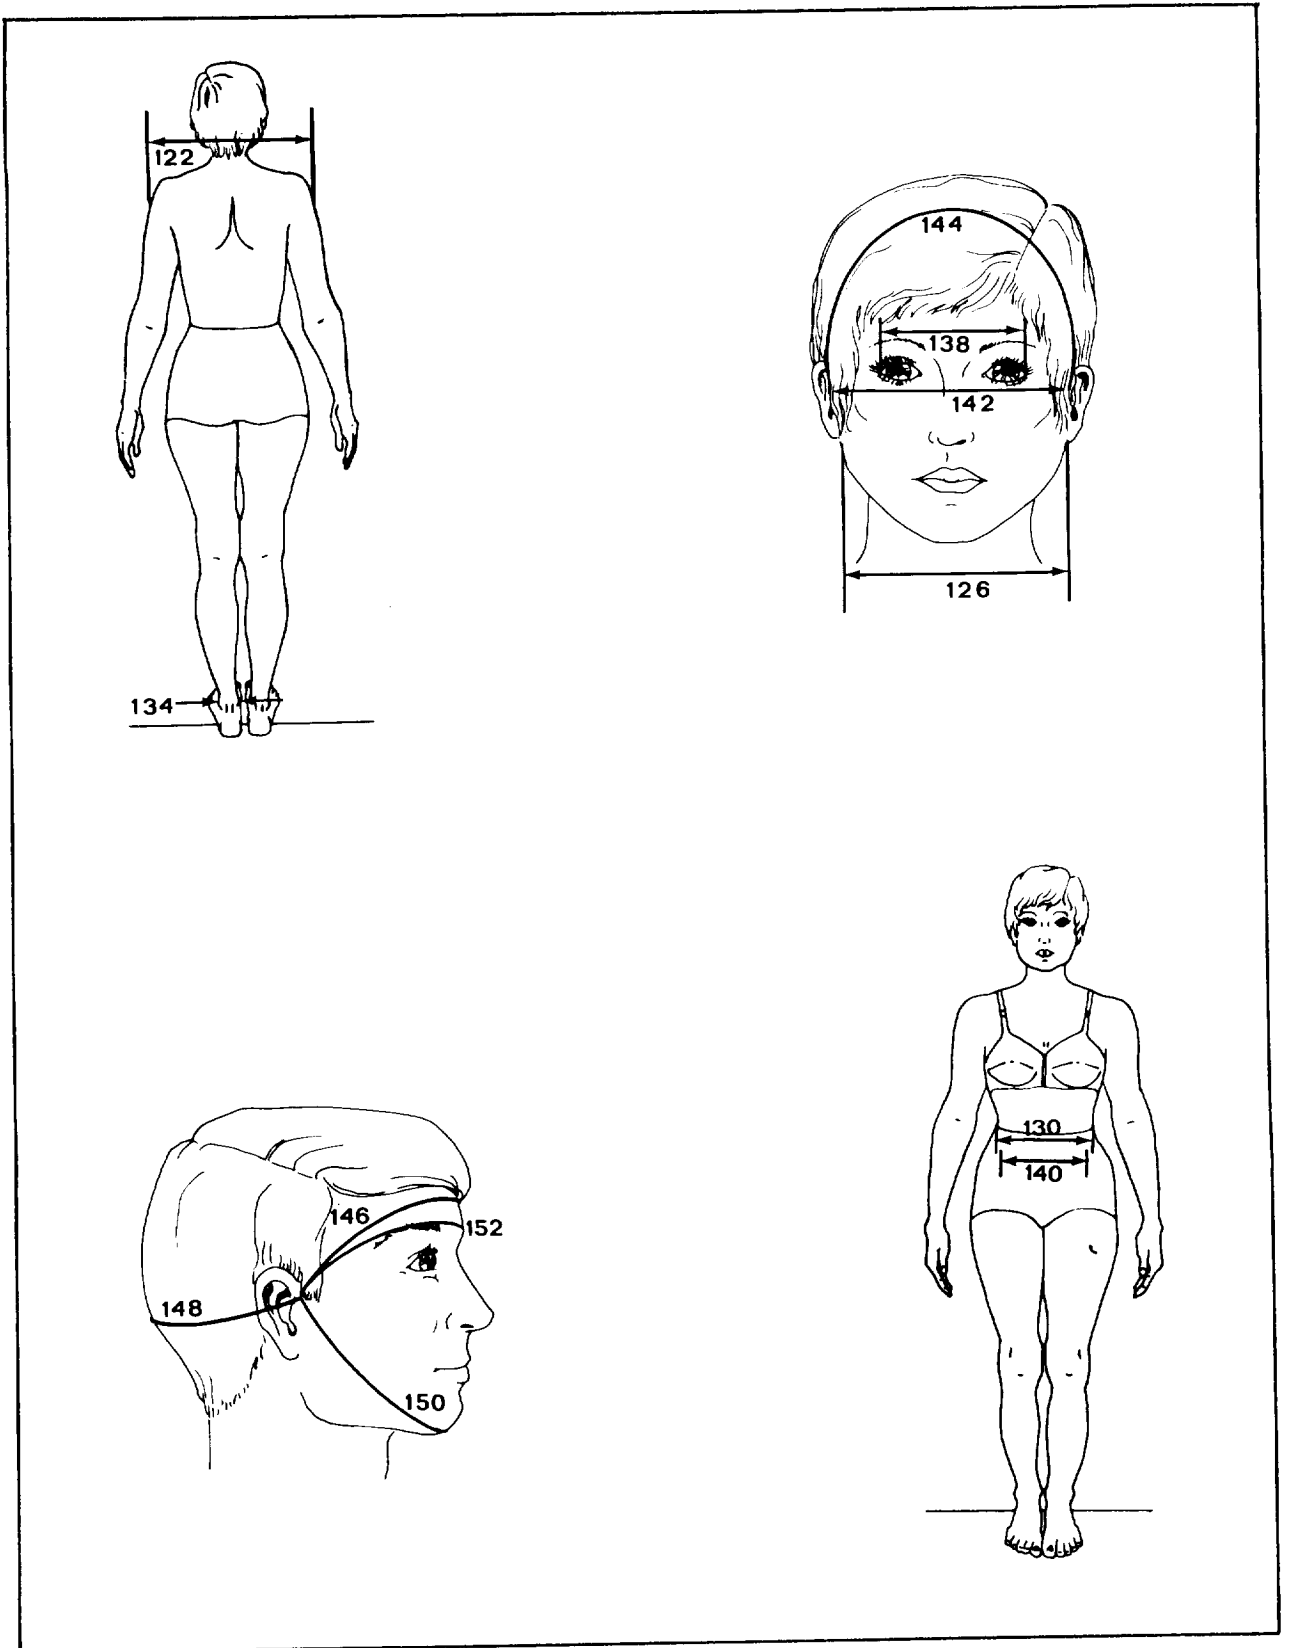

6. Abdominal Depth, Sitting. The depth of the abdomen.
8. Abdominal Extension Circumference. The circumference of the lower torso at the level of the maximum anterior protrusion of the abdomen.
9. Abdominal Extension Circumference, Over Foundation Garment. The preceding measurement repeated with the subject wearing a foundation garment. (Not pictured)
10. Abdominal Extension Depth. The depth of the lower torso at the level of the maximum anterior protrusion of the abdomen.
14. Abdominal Extension Depth, Over Foundation Garment. The preceding measurement repeated with the subject wearing a foundation garment. (Not pictured)
18. Abdominal Extension Height. The height of the maximum anterior protrusion of the abdomen.
19. Abdominal Extension Height, Over Foundation Garment. The preceding measurement repeated with the subject wearing a foundation garment. (Not pictured)
20. Abdominal Extension to Wall. The vertical distance from the most laterally protruding point of the abdomen to a wall against which the subject stands with minimal wall-buttock contact.
23. Acromial Height. The height of the acromion.
25. Acromial Height, Sitting. The height of acromion above the sitting surface.
30. Acromion to Biceps Circumference-Level Length. The surface distance along the outer edge of the arm from acromion to the biceps circumference level.
32. Acromion to Dactylion Length. The vertical distance from acromion to the tip of the middle finger.
39. Acromion-Radiale Length. The distance from acromion to radiale.
48. Age. The age, as of the previous birthday, as reported by the subject, to which 0.5 years was added. (Not pictured)

58. Ankle Circumference. The minimum circumference of the leg just above the ankle bones.
64. Ankle Height. The height of the level of minimum circumference of the leg.
72. Anterior Neck Length. The surface distance from suprasternale to the junction, in the midsagittal plane, of the jaw and the neck.
74. Anterior Waist Length. The surface distance from the most anterior point of the lower neck to waist level.
80. Arm Reach from Wall. The distance from the wall to the tip of the middle finger measured with the subject's shoulders against the wall, his hand and arm extended forward.
89. Axillary Arm Circumference. The circumference of the arm measured high in the armpit.
90. Axilla Height. The height of the armpit.
91. Axilla to Waist Length. The surface distance from the armpit to waist level.
93. Back Curvature. The tape distance across the back as measured from the point on the right side in the midaxillary plane at chest level to the similar left point.
97. Ball-of-Foot Circumference. The maximum circumference of the foot measured around the distal ends of the protuberances of the metatarsal bones.
103. Biacromial Breadth. The distance across the shoulders from right to left acromion.
107. Biauricular Breadth. The distance from the most lateral point of the right ear to the same point of the left ear.
111. Biceps Circumferences, Flexed. The maximum circumference around the biceps measured with the arm bent 90° , the upper arm horizontal, and the fist clenched.
112. Biceps Circumference, Flexed, II. The preceding measurement repeated on the opposite arm. (Not pictured)
113. Biceps Circumference, Relaxed. The maximum circumference of the arm at the level of the biceps measured with the arm hanging relaxed.
114. Biceps Circumference, Relaxed, II. The preceding measurement repeated on the opposite arm. (Not pictured)

122. Bideltoïd Breadth. The horizontal distance across the maximum lateral protrusions of the right and left deltoïd muscles.
126. Bigonial Breadth. The breadth of the jaw across the gonial angles.
130. Biiliocristale Breadth. The breadth of the torso measured between the superior points of the ilia in the midaxillary plane.
134. Bimalleolar Breadth. The distance across the protrusions of the medial and lateral ankle bones.
138. Biocular Breadth. The distance between the outer corners of the eyes.
140. Bispinous Breadth. The transverse distance between the centers of the anterior superior iliac spines.
142. Bitragion Breadth. The breadth of the head as measured from right to left tragion.
144. Bitragion-Coronal Arc. The distance from right to left tragion measured with the tape passing over the top of the head.
146. Bitragion-Crinion Arc. The distance from right to left tragion measured with the tape passing over the hairline. Omitted on the bald and balding.
148. Bitragion-Inion Arc. The distance from right to left tragion measured with the tape passing over the inion.
150. Bitragion-Menton Arc. The distance from right to left tragion measured with the tape passing under the tip of the chin.
152. Bitragion-Minimum Frontal Arc. The distance from right to left tragion measured with the tape passing across the forehead.

154. Bitragion-Posterior Arc. The distance from right to left trasion measured with the tape passing over the base of the skull.
156. Bitragion-Submandibular Arc. The distance from right to left trasion measured with the tape passing under the gonial angles of the jaw.
158. Bitragion-Subnasale Arc. The distance from right to left trasion measured with the tape passing just below the nose.
161. Bitrochanteric Breadth. The horizontal distance between the trochanters measured with the flesh compressed.
165. Bizygomatic Breadth (Face Breadth). The breadth of the face measured across the most laterally projecting protrusions of the temporal bones.
169. Bust Depth. The horizontal distance from the subject's back to the tip of her bra.
172. Bustpoint-Bustpoint Breadth. The distance between the points of the bra.
174. Bustpoint Height. The height of the point of the bra.
178. Buttock Circumference. The circumference of the body measured at the level of the maximum posterior protuberance of the buttocks.
179. Buttock Circumference, Sitting. The circumference of the buttocks measured with the tape passing under the buttocks and brought up diagonally across the lap.
180. Buttock Circumference, Sitting, Over Foundation Garment. The previous measurement repeated with the subject wearing a foundation garment. (Not pictured)
183. Buttock Depth. The depth of the torso at the level of the maximum posterior protrusion of the buttock.
185. Buttock Depth, Over Foundation Garment. The previous measurement repeated with the subject wearing a foundation garment. (Not pictured)
188. Buttock Height. The height of the maximum posterior protrusion of the buttock.

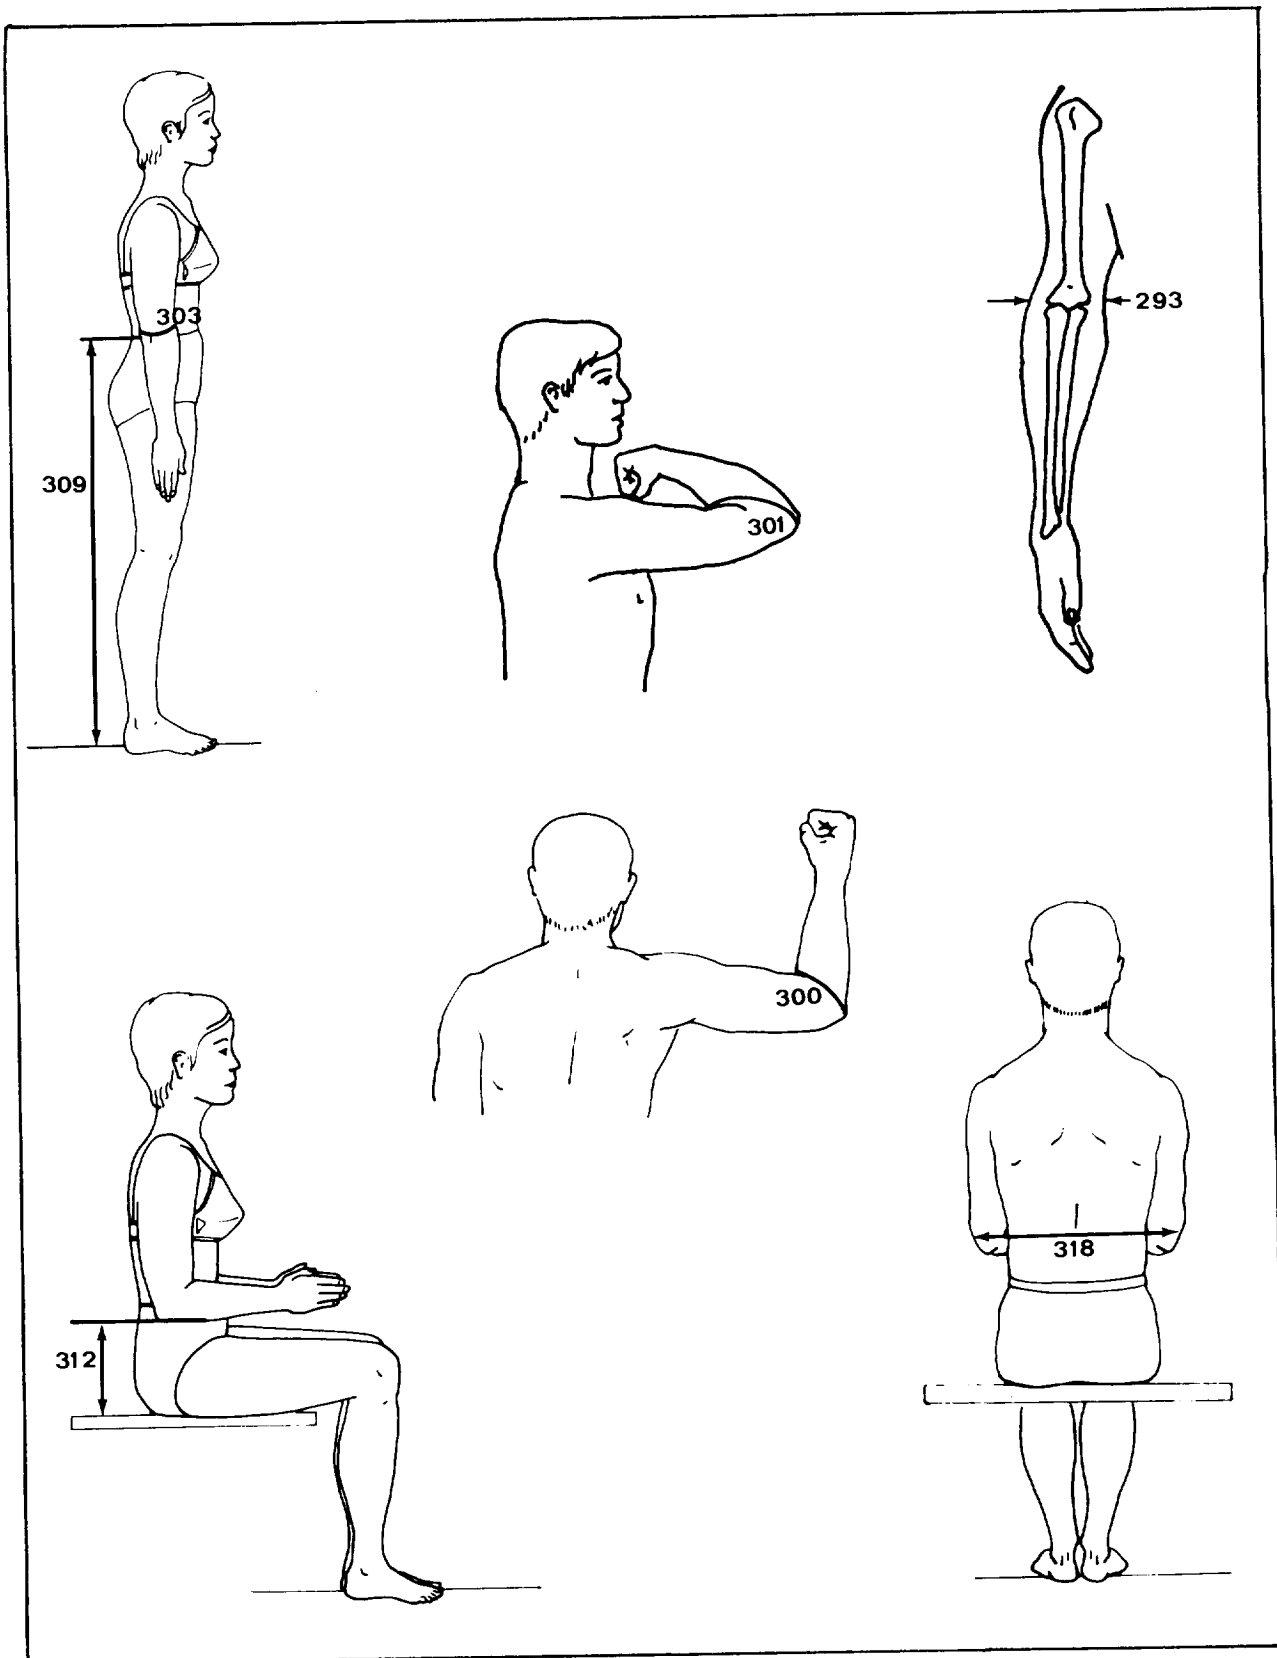

191. Buttock-Heel Length. The distance from the base of the heel to a wall against which the subject sits erect with his leg maximally extended forward along the sitting surface.
194. Buttock-Knee Length. The horizontal distance from the rearmost surface of the buttocks to the front of the kneecaps.
200. Buttock-Popliteal Length. The horizontal distance from the rearmost surface of the buttock to the back of the lower leg.
207. Calf Circumference. The maximum circumference of the lower leg.
209. Calf Circumference, II. The previous measurement repeated on the opposite leg. (Not pictured)
212. Calf Depth. The depth of the lower leg at the level of maximum circumference.
215. Calf Height. The height of the level of the maximum circumference of the lower leg.
219. Cervicale Height. The height of cervicale.
220. Cervicale Height, Sitting. The height of cervicale above the sitting surface.
223. Chest Breadth. The breadth of the torso measured at nipple level.
227. Chest Breadth (Bone). The breadth of the torso at nipple level measured with pressure. (Not pictured)
230. Chest Circumference. The circumference of the torso measured at nipple level.
231. Chest Circumference at Scye. The circumference of the torso at the level of the armpits.
232. Chest Circumference Below Bust. The circumference of the chest just below the cups of the bra.
236. Chest Depth. The depth of the torso measured at nipple level.
237. Chest Depth at Scye. The depth of the torso measured at scye level.
238. Chest Depth Below Bust. The depth of the chest at the level of the inferior margin of the xiphoid process.

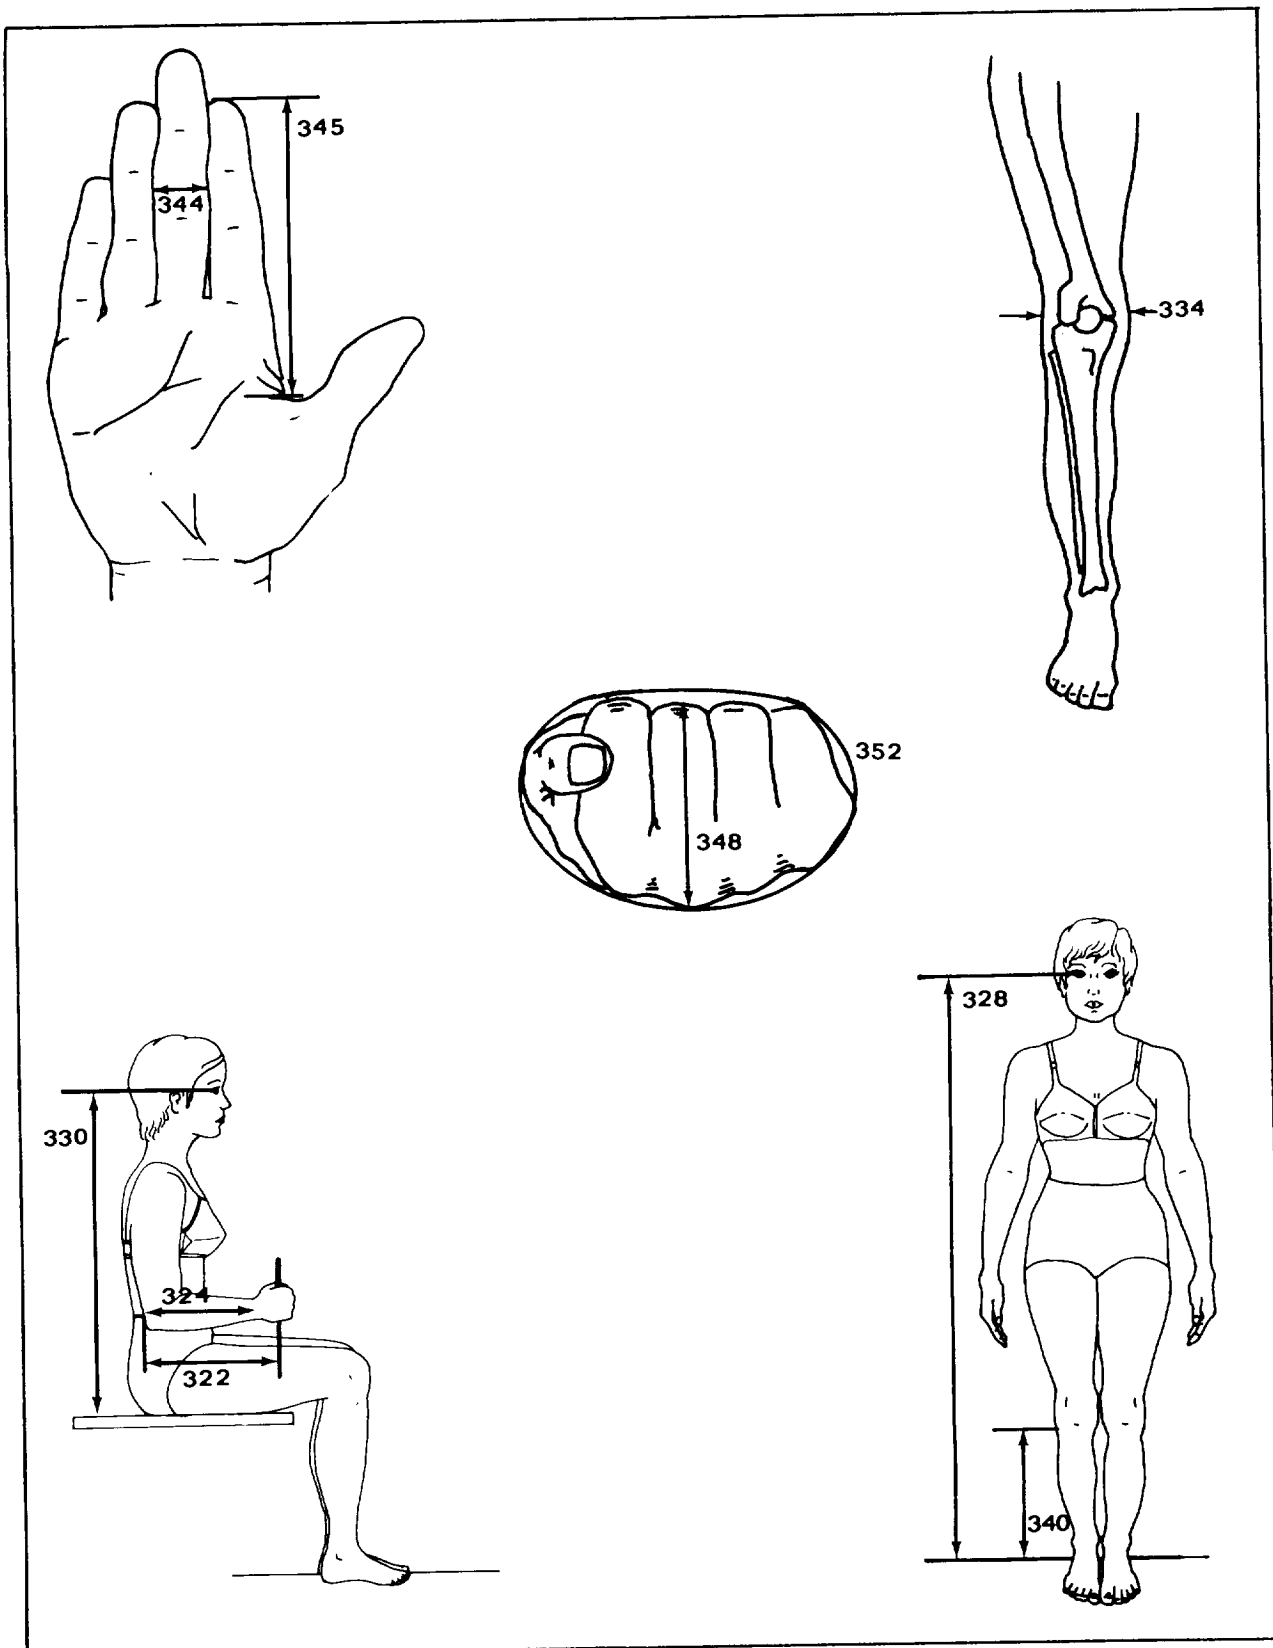

241. Chest Height. The height of the center of the nipple.
245. Chin Prominence to Wall. The distance from the most anterior protrusion of the chin to wall.
249. Crotch Height. The height of the midpoint of the crotch.
252. Crotch Length. The distance from the anterior midpoint of the waist to waist level above the buttock measured with the tape passing through the crotch and over the maximum protrusion of the buttock.
265. Dactylion Height. The height of the tip of the middle finger measured with the arm, hand, and finger extended downward.
269. Deltoid Arc. The surface distance from acromion to the point, just below the deltoid, where the muscle disappears from view.
273. Dorsal Hand Skinfold. The thickness of a skinfold picked up at the middle of the back of the hand and following the long axis of the hand.
277. Ear Breadth. The breadth of the ear measured perpendicular to its long axis.
280. Ear Length. The maximum length of the ear as measured along the long axis.
282. Ear Length Above Tragon. The distance along the long axis of the ear from tragon to the level of the upper tip of the ear.
285. Ear Protrusion. The horizontal distance from the bony eminence directly behind the ear to the most lateral protrusion of the ear.
287. Ectocanthus to Otobasion. The distance from the outer corner of the eye to otobasion superior.
289. Ectocanthus to Top of Head. The distance from the outer corner of the eye to the level of the top of the head.
291. Ectocanthus to Wall. The distance from the outer corner of the eye to wall.

- 293. Elbow Breadth (Humeral Breadth). The distance between the medial and lateral epicondyles of the humerus measured with the flesh compressed.
- 297. Elbow Breadth (Humeral Breadth), II. The previous measurement repeated on the opposite elbow. (Not pictured)
- 300. Elbow Circumference, Flexed. The circumference of the elbow measured over its tip and through its crotch with the arm bent 90°, the upper arm horizontal, and the fist clenched.
- 301. Elbow Circumference, Fully Bent. The distance around the maximum prominence of olecranon and the inside face of the elbow measured with the elbow fully flexed and the fingers touching the shoulder.
- 303. Elbow Circumference, Relaxed. The circumference of the elbow measured with the tape passing over the tip of the elbow.
- 309. Elbow Height. The height of radiale.
- 312. Elbow Rest Height. The height of the bottom of the tip of the elbow above the sitting surface.
- 318. Elbow-Elbow Breadth. The distance across the lateral surfaces of the elbows measured with the elbows flexed and resting lightly against the body.

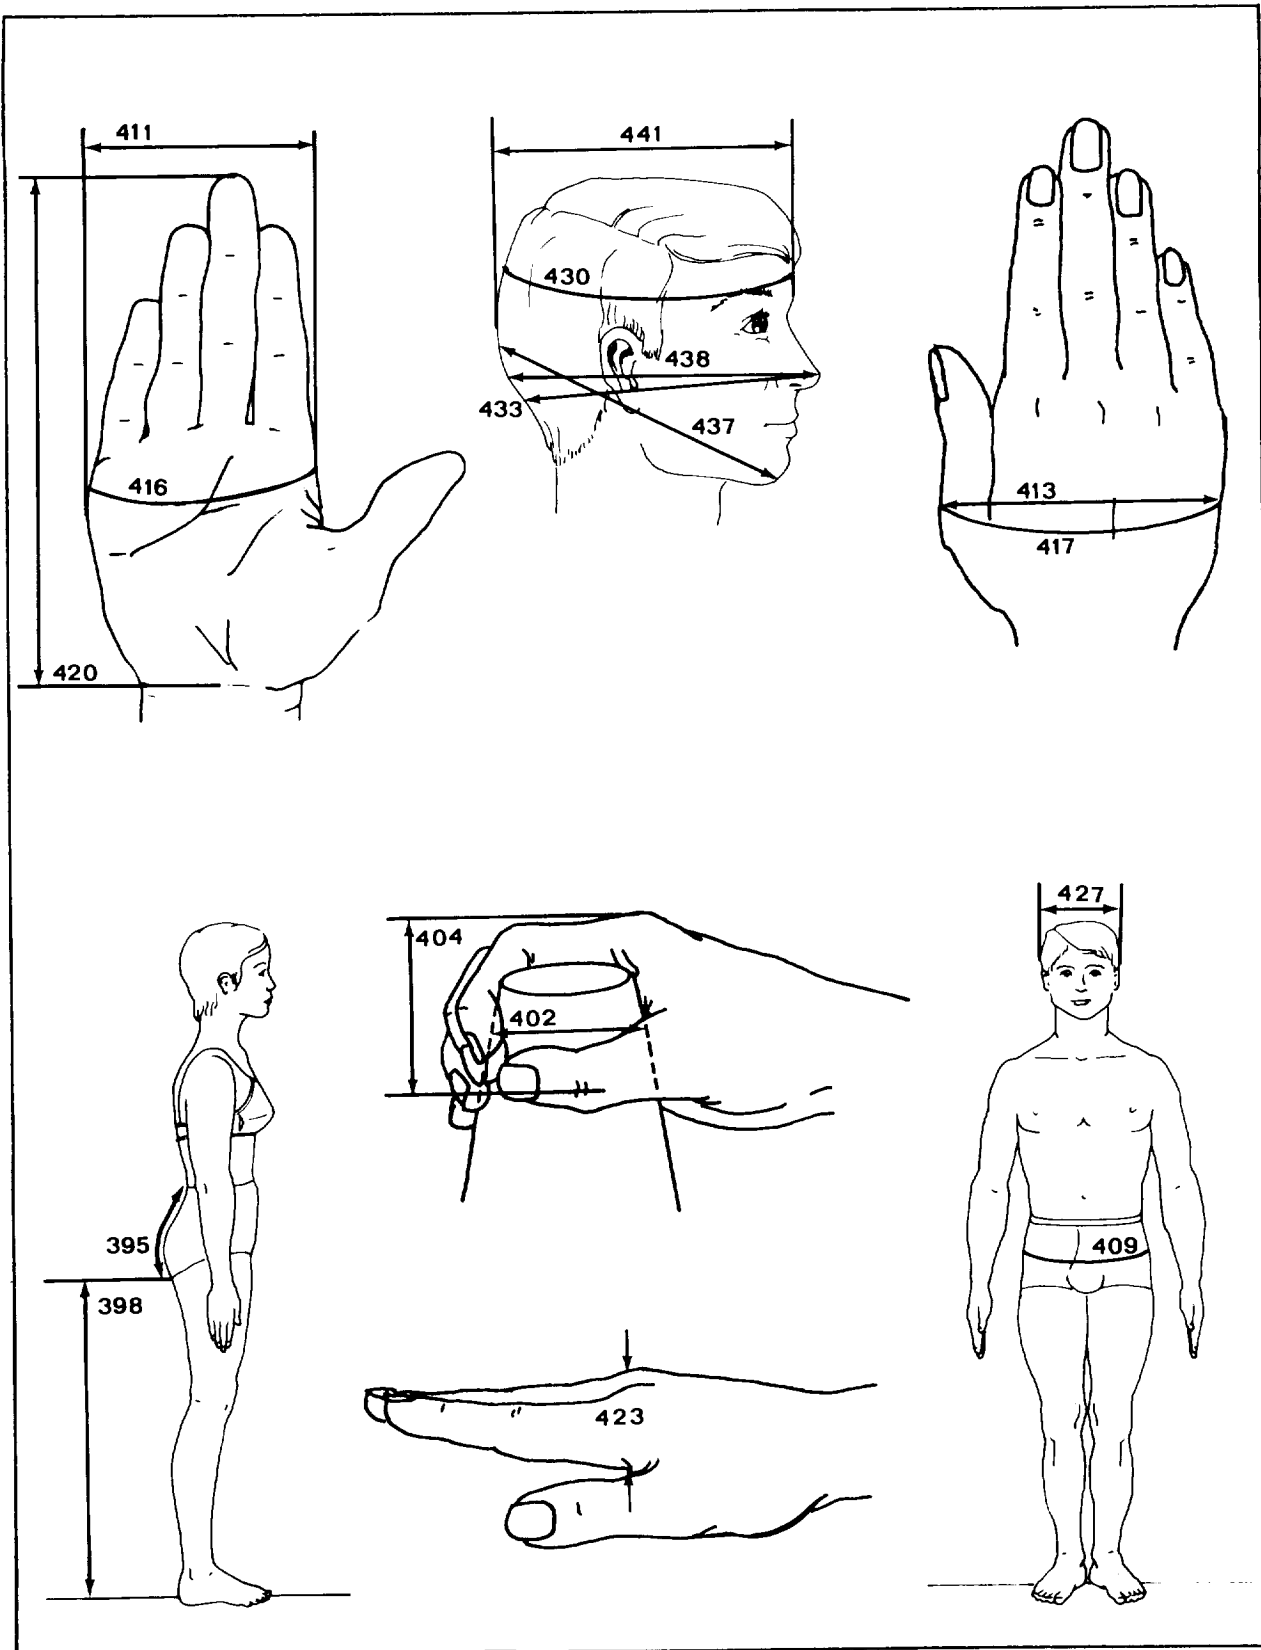

322. Elbow-Grip Length. The distance from the tip of the bent elbow to the center of the clenched fist.
324. Elbow-Wrist Length. The distance from the tip of the elbow to the tip of the styloid process of the radius.
328. Eye Height. The height of the inner corner of the eye.
330. Eye Height, Sitting. The height of the inner corner of the eye above the sitting surface.
334. Femoral Breadth (Knee Breadth). The breadth, as measured with firm pressure, across the epicondyles of the femur.
336. Femoral Breadth (Knee Breadth), II. The previous measurement repeated on the opposite knee. (Not pictured)
340. Fibular Height. The height of the superior tip of the fibula.
344. Finger Diameter at Metacarpale III. The diameter in the middle finger as determined by the smallest hole in which the finger can be inserted.
345. Forefinger Length. The distance from the crotch of the thumb to the tip of the forefinger (digit II).
348. First Phalanx Length-Digit III. The length of the first segment of the middle finger measured across the surfaces of the third metacarpal and the second phalanx while the hand is held in a fist.
352. Fist Circumference. The circumference of the clenched fist (the thumb lying across the end of the fist) measured with the tape passing over the thumb and the knuckles.

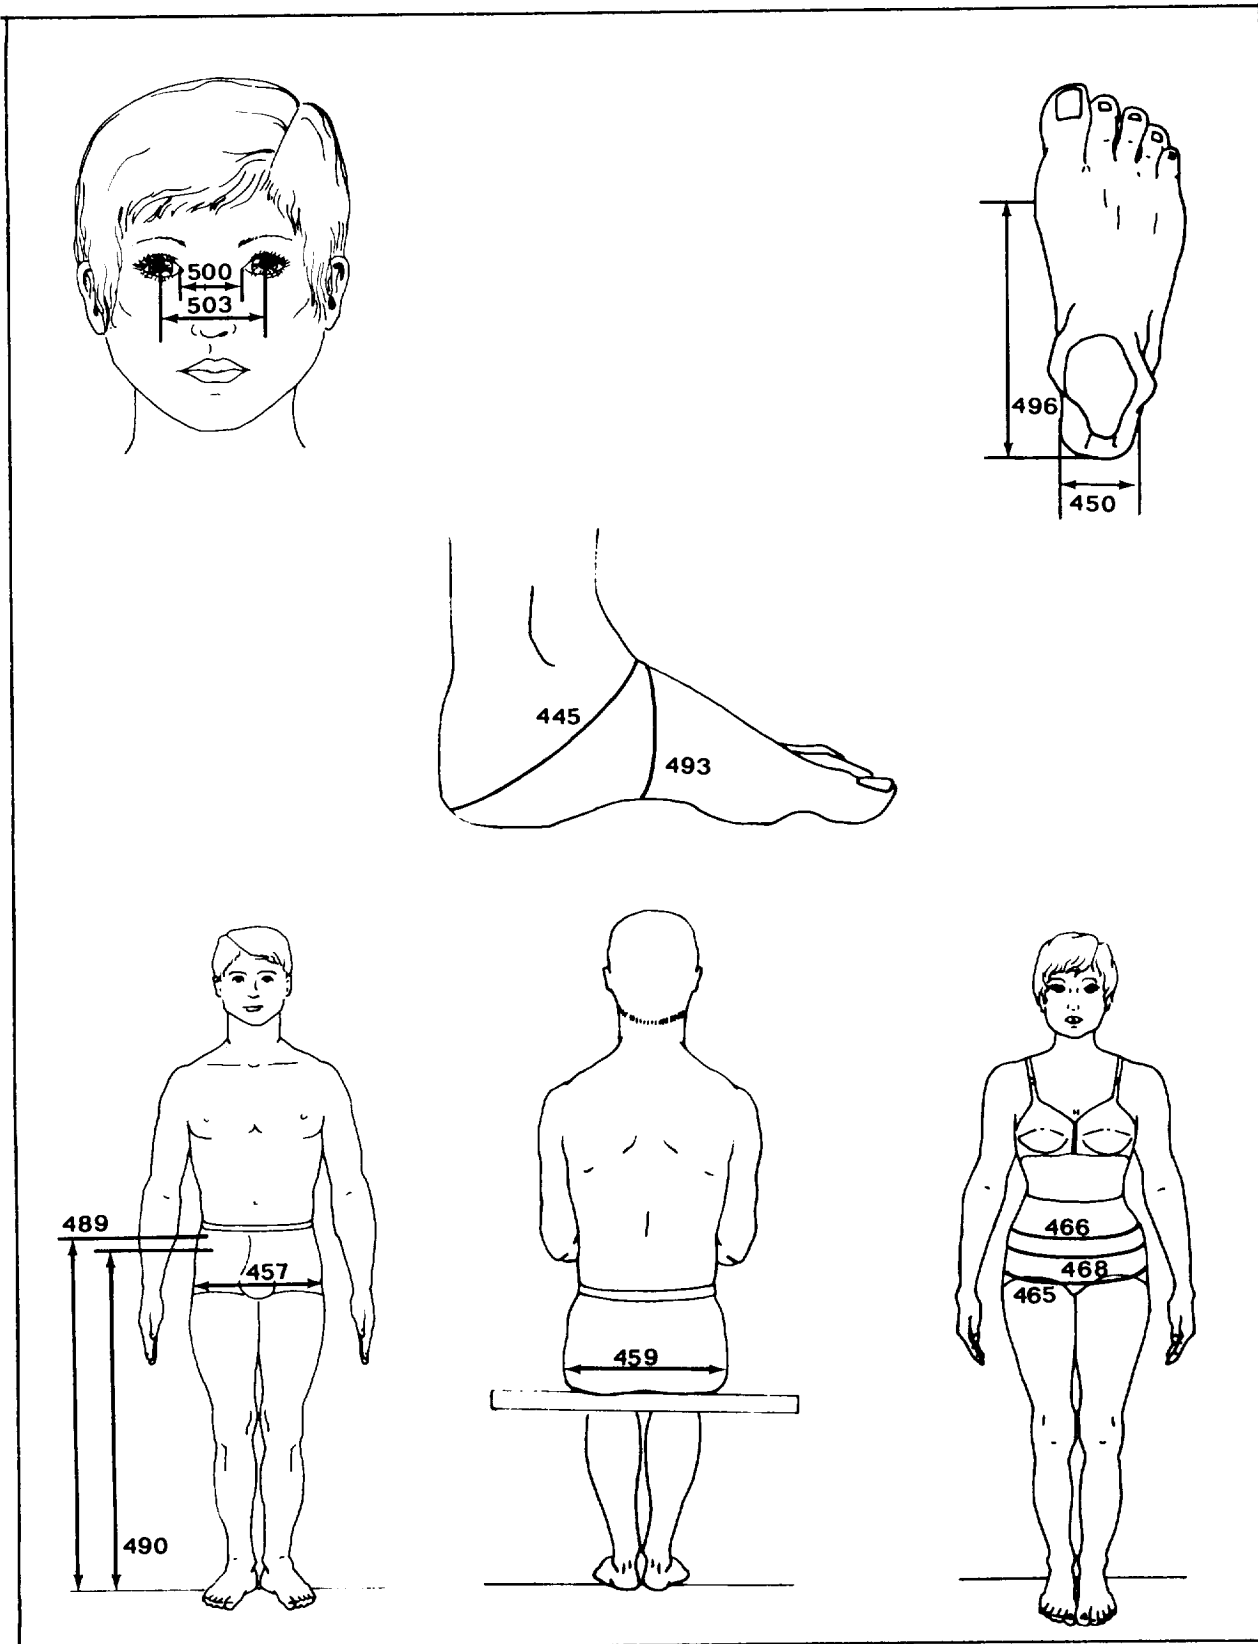

356. Foot Breadth (Ball-of-Foot Breadth). The maximum breadth of the foot as measured at right angles to its long axis.
362. Foot Length. The length of the foot measured parallel to its long axis.
369. Forearm Circumference, Flexed. The maximum circumference of the lower arm bent, the upper arm horizontal, and the fist clenched.
370. Forearm Circumference, Relaxed. The maximum circumference of the lower arm.
378. Forearm-Forearm Breadth. The distance across the tissue mass of the forearms measured with the elbows flexed and resting lightly against the body.
381. Forearm-Hand Length. The distance from the tip of the elbow to the tip of the longest finger.
386. Functional Leg Length. The distance from the back at waist level to the heel, measured along the long axis of the leg with the subject sitting erect on the edge of a chair, his leg extended forward with his knee straightened.
389. Glabella to Top of Head. The distance from the most anterior point of the forehead between the brow ridges to the level of the top of the head.
391. Glabella to Wall. The distance from the most anterior point of the forehead between the brow ridges to wall.

395. Gluteal Arc. The surface distance over the buttock from the gluteal furrow to waist level.
398. Gluteal Furrow Height. The height of the furrow where the gluteal curve intersects the back of the thigh.
402. Grip Diameter, Inside. The diameter of the widest level of a cone which the subject can grasp with his thumb and middle finger touching.
404. Grip Diameter, Outside. The distance between the joint of the 1st and 2nd phalanges of the thumb and the knuckle of the middle finger measured with the hand held as for grip diameter, inside.
407. Grip Strength. Strength as measured on a Smedley dynamometer. (Not pictured)
409. Halfway-to-Hip Circumference. The circumference of the torso at a level halfway between waist level and the level of the trochanters.
411. Hand Breadth. The breadth of the hand as measured across the distal ends of the metacarpal bones.
413. Hand Breadth Across Thumb. The breadth of the hand measured at the level of the distal end of the first metacarpale of the thumb.
416. Hand Circumference. The circumference of the hand measured around its knuckles.
417. Hand Circumference Including Thumb. The circumference of the hand measured in a plane at right angles to the long axis of the hand, with the tape passing over the proximal joint of the thumb.
420. Hand Length. The distance from the base of the hand to the top of the middle finger measured along the long axis of the hand.
423. Hand Thickness (Thickness at Metacarpale III). The thickness of the metacarpal-phalangeal joint of the middle finger.
427. Head Breadth. The maximum breadth of the head.
430. Head Circumference. The maximum circumference of the head measured with the tape passing above, but not including, the brow ridges.
433. Head Diagonal from Inion to Pronasale. The transverse distance from the tip of the nose to inion.
437. Head Diagonal-Maximum from Menton to Occiput. The maximum transverse distance from the tip of the chin to the back of the head.
438. Head Diagonal-Maximum from Nuchale. The maximum transverse distance from the lowest point palpable at the base of the skull to the tip of the nose.
441. Head Length. The maximum length of the head as measured from glabella to the back of the head.

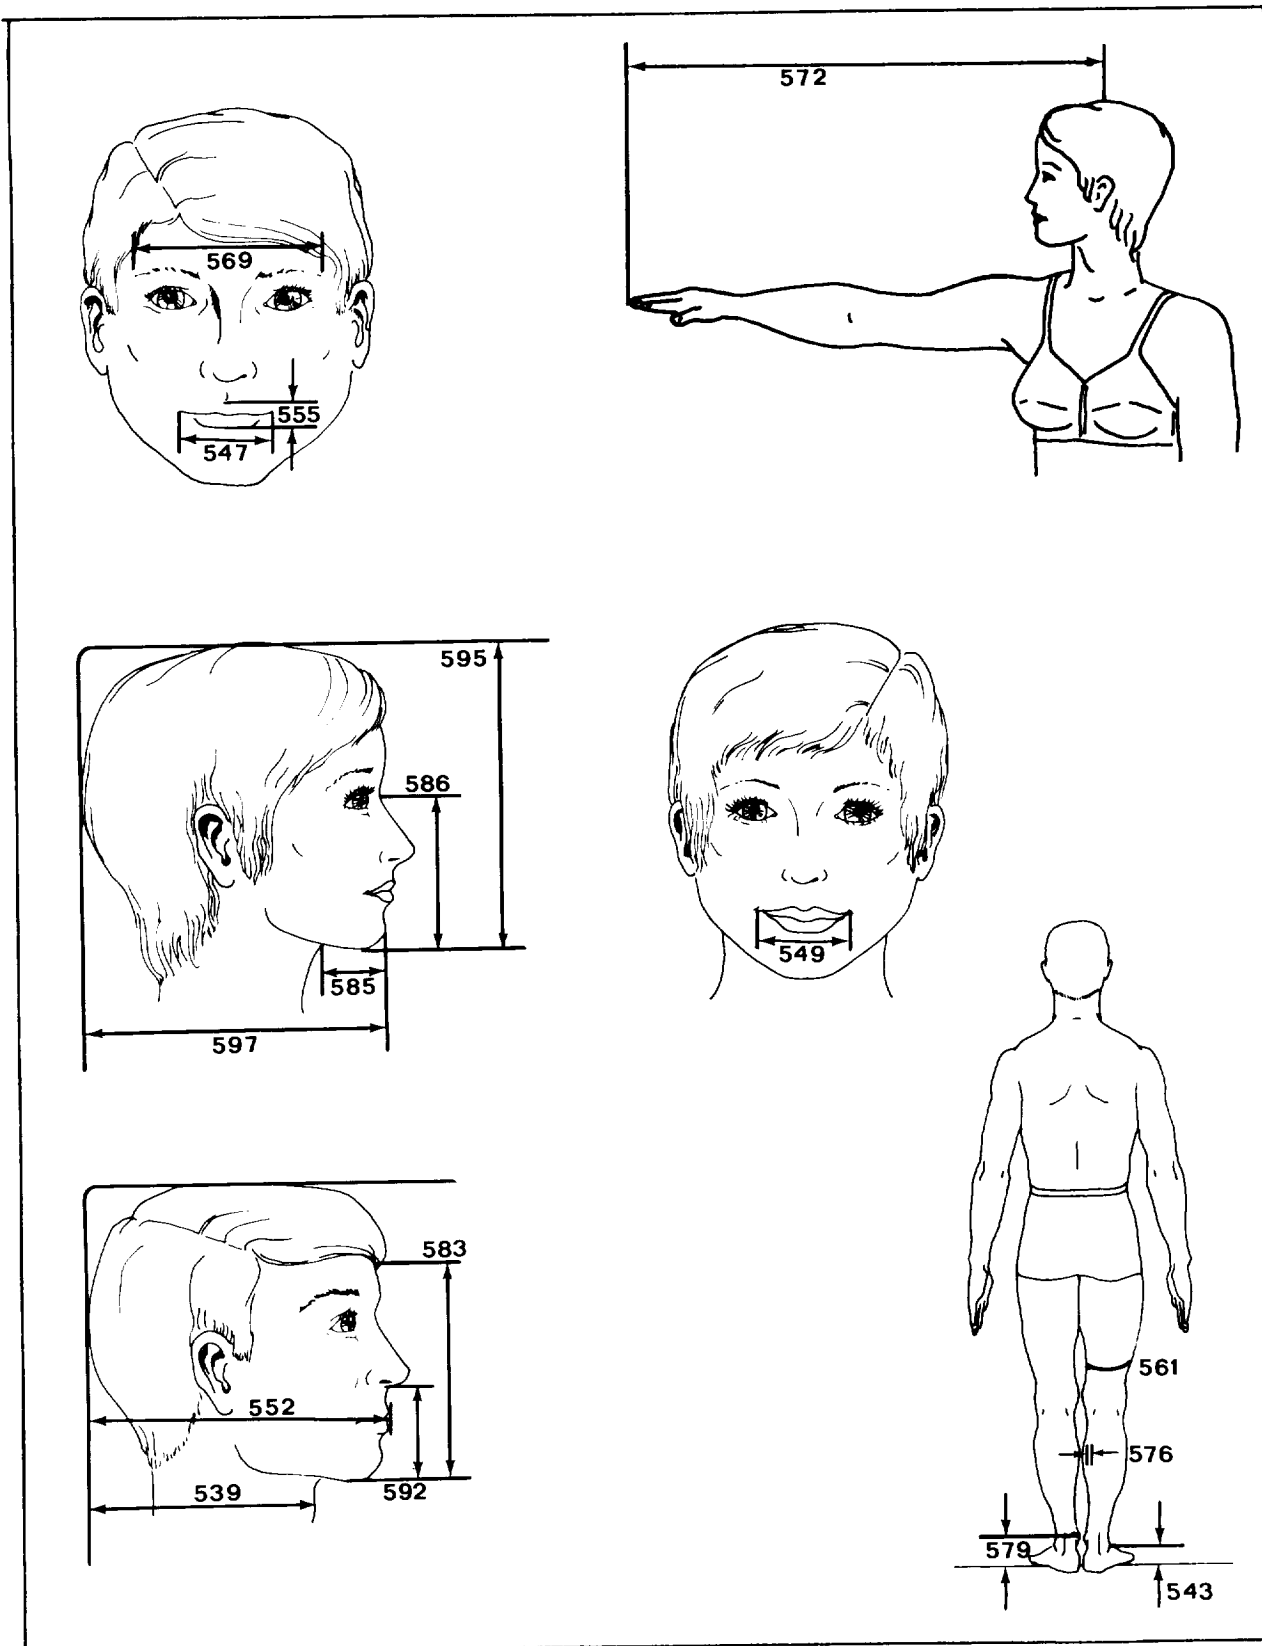

445. Heel-Ankle Circumference. The distance measured around the foot with the tape passing under the tip of the heel and over the instep at the junction of the foot and leg.
450. Heel Breadth. The maximum breadth of the heel as measured behind the projections of the ankle bones.
457. Hip Breadth. The maximum breadth of the lower torso.
459. Hip Breadth, Sitting. The breadth of the body as measured across the widest portion of the hips.
461. Hip Breadth, Over Foundation Garment. Measurement #457 repeated with the subject wearing a foundation garment. (Not pictured)
465. Hip Circumference at Trochanterion. The circumference of the torso measured at the level of the trochanterions.
466. Hip Circumference 7" Below Waist Level. The circumference of the lower torso measured at a level 7" below waist level.
468. Hip Circumference 9" Below Waist Level. The circumference of the lower torso measured at a level 9" below waist level.
470. Hip Circumference 7" Below Waist Level, Over Foundation Garment. The circumference of the lower torso at a level of 7" below waist level measured with the subject wearing a foundation garment. (Not pictured)
472. Hip Circumference 9" Below Waist Level, Over Foundation Garment. The circumference of the lower torso at a level 9" below waist level measured with the subject wearing a foundation garment. (Not pictured)
489. Iliocristale Height. The height of the top of the ilium in the mid-axillary plane.
490. Iliospinale Height. The height of iliospinale.
493. Instep Circumference. The vertical circumference of the instep measured with the tape passing under the foot and over the junction of the leg and foot.
496. Instep Length. The distance from the plane of the heel to the point of maximum medial protuberance of the foot.
500. Interocular Breadth. The distance between the inner corners of the eyes.
503. Interpupillary Breadth. The distance between the centers of the pupils.

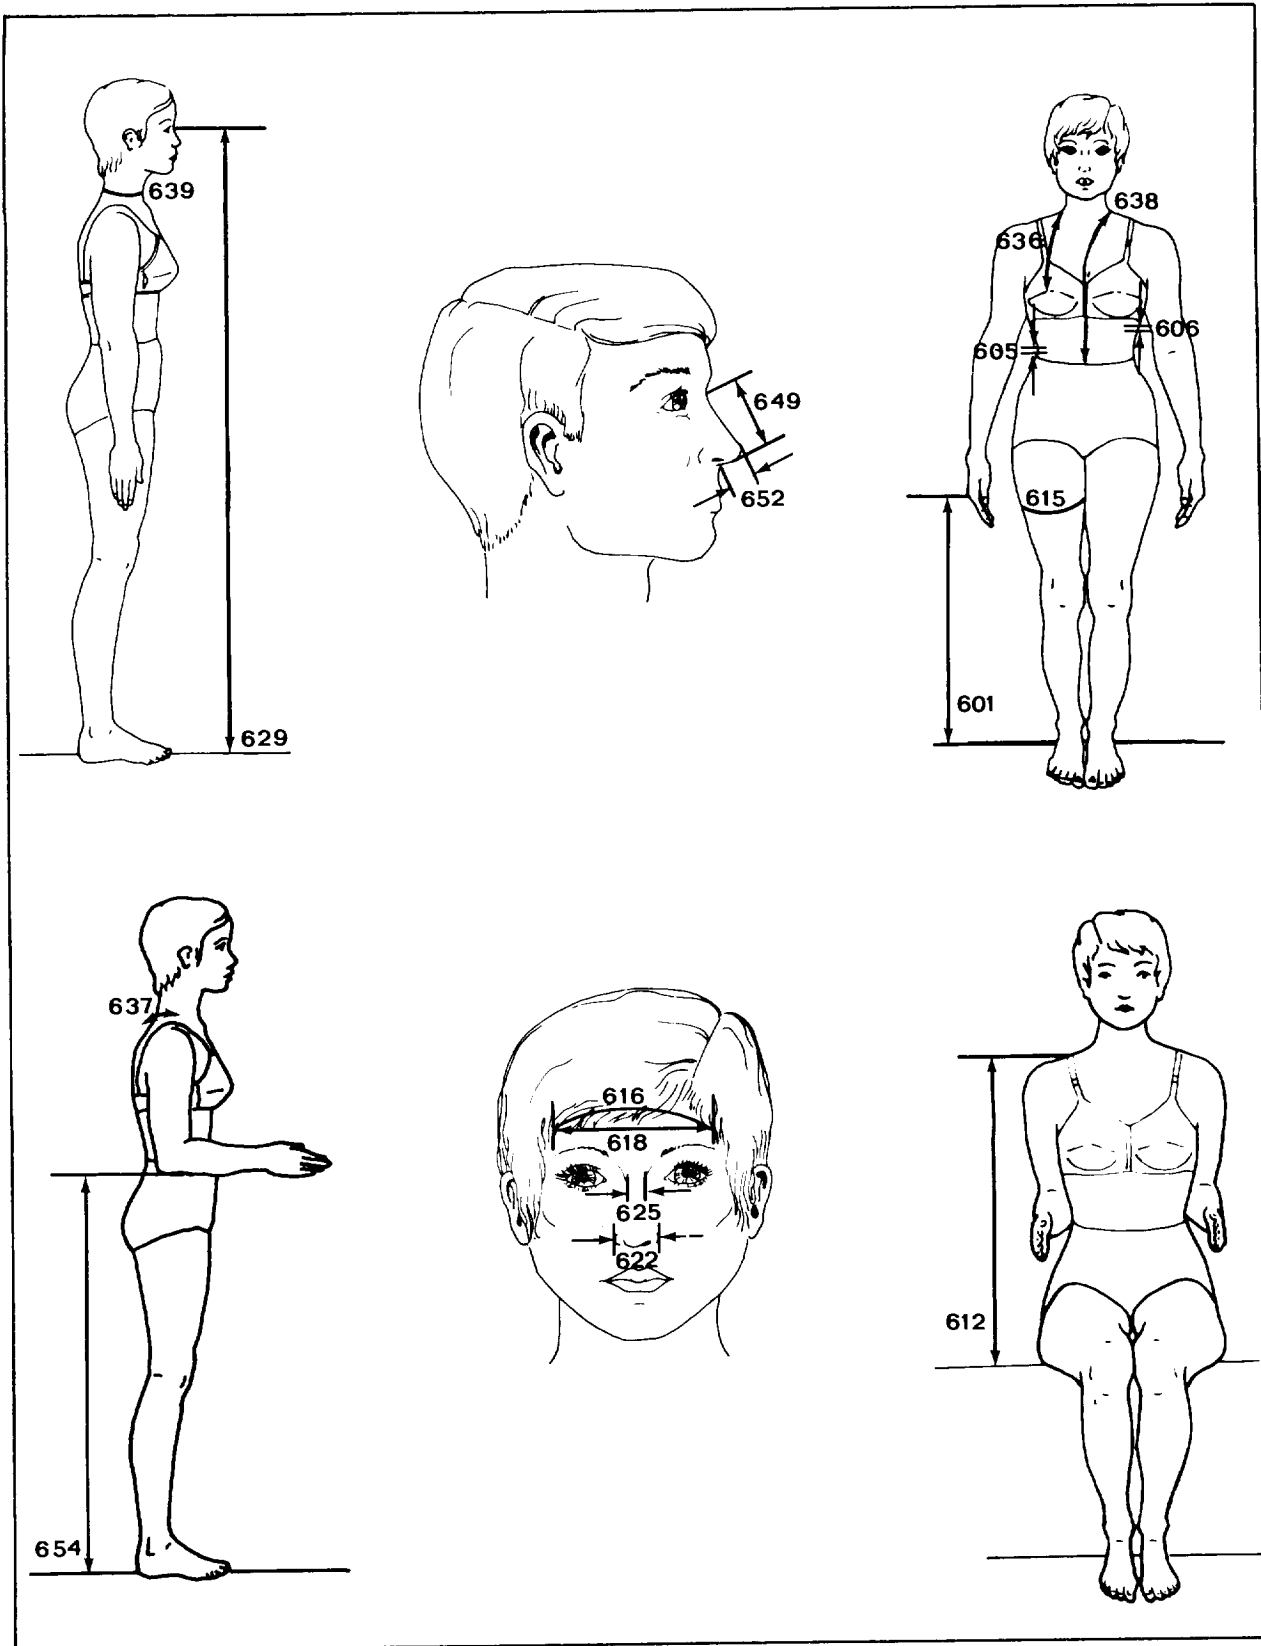

506. Interscye. The tape distance across the back between the posterior axillary folds at the lower level of the armpits.
507. Interscye, Maximum. The tape distance across the back between the scye points measured with the subject sitting erect with his arms extended forward and horizontal.
508. Interscye, II. The tape distance across the back between the posterior axillary folds at the lower level of the armpits measured with the subject sitting with his hands on his knees. (Not pictured)
509. Interscye, Maximum, II. The tape distance across the back between the scye points measured with the subject standing, torso bent forward from the waist at an angle of about 90° and arms hanging relaxed.
511. Juxta Nipple Skinfold. The thickness of a skinfold picked up just superior to the nipple and parallel to the lateral margin of the pectoral muscle.
515. Knee Circumference. The circumference of the knee measured at the level of the midpoint of the patella.
516. Knee Circumference, Fully Bent. The distance around the maximum knee prominence and through the crease behind the knee, measured with the subject in a squatting position with the knee fully flexed.
517. Knee Circumference, Sitting. The maximum circumference of the right knee as measured with a tape passing over the popliteal area and brought up at 45° over the knee.
527. Knee Height. The height of the midpoint of the kneecap.
529. Knee Height, Sitting. The height, from the footrest surface, of the musculature just above the knee.
532. Knee-to-Knee Breadth. The maximum horizontal distance across the lateral surfaces of the knees measured with the knees gently touching.

539. Larynx to Wall. The distance from the most anterior portion of the "Adam's Apple" to wall.
543. Lateral Malleolus Height. The height of the most lateral projecting point of the lateral ankle bone.
547. Lip Length. The distance between the corners of the mouth measured while the facial muscles are relaxed.
549. Lip Length, Smiling. The distance between the corners of the mouth measured while the subject smiles broadly.
552. Lip Protrusion to Wall. The distance from the most anterior point of the lips to wall.
555. Lip-to-Lip Length. The distance, in the midsagittal plane, from the lower margin of the lower lip to the upper margin of the upper lip.
561. Lower Thigh Circumference. The circumference of the leg measured just above the knee.
569. Maximum Frontal Breadth. Forehead breadth as measured between the maximum bulges of the brow ridges at about the ends of the eyebrow.
572. Maximum Reach from Wall. The distance from the wall to the tip of the middle finger measured with the subject's back and left shoulder pressed against the wall, his right shoulder thrust as far forward as possible and his arm and hand extended horizontally.
576. Medial Calf Skinfold. The thickness of a skinfold on the medial surface of the calf at the level of the maximum circumference picked up parallel to the long axis of the lower leg, measured with the knee flexed about 90 degrees.
579. Medial Malleolus Height. The height of the most medially projecting point of the medial ankle bone.
583. Menton-Crinion Length. The distance from the bottom surface of the chin to the midpoint of the hairline. Omitted on the bald and balding.
585. Menton Projection. The distance from the most forward point of the chin to the juncture of the neck and the bottom of the jaw.
586. Menton-Sellion Length. The distance from the tip of the chin to the deepest point of the nasal root depression.
592. Menton-Subnasale Length. The distance from the lower edge of the tip of the chin to the base of the nasal septum.
595. Menton to Top of Head. The distance from the lower edge of the tip of the chin to the level of the top of the head.
597. Menton to Wall. The distance from the tip of the chin to wall.

601. Metacarpale III Height. The height of the knuckle where the middle finger joins the palm.
605. Midaxillary Line at Umbilicus Level Skinfold. The thickness of a skinfold picked up at umbilicus level in the midaxillary line.
606. Midaxillary Line at Xiphoid Level Skinfold. The thickness of a skinfold picked up at xiphoid level in the midaxillary line.
612. Midshoulder Height, Sitting. The height of the point on the shoulder halfway between the neck and acromion above the sitting surface.
615. Midthigh Circumference. The circumference of the upper leg in a plane midway between the lowest point in the crotch and tibiale.
616. Minimum Frontal Arc. The minimum distance across the temporal crests between their points of maximum indentation.
618. Minimum Frontal Breadth. The breadth of the forehead across the lateral bony ends of the brow ridges.
622. Nasal Breadth. The maximum breadth of the nose.
625. Nasal Root Breadth. The breadth of the nasal root.
629. Nasal Root Height. The height of the deepest point in the nasal root depression.
636. Neck-Bustpoint Length. The distance from the intersection of the neck and shoulder to the tip of the bra measured with the tape held tense and not following the body contour.
637. Neck-Cervicale Length. The tape distance from cervicale to the superior point of the junction of the neck and shoulder.
638. Neck-Waist Length. The tape distance from the superior point of the junction of the neck and shoulder to waist level measured over the front of the body.
639. Neck Circumference. The maximum circumference of the neck, including the Adam's Apple.
649. Nose Length. The distance from sellion to the bottom of the nose.
652. Nose Protrusion. The maximum anterior protrusion of the nose.
654. Olecranon Height. The height of the underside of the elbow, measured with the arm flexed 90 degrees and the upper arm vertical.

- 656. Palm Length. The distance from the base of the hand to the furrow where the middle finger folds upon the palm.
- 663. Patella Bottom Height. The height of the bottom edge of the kneecap.
- 666. Patella Top Height. The height of the top edge of the kneecap.
- 670. Penale Height. The height of the upper edge of the junction of the penis with the abdomen.
- 674. Philtrum Length. The distance from the edge of the upper membranous lip to the base of the nasal septum.
- 678. Popliteal Height. The height of the underside of the upper leg above the footrest surface.
- 686. Posterior Neck Length. The surface distance from nuchale at the base of the skull to cervicale.
- 692. Pronasale to Top of Head. The distance from the tip of the nose to the level of the top of the head.
- 694. Pronasale to Wall. The distance from the tip of the nose to wall.
- 698. Radiale-Stylion Length. The distance from radiale to stylion measured parallel to the long axis of the freely hanging lower arm.
- 702. Sagittal Arc. The distance over the top of the head from glabella (between the brow ridges) to nuchale at the base of the skull.

706-

731. Scrotale-to-Measurements. Tape measurements made, both sitting and standing, over the front of the body from scrotale, the midpoint of the crotch to:

706. & 707. Midshoulder
709. & 710. Suprasternale
711. & 712. Waist Level
727. & 728. Scye Level

and over the back of the body from scrotale to:

714. & 715. Cervicale
717. & 718. Midshoulder
722. & 723. Scye Level
724. & 725. Waist Level

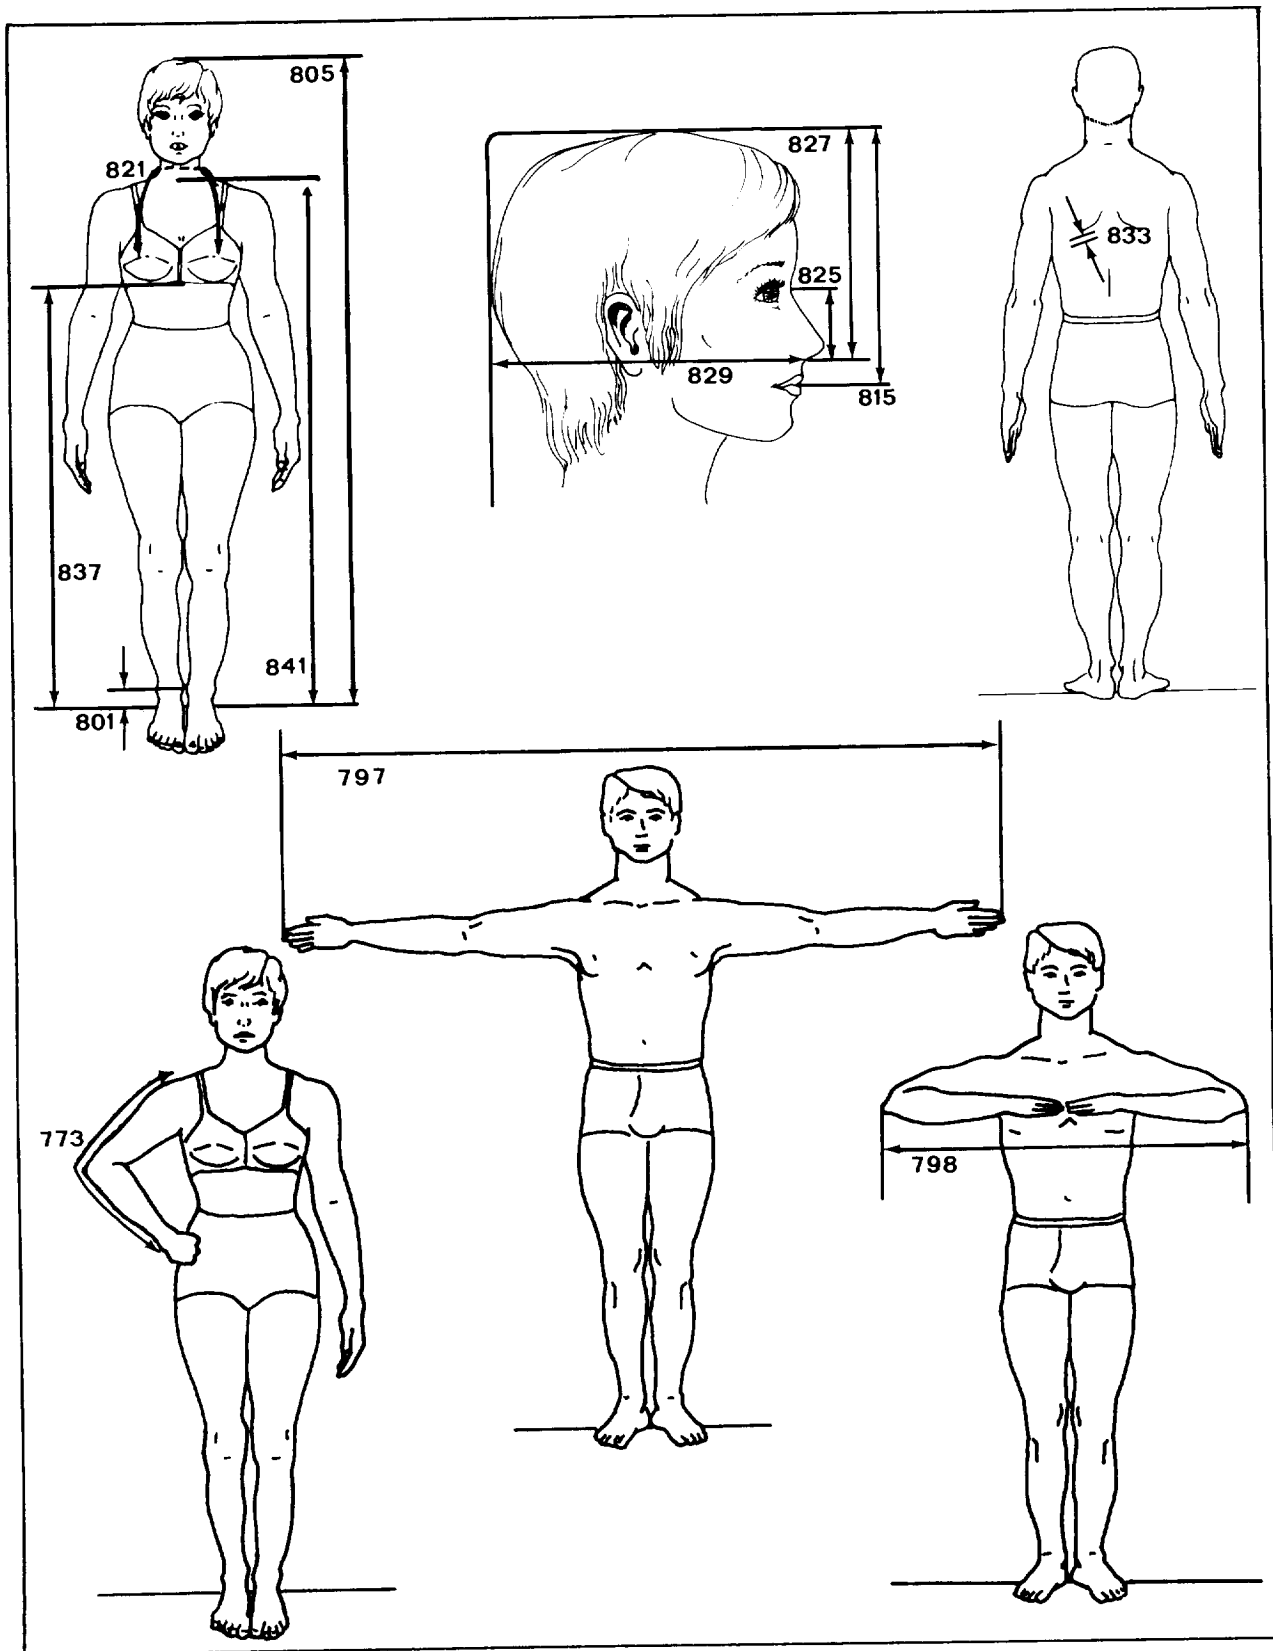

Measurements were also made with the tape passing over the buttock from scrotale to waist level and midshoulder; these are not pictured.

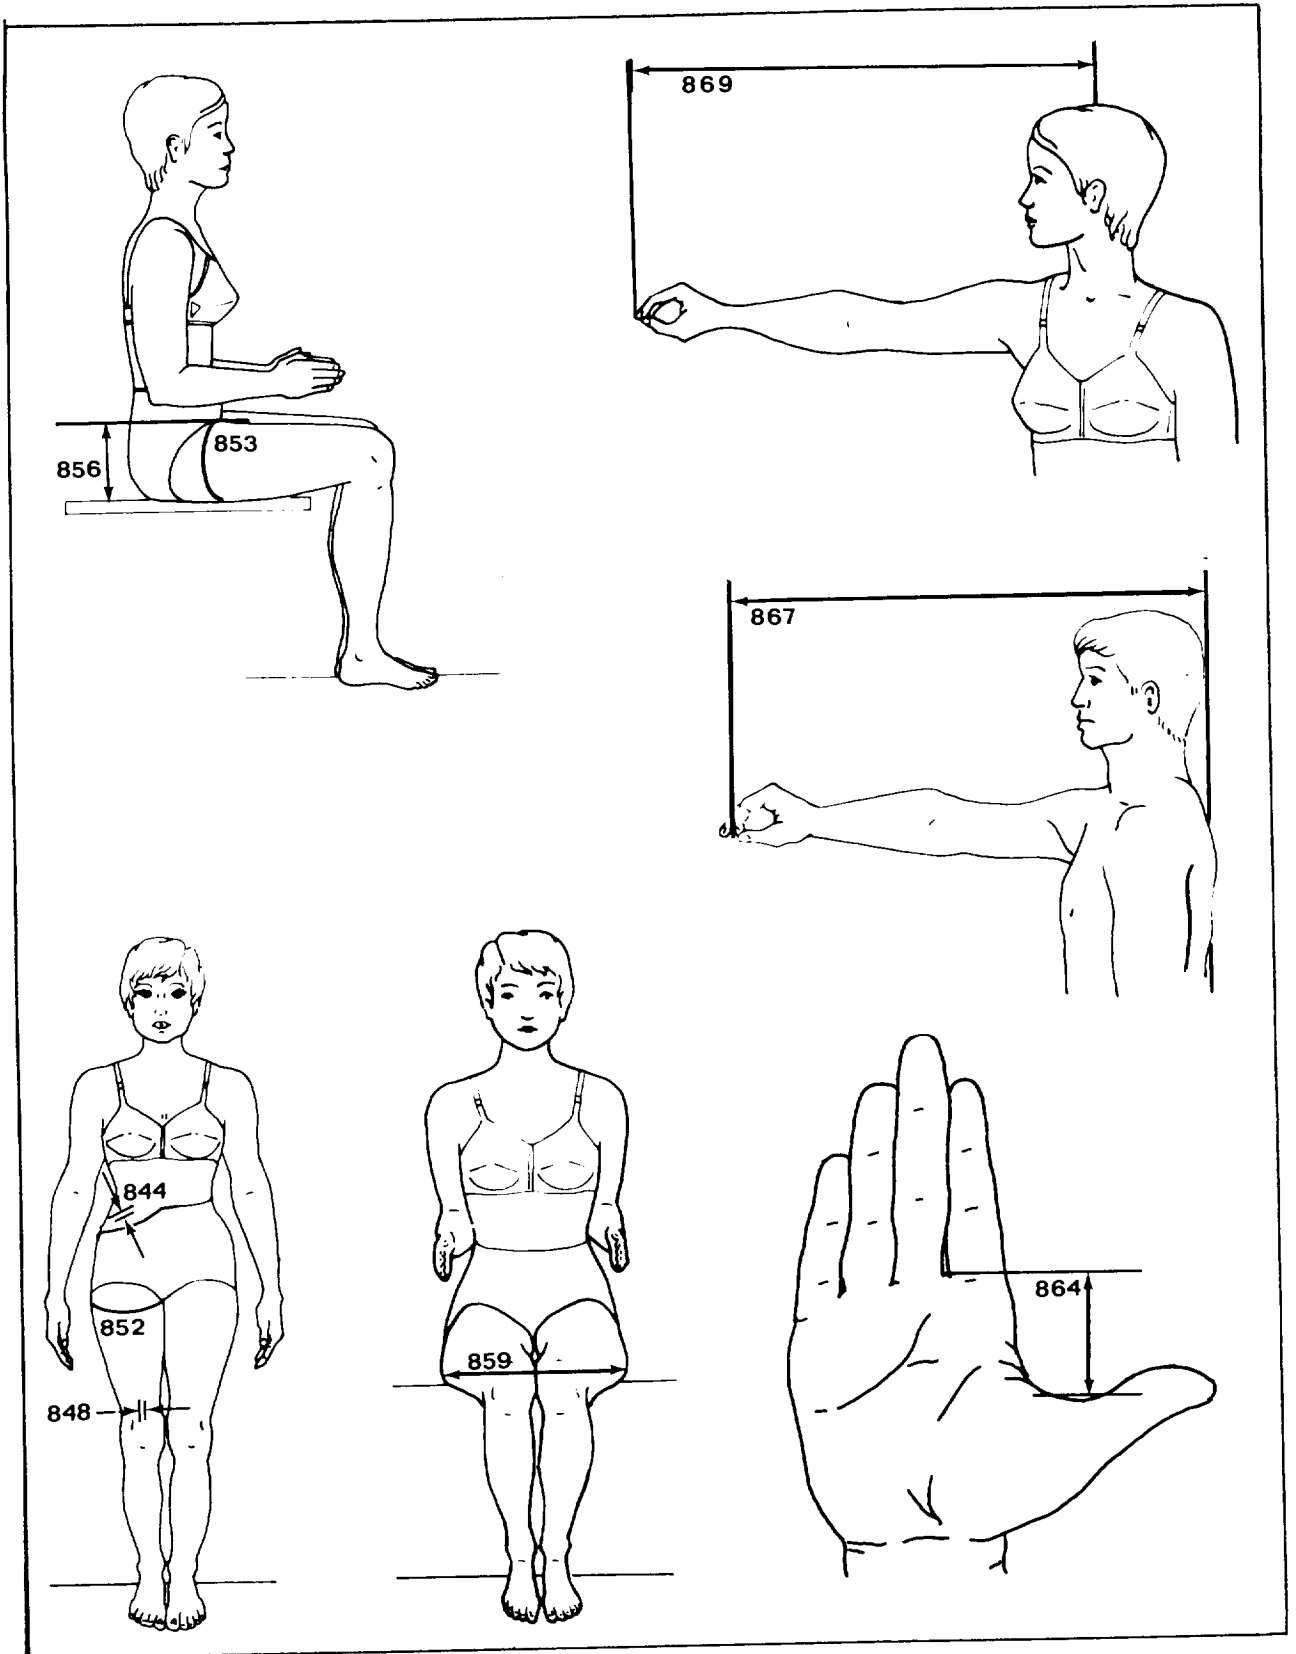

735. Scye Circumference. The circumference of the scye, measured in a vertical plane, as high as possible in the armpit and passing over acromion.
739. Sellion to Top of Head. The distance from the deepest point in the nasal root depression to the level of the top of the head.
741. Sellion to Wall. The distance from the deepest point in the nasal root depression to wall.
747. Shoulder Circumference. The circumference of the shoulders measured at the level of the greatest lateral protrusions of the deltoid muscles.
751. Shoulder-Elbow Length. The vertical distance from acromion to the bottom of the elbow, measured with the elbow bent 90 degrees and the lower arm held horizontal.
752. Shoulder-Grip Length. The horizontal distance from a pointer held in the subject's fist to a wall against which he sits, measured with the arm extended forward and horizontal.
754. Shoulder Length. The surface distance from acromion, at the end of the shoulder blade, to the junction of the shoulder and the neck.
758. Sitting Height. The height, from the sitting surface, to the top of the head.
760. Sitting Height, Relaxed. The height, from the sitting surface, of the head, measured with the subject sitting relaxed. (Not pictured)
764. Sleeve Inseam. The distance from the anterior edge of the armpit to the base of the thumb.
768. Sleeve Length Segment-Spine to Elbow Length. The distance from the midline of the spine to the tip of the elbow, measured with the arms positioned for sleeve length.
770. Sleeve Length Segment-Spine to Scye Length. The distance from the midline of the spine to scye measured with the arms positioned for sleeve length.
772. Sleeve Length Segment-Spine to Wrist Length. The surface distance from the midline of the spine to the ulnar styloid process measured with the arms held horizontal, the elbows bent between 60° and 90°, and the fists touching.

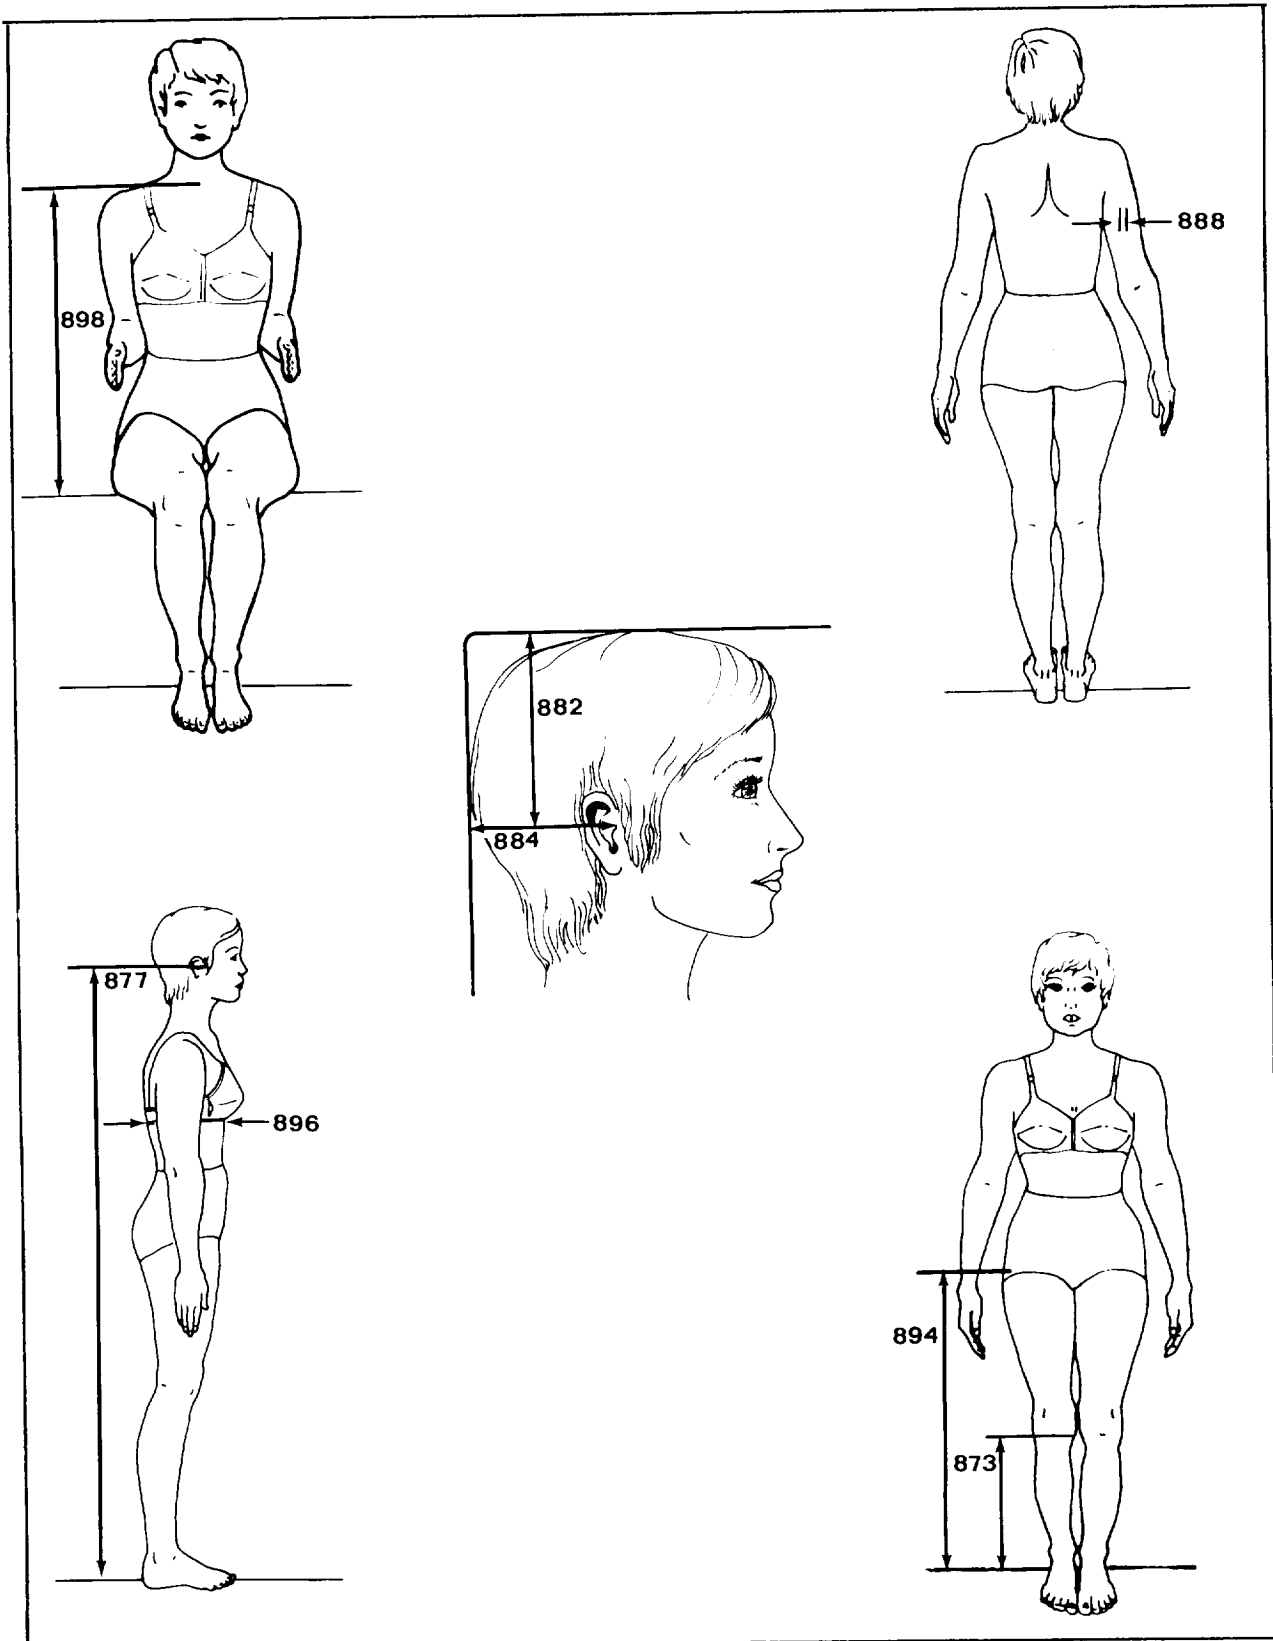

773. Sleeve Length-Posterior. The distance along the outer surface of the arm from the point on the shoulder line in the scye plane to the distal end of the ulna, measured with the subject's clenched fist placed on her hip and the tape passing over the olecranon.
797. Span. The distance between the tips of right and left middle fingers when the subject's arms are maximally extended laterally.
798. Span Akimbo. The distance between the elbow points measured with the arms flexed, held horizontally, palms down, fingers straight and together, and thumbs touching the chest.
801. Sphyrion Height. The height of sphyrion.
805. Stature. The height of the top of the head.
808. Stature as Reported. The height as given by the subject immediately prior to being measured. (Not pictured)
811. Stature, Maximum. The height of the top of the head measured when the subject has, after taking a deep breath, maximally extended himself vertically while keeping his feet flat on the floor. (Not pictured)
815. Stomion to Top of Head. The distance from the point of contact of the lips in the midsagittal plane to the level of the top of the head.
821. Strap Length. The distance from one bra tip to the other as measured with the tape passing over the back of the neck, the tape being held tense and not following the body contour.
825. Subnasale-Sellion Length. The distance from the base of the nasal septum to the deepest point of the nasal root depression.
827. Subnasale to Top of Head. The distance from the base of the nasal septum to the plane of the top of the head.
829. Subnasale to Wall. The distance from the base of the nasal septum to wall.
833. Subscapular Skinfold. The thickness of a skinfold picked up just below the inferior angle of the right scapula and parallel to the tension lines of the skin.
834. Subscapular Skinfold, II. The preceding measurement repeated on the opposite side. (Not pictured)
837. Substernale Height. The height of the midpoint of the lower edge of the breast bone.
841. Suprasternale Height. The height of the lowest point of the notch in the upper edge of the breast bone.

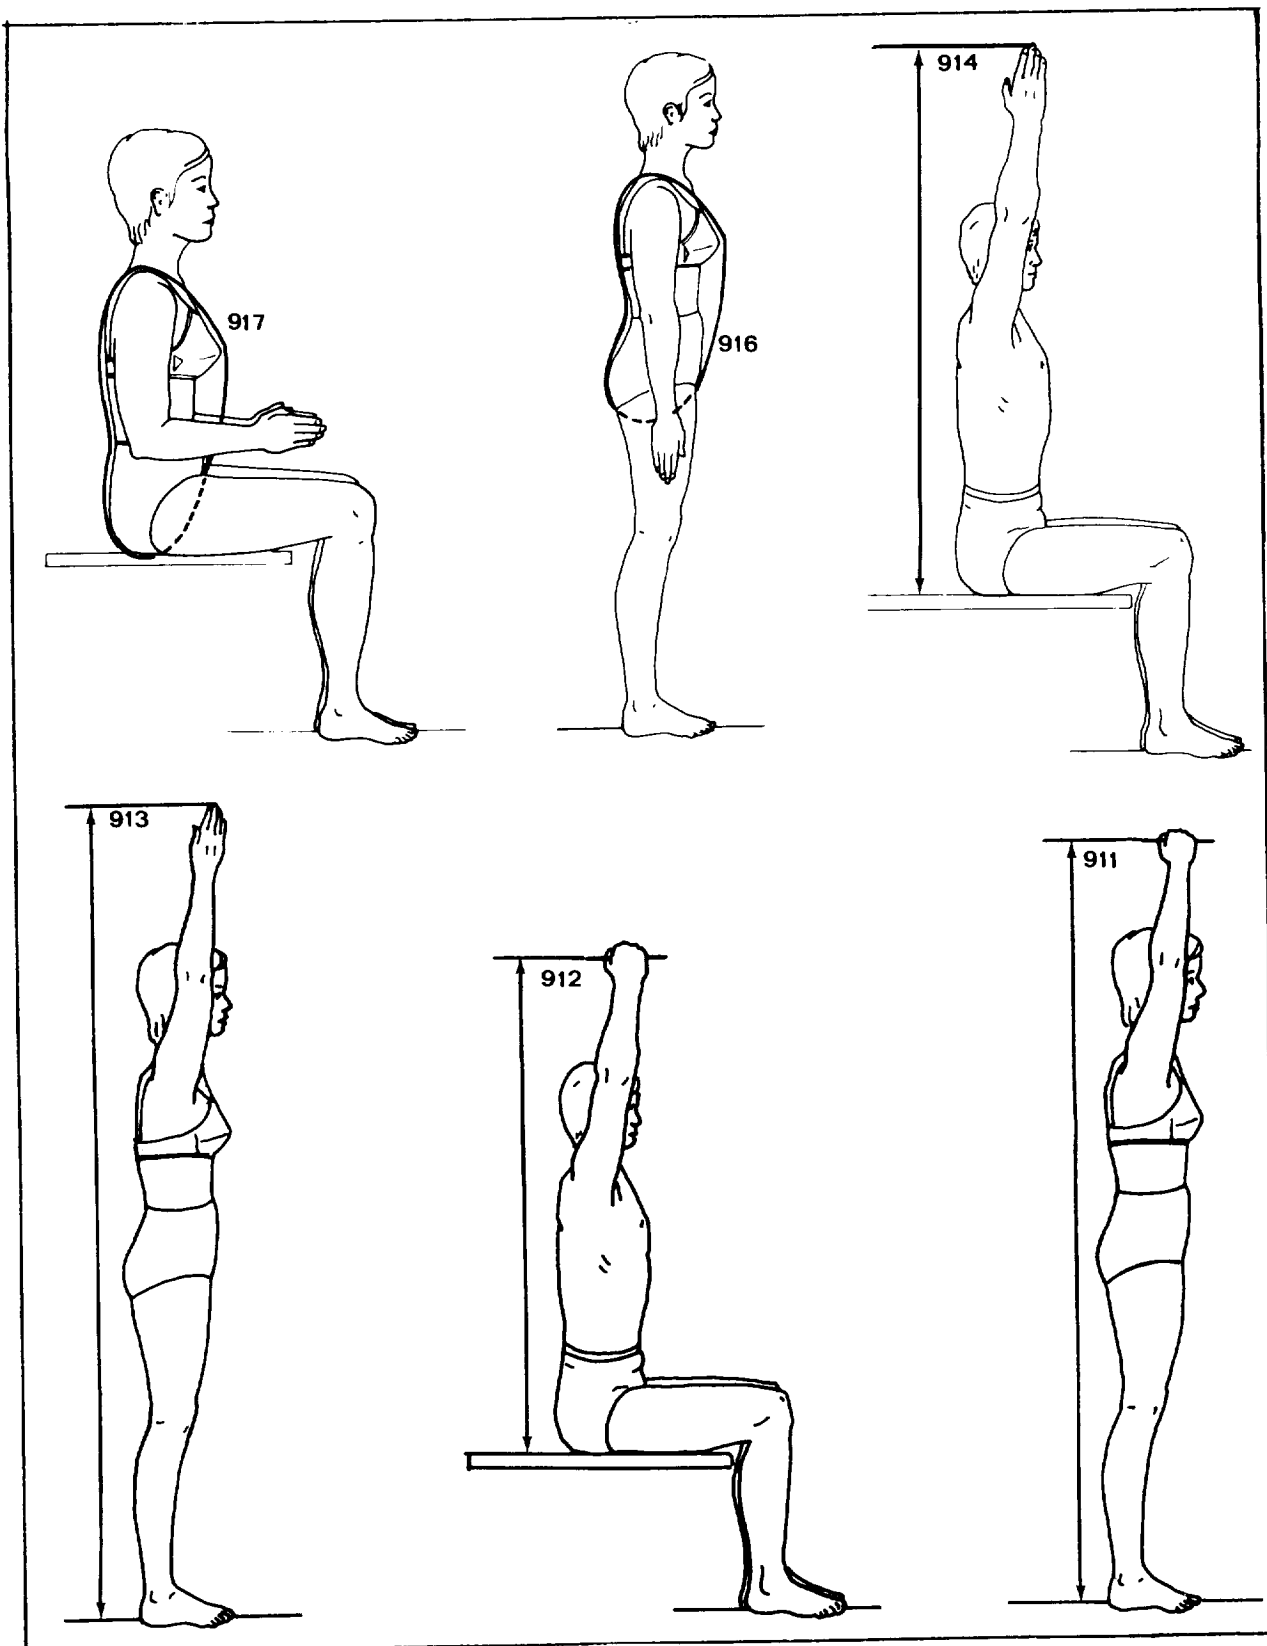

844. Suprailiac Skinfold. The thickness of a skinfold picked up in the mid-axillary line at the level of the crest of the ilium.
845. Suprailiac Skinfold, II. The preceding measurement repeated on the opposite side. (Not pictured)
848. Suprapatella Skinfold. The thickness of a skinfold picked up on the lower thigh above the patella.
852. Thigh Circumference. The circumference of the upper leg measured as high in the crotch as possible.
853. Thigh Circumference, Sitting. The circumference, in a plane perpendicular to the long axis of the upper leg, of the thigh as measured as high in the crotch as possible.
856. Thigh Clearance. The height of the highest point of the thigh above the sitting surface.
859. Thigh-Thigh Breadth, Sitting. The maximum breadth across the thighs.
860. Thigh-Thigh Breadth, Sitting, Over Foundation Garment. The previous measurement repeated with subject wearing a foundation garment. (Not pictured)
864. Thumb Crotch Length. The distance from the skinfold at the base of the thumb to the notch between the 1st and 2nd fingers, measured with calipers held parallel to the main axis of the hand.
867. Thumb-Tip Reach. The distance from the wall to the tip of the thumb measured with the subject's shoulders against the wall, his arm extended forward, and his index finger touching the tip of his thumb.
869. Thumb-Tip Reach, Extended. Similar to thumb-tip reach, except that the right shoulder is extended as far as possible while keeping the left shoulder firmly against the wall.

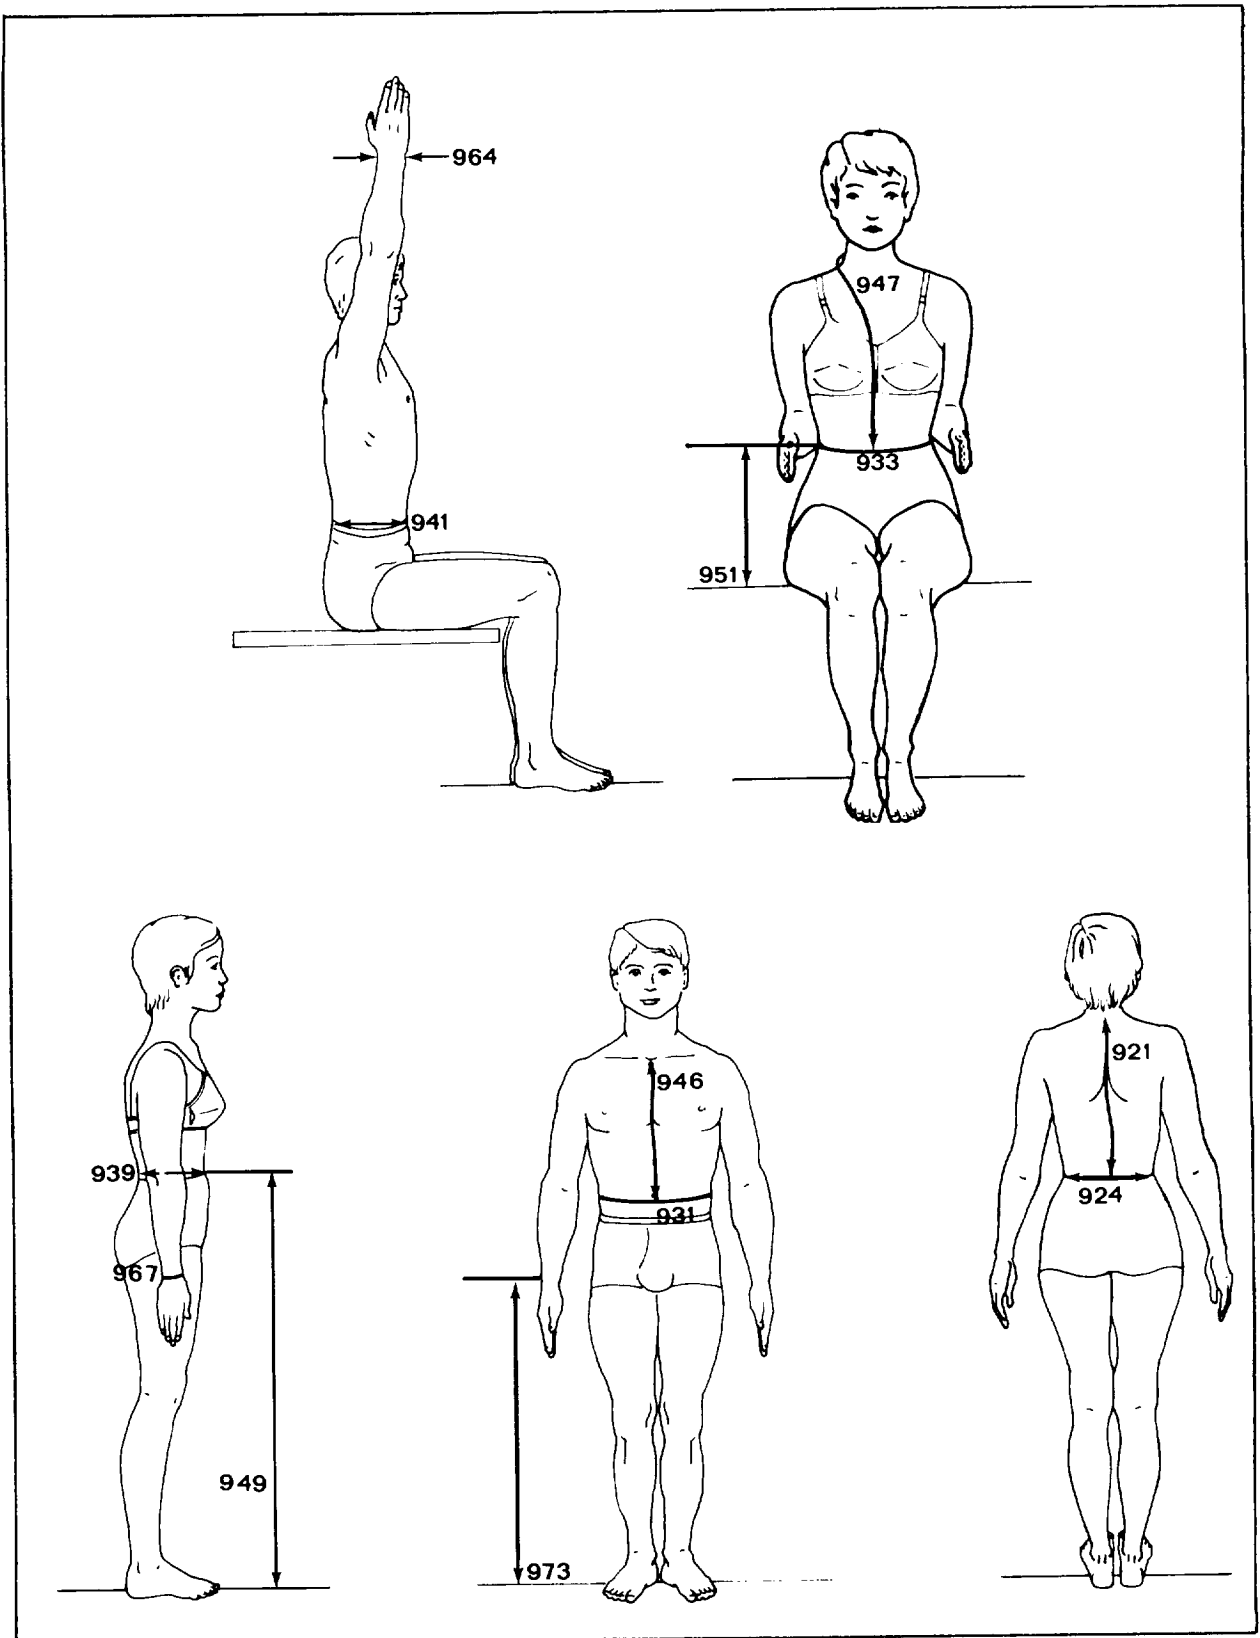

- 873. Tibiale Height. The height of the proximal medial margin of the tibia.
- 877. Tragion Height. The height of tragion.
- 882. Tragion to Top of Head. The distance from tragion to the level of the top of the head.
- 884. Tragion to Wall. The distance from tragion to wall.
- 888. Triceps Skinfold. The thickness of a skinfold on the back of the back of the arm halfway between acromion and the tip of the elbow, picked up parallel to the long axis of the upper arm.
- 890. Triceps Skinfold, II. The preceding measurement repeated on the opposite arm. (Not pictured)
- 894. Trochanteric Height. The height of trochanterion.
- 896. Trunk Depth. The depth of the chest below the bust or the abdomen, whichever is the larger.
- 898. Trunk Height. The height of suprasternale above the sitting surface.

911. Vertical Grip Reach. The height of a pointer held horizontal in the subject's fist when the arm is maximally extended upward.
912. Vertical Grip Reach, Sitting. The height above the sitting surface of a pointer held horizontal in the subject's fist when the arm is maximally extended upward.
913. Vertical Reach. The height of the tip of the middle finger when the arm, hand, and fingers are extended vertically.
914. Vertical Reach, Sitting. The height above the sitting surface of the tip of the middle finger when the arm, hand, and fingers are extended vertically.
916. Vertical Trunk Circumference. The circumference of the torso measured with the tape passing diagonally across the front of the body from the midpoint of the shoulder to the crotch, through the crotch, over the posterior protuberance of the buttock and along the small of the back.
917. Vertical Trunk Circumference, Sitting. The previous measurement repeated with the subject seated.

921. Waist Back. The surface distance, along the spine, from waist level to cervicale (the tip of the 7th cervical vertebra).
924. Waist Breadth. The breadth of the torso at waist level.
928. Waist Breadth, Over Foundation Garment. The preceding measurement repeated with the subject wearing a foundation garment. (Not pictured)
931. Waist Circumference. The circumference of the torso at waist level.
932. Waist Circumference, Over Foundation Garment. The preceding measurement repeated with the subject wearing a foundation garment. (Not pictured)
933. Waist Circumference, Sitting. The circumference of the torso at waist level.
939. Waist Depth. The depth of the torso at waist level.
941. Waist Depth, Sitting. The depth of the torso at waist level.
943. Waist Depth, Over Foundation Garment. The preceding measurement repeated with the subject wearing a foundation garment. (Not pictured)
946. Waist Front. The surface distance in the midsagittal plane from waist level to suprasternale.
947. Waist Front from Cervicale. The distance from cervicale to waist level, measured with the tape passing along the base of the neck to the neck-shoulder intersection and following the contour of the body to waist level in the midsagittal plane.
949. Waist Height. The height of waist level.
951. Waist Height, Sitting. The height from the sitting surface of the waist level.
953. Waist Height, Over Foundation Garment. Measurement #949 repeated with the subject wearing a foundation garment. (Not pictured)
957. Weight. The nude, or essentially nude, weight (except for the HEXS survey). (Not pictured)
960. Weight as Reported. Weight as reported by the subject immediately prior to being measured. (Not pictured)
964. Wrist Breadth. The distance between the radial and ulnar styloid prominences of the wrist measured with the flesh compressed.
967. Wrist Circumference. The circumference of the wrist at the level of the tip of the styloid process of the radius.
973. Wrist Height. The height of stylion.

		15. Supplementary Notes As an aid to the reader, where necessary the original units of measure have been converted to the equivalent value in the Systeme International d'Unités (SI). The SI units are written first, and original units are written parenthetically thereafter. The physiological pressure unit used, mm Hg, has not been supplemented with an SI equivalent because of its universal usage in the biomedical field.	
16. Abstract This three-volume publication brings together a large mass of anthropometric data which define the physical size, mass distribution properties, and dynamic capabilities of U.S. and selected foreign adult populations. Aimed specifically to meet the needs of design engineers engaged in the design and execution of clothing, equipment, and workspaces for the NASA Space Shuttle Program, the book is also designed to be of use to human engineers in a wide variety of fields. It is not only a comprehensive source of specific anthropometric information but also a guide to the effective applications of such data. Subjects covered in Volume I include physical changes in the zero-g environment, variability in body size, mass distribution properties of the human body, arm and leg reach, joint motion, strength, sizing and design of clothing and workspaces, and statistical guidelines. Material presented includes such unpublished anthropometric data measured under one-g and zero-g conditions. Also included are 1985 body size projections and actual cutouts of quarter-scale two-dimensional manikins for use by designers. Volume II contains data resulting from surveys of 61 military and civilian populations of both sexes from the U.S., Europe, and Asia. Some 295 measured variables are defined and illustrated. Volume III is an annotated bibliography covering a broad spectrum of topics relevant to applied physical anthropology with emphasis on anthropometry and its applications in sizing and design.
