① Amounts and quantities given are for a 4 liter container for odor and for a 4-liter container for CO/TO.

② Due to WSTF safety criteria, a CO/TO test must be performed before any odor test can be performed, except in special cases where only one item is available for testing. Therefore, enough material must be submitted for both CO odor Tests in order to perform any Odor Test.

③ Quantities include enough materials to conduct WSTF screening test.
